The System Designer's Guide to VHDL-AMS Peter J. Ashenden, Gregory D. Peterson, Darrell A. Teegarden, 2002-09-10
The demand is exploding for complete integrated systems that sense process manipulate and control complex entities such as sound images text motion and environmental conditions These systems from hand held devices to automotive sub systems to aerospace vehicles employ electronics to manage and adapt to a world that is predominantly neither digital nor electronic To respond to this design challenge the industry has developed and standardized VHDL AMS a unified design language for modeling digital analog mixed signal and mixed technology systems VHDL AMS extends VHDL to bring the successful HDL modeling methodology of digital electronic systems design to these new design disciplines Gregory Peterson and Darrell Teegarden join best selling author Peter Ashenden in teaching designers how to use VHDL AMS to model these complex systems This comprehensive tutorial and reference provides detailed descriptions of both the syntax and semantics of the language and of successful modeling techniques It assumes no previous knowledge of VHDL but instead teaches VHDL and VHDL AMS in an integrated fashion just as it would be used by designers of these complex integrated systems Explores the design of an electric powered unmanned aerial vehicle system UAV in five separate case studies to illustrate mixed signal mixed technology power systems communication systems and full system modeling *IBM FlashSystem 9100 Product Guide* Jon Herd, Tony Pacheco, IBM Redbooks, 2020-05-20 This IBM Redbooks Product Guide publication describes IBM FlashSystem 9100 solution which is a comprehensive all flash and NVMe enabled enterprise storage solution that delivers the full capabilities of IBM FlashCore technology In addition it provides a rich set of software defined storage SDS features including data reduction and de duplication dynamic tiering thin provisioning snapshots cloning replication data copy services and IBM HyperSwap for high availability HA Scale out and scale up configurations further enhance capacity and throughput for better availability **Chemical and Cellular Architecture** Abel Lajtha, 2013-04-18 After the completion of the first edition of this series this editor thought that a new edition would not be warranted in less than 15 perhaps 20 years but it seems that we live in a time in which rapid changes are the norm and findings in a field such as neurochemistry develop exponentially The task of a future editor attempting to get a comprehensive neurochemical handbook for the year 2000 would be even less enviable but by then information processing may be very different The approach the design and the areas covered by each volume and each chapter are necessarily arbitrary and it is likely that other editors or authors would have approached the coverage or the organization in a different manner It is hoped however that readers will find the series helpful for beginning or for continuing work There may be some overlap among the various chapters but insisting on single coverage of an area would at times have restricted treatment to only one point of view and might have truncated and hurt the logical flow of some of the chapters **Data Center Virtualization Certification: VCP6.5-DCV Exam Guide** Andrea Mauro, Paolo Valsecchi, 2018-08-27 Deploy and configure vSphere infrastructure and learn to effectively create and administer vSphere
