Voices Of The Rocks A Scientist Looks At Catastrophes And Ancient Civilizations:

Voices of the Rocks Robert M. Schoch, Robert Aquinas McNally, 1999 Could the Egyptian Sphinx have been built many centuries earlier than conventional history would have us believe Could the great natural disasters that propelled the evolution of life on Earth have played a dominant role as well in the rise and fall of civilizations Could Earth have been home to civilizations far greater in number and far older than orthodox researchers have suspected In *Voices of the Rocks* Dr Robert M Schoch examines these and other crucial questions about our past and shows how the answers can guide us in the future In 1990 Robert Schoch a scientist and tenured university professor traveled to Egypt and conducted geological testing to evaluate the accepted date for the construction of the Great Sphinx of Giza His research revealed that the Sphinx is actually thousands of years older than previously supposed a discovery that upended the standard history of ancient Egypt Following the intellectual trail uncovered by his redating of the Sphinx Schoch became convinced that we are in the midst of a profound scientific paradigm shift The predominant notion that our species inhabits a slow changing steady state planet is falling by the wayside Instead we are coming to see that the history of Earth all living beings and human civilizations comprises a series of stops and starts in which equilibrium abruptly ends during a sudden severe catastrophe like the extraterrestrial impact that initiated the extinction of the dinosaurs Meteors asteroids and comets are potential sources of such disasters as are shifts in Earth's axis movements of the continents volcanic eruptions and earthquakes According to Dr Schoch Earth's long catastrophic history has obscured and obliterated evidence of lost civilizations But the traces remain for those who know where to look and what to look for At its core *Voices of the Rocks* is the story of Schoch's own search his fascinating discoveries and the warnings we must heed if we wish to survive whatever catastrophes the future has in store for us

Revolution addresses and clarifies the all important question Is there legitimate evidence for a world beyond the ordinary

Forbidden History J. Douglas Kenyon, 2005-03-29 Challenges the scientific theories on the establishment of civilization and technology Contains 42 essays by 17 key thinkers in the fields of alternative science and history including Christopher Dunn Frank Joseph Will Hart Rand Flem Ath and Moira Timmes Edited by Atlantis Rising publisher J Douglas Kenyon In *Forbidden History* writer and editor J Douglas Kenyon has chosen 42 essays that have appeared in the bimonthly journal Atlantis Rising to provide readers with an overview of the core positions of key thinkers in the field of ancient mysteries and alternative history The 17 contributors include among others Rand Flem Ath Frank Joseph Christopher Dunn and Will Hart all of whom

challenge the scientific establishment to reexamine its underlying premises in understanding ancient civilizations and open up to the possibility of meaningful debate around alternative theories of humanity's true past. Each of the essays builds upon the work of the other contributors. Kenyon has carefully crafted his vision and selected writings in six areas: Darwinism, Under Fire, Earth Changes, Sudden or Gradual, Civilization's Greater Antiquity, Ancestors from Space, Ancient High Tech, and The Search for Lost Origins. He explores the most current ideas in the Atlantis debate, the origins of the Pyramids, and many other controversial themes. The book serves as an excellent introduction to hitherto suppressed and alternative accounts of history as contributors raise questions about the origins of civilization and humanity, catastrophism, and ancient technology. The collection also includes several articles that introduce, compare, contrast, and complement the theories of other notable authors in these fields, such as Zecharia Sitchin, Paul LaViolette, John Michell, and John Anthony West.

Origins of the Sphinx Robert M. Schoch, Robert Bauval, 2017-03-16

New research and evidence that the Sphinx is thousands of years older than previously thought. Contrasts what Egyptologists claim about the Sphinx with historical accounts and new research including reanalysis of seismic studies and updates to Schoch's water weathering research and Bauval's Orion Correlation Theory. Examines how the Sphinx is contemporaneous with Gbekli Tepe, aligned with the constellation Leo, and was recarved during the Old Kingdom era of Egypt. Reveals that the Sphinx was built during the actual historical Golden Age of ancient Egypt, the period known in legend as Zep Tepi. No other monument in the world evokes mystery like the Great Sphinx of Giza. It has survived the harsh climate of Egypt for thousands of years and will remain long after our own civilization is gone. According to orthodox Egyptology, the Sphinx was built around 2500 BCE as a memorial to the pharaoh Khafre. Yet this fact has scant to no supportive evidence. When was the Sphinx really built, and most importantly, why? In this provocative collaboration from two Egyptology outsiders, Robert M. Schoch, Ph.D., and Robert Bauval combine their decades of research to show how the Sphinx is thousands of years older than the conventional Egyptological timeline and was built by a long forgotten pre-Pharaonic civilization. They examine the known history of the Sphinx, contrasting what Egyptologists claim with prominent historical accounts and new research, including updates to Schoch's geological water weathering research and reanalysis of seismic studies. Building on Bauval's Orion Correlation Theory, they investigate the archaeoastronomical alignments of the monuments of the Giza Plateau and reveal how the pyramids and Sphinx were built to align with the constellations of Orion and Leo. Analyzing the evidence for a significantly older construction phase at Giza and the restoration and recarving of the Sphinx during the Old Kingdom era, they assert that the Sphinx was first built by an advanced pre-Pharaonic civilization that existed circa 12,000 years ago, on the Giza Plateau, contemporaneous with the sophisticated Gbekli Tepe complex. The authors examine how the monuments at Giza memorialize Zep Tepi, the Golden Age of legend shown here to be an actual historical time period from roughly 10,500 BCE through 9,700 BCE. Moving us closer to an understanding of the true age and purpose of the Great Sphinx, Schoch and Bauval provide evidence of an early high civilization witnessed by
