Video Data Management And Information Retrieval:

Video Data Management and Information Retrieval Sagarmay Deb,2005-01-01 This book combines the two important areas of research within computer technology and presents them in comprehensive easy to understand manner Ideal for graduates and under graduates as well as researchers working in either video data management or information retrieval it takes an in depth look at many relevant topics within both video data management and information retrieval In addition to dissecting those issues it also provides a big picture view of each topic Web Data Management and Electronic Commerce Bhavani Thuraisingham,2000-06-22 Effective electronic commerce requires integrating resources and extracting the critical information from across Web sites From the recent efforts to develop tools for interoperability and warehousing between scattered information on the web emerged the new discipline of web data management and this book Web Data Management and Electronic Commerce The first of its kind it combines data management and mining object technology electronic commerce Java and the Internet into a complete overview of the concepts and developments in this new field It details technologies in security multimedia data management techniques and real time processing and discusses the emerging standards of Java Database Connectivity XML metadata and middleware A simple Web site isn t good enough anymore To remain competitive you need Internet capabilities that allow you and your customers to buy sell and advertise Even if you are unfamiliar with e commerce this self contained volume provides the background you need to understand it through appendices that explain data management Internet security and object technology Approachable enough for the beginner and complete enough for the expert Web Data Management and Electronic Commerce helps you to manage information effectively and efficiently Encyclopedia of Information Science and Technology Mehdi Khosrow-Pour,Mehdi Khosrowpour,2009 This set of books represents a detailed compendium of authoritative research based entries that define the contemporary state of knowledge on technology Provided by publisher **Quality Software Through Reuse and Integration** Stuart H. Rubin,Thouraya Bouabana-Tebibel,2017-08-15 This book presents 13 high quality research articles that provide long sought after answers to questions concerning various aspects of reuse and integration Its contents lead to the inescapable conclusion that software hardware and design productivity including quality attributes is not bounded It combines the best of theory and practice and contains recipes for increasing the output of our productivity sectors The idea of improving software quality through reuse is not new After all if software works and is needed why not simply reuse it What is new and evolving however is the idea of relative validation through testing and reuse and the abstraction of code into frameworks for instantiation and reuse Literal code can be abstracted These abstractions can in turn yield similar codes which serve to verify their patterns There is a taxonomy of representations from the lowest level literal codes to their highest level natural language descriptions As a result product quality is improved in proportion to the degree of reuse at all levels of abstraction Any software that is in theory complex enough to allow for self reference cannot be certified as being absolutely

valid The best that can be attained is a relative validity which is based on testing Axiomatic denotational and other program semantics are more difficult to verify than the codes which they represent But are there any limits to testing And how can we maximize the reliability of software or hardware products through testing These are essential questions that need to be addressed and will be addressed herein *XML-Based Data Management and Multimedia Engineering - EDBT 2002 Workshops* Akmal B. Chaudhri, Chabane Djeraba, Rainer Unland, Wolfgang Lindner, 2003-08-02 This volume comprises papers from the following three workshops that were part of the complete program for the International Conference on Extending Database Technology EDBT held in Prague Czech Republic in March 2002 XML Based Data Management XMLDM Second International Workshop on Multimedia Data and Document Engineering MDDE Young Researchers Workshop YRWS Together the three workshops featured 48 high quality papers selected from approximately 130 submissions It was therefore difficult to decide on the papers that were to be accepted for presentation We believe that the accepted papers substantially contribute to their particular fields of research The workshops were an excellent basis for intense and highly fruitful discussions The quality and quantity of papers show that the areas of interest for the workshops are highly active A large number of excellent researchers are working in relevant fields producing research output that is not only of interest to other researchers but also for industry The organizers and participants of the workshops were highly satisfied with the output The high quality of the presenters and workshop participants contributed to the success of each workshop The amazing environment of Prague and the location of the EDBT conference also contributed to the overall success Last but not least our sincere thanks to the conference organizers the organizing team was always willing to help and if there were things that did not work assistance was quickly available *Feature Detectors and Motion Detection in Video Processing* Dey, Nilanjan, Ashour, Amira, Patra, Prasenjit Kr., 2016-10-25 Video is one of the most important forms of multimedia available as it is utilized for security purposes to transmit information promote safety and provide entertainment As motion is the most integral element in videos it is important that motion detection systems and algorithms meet specific requirements to achieve accurate detection of real time events *Feature Detectors and Motion Detection in Video Processing* explores innovative methods and approaches to analyzing and retrieving video images Featuring empirical research and significant frameworks regarding feature detectors and descriptor algorithms the book is a critical reference source for professionals researchers advanced level students technology developers and academicians **NASA Thesaurus**, 1998 Contains the authorized subject terms by which the documents in the NASA STI Database are indexed and retrieved **Secure Semantic Service-Oriented Systems** Bhavani Thuraisingham, 2010-12-14 As the demand for data and information management continues to grow so does the need to maintain and improve the security of databases applications and information systems In order to effectively protect this data against evolving threats an up to date understanding of the mechanisms for securing semantic Web technologies is essential Review *Visual Information and Information Systems* Nies Huijsmans, Arnold W.M.
