Curve and Question

IMPORTANT SAFETY CAUTIONS: Always disconnect the gas/hot water electrical supply before cleaning. Remove/hold back wiring of water drainback into the container. Do not attempt to disconnect the heating unit. Doing so could damage the supplier's water/gas control system, and will void the warranty.

These findings suggest that the use of a single, standardized, and validated instrument to assess the impact of a program may not be the best approach for all programs. The use of multiple instruments may be more appropriate for some programs, particularly those that are complex and have multiple outcomes. The use of multiple instruments may also be more appropriate for programs that are being evaluated in a formative or process evaluation context, where the goal is to understand the program's impact on a range of outcomes, rather than to measure a single, specific outcome.
