Transforming Information Literacy Instruction Using Learner Centered Teaching:

Transforming Information Literacy Instruction Using Learner-centered Teaching Joan R. Kaplowitz, 2012 Do you feel like it's long past time to totally transform information literacy instruction? If so, this indispensable new book by Joan Kaplowitz has everything you need to help you incorporate learner-centred teaching (LCT) into information literacy instruction (ILI). Combining important grounding in the discipline with usable instructions and tips, Collaboration, participation, and responsibility are emphasized. You get first-hand information on the transition to learner-centred teaching through Joan Kaplowitz's own experience as well as real-life examples from instructors in the field who support the learner-centred teaching model. Part One explains how learner-centred teaching works and why it's so effective, offers tips and tricks to listen to, engage with, and inspire your learners, and provides essential background information and resources to paint a well-rounded picture of the learner-centred teaching model. Part Two helps you plan for LCT by covering different methods like modelling, questioning, and collaborative group work. You'll also gain valuable advice on measuring outcomes, assessment, and selecting the best instructional activities based on those outcomes. Part Three brings everything together by applying LCT to practice, with tips on strengthening the face-to-face learning experience, creating the right environment, and discussing important drawbacks to consider in certain classrooms. An entire chapter is devoted to creating an online learner-centred experience that includes pros and cons, special challenges, designing the online environment to get the most out of LCT, and the key elements for online instruction. Perspectives from school, public, college, university, and special libraries provide best practices from all areas of librarianship. Readership: Librarians, information professionals, and students on librarianship and information science courses.

Designing Information Literacy Instruction Joan R. Kaplowitz, 2014-05-01 Designing Information Literacy Instruction: The Teaching Tripod Approach provides a working knowledge of how instructional design (ID) applies to information literacy instruction (ILI). Its how-to approach is directed at instruction librarians in all library settings and deals with both face-to-face and online ID issues. No matter where an instruction librarian works, whom they are teaching, or what delivery mode they will be using, the ID process remains the same. Start with the user and the user's needs. Identify the instructional problem(s). Develop outcomes that address these problem(s). Use outcomes to drive both the learning activities included and the assessments used to measure the attainment of the success of the instructional endeavor. This book will help instruction librarians create instruction for all types of environments and in all modes of delivery. It includes exercises and worksheets to help the reader work through the instructional design process. Based on Kaplowitz's innovative Teaching Tripod model, it will help instructional librarians clearly define the crucial links between outcomes, activities, and assessment.

Transforming Information Literacy Instruction Amy R. Hofer, Silvia Lin Hanick, Lori Townsend, 2018-11-16 Provides information literacy practitioners with a thorough exploration of how threshold concepts can be applied to information literacy, identifying important elements and connections between each concept and relating theory to practical

methods that can transform how librarians teach A model that emerged from the Enhancing Teaching Learning Environments project in Great Britain threshold concepts are those transformative core ideas and processes in a given discipline that define the ways of thinking and practicing shared by experts Once a learner grasps a threshold concept new pathways to understanding and learning are opened up The authors of this book provide readers with both a substantial introduction to and a working knowledge of this emerging theory and then describe how it can be adapted for local information literacy instruction contexts Five threshold concepts are presented and covered in depth within the context of how they relate and connect to each other The chapters offer an in depth explanation of the threshold concepts model and identify how it relates to various disciplines and our own discipline information science and to the understandings we want our students to acquire This text will benefit readers in these primary audiences academic librarians involved with information literacy efforts at their institutions faculty teaching in higher education upper level college administrators involved in academic accreditation and high school librarians working with college bound students
