not end with the opening of the western frontier and the replacement of sailing ships by steamers Rather he demonstrates its continuity and vitality identifying a central vision within the tradition and showing how particular authors draw from transform and contribute to it What is most distinctive about American sea fiction Bender contends is its visionary often mystical response to the biological world and to man s perceived place in the larger universe When Melville envisioned the sea as the essential element of life indeed as life itself he changed the course of American sea fiction by introducing the relevance of biological thought But his meditations on the whale and the ungraspable phantom of life project a different reality from that envisioned by his successors In American sea fiction after Melville the influence of Origin of Species is as powerful as that of Moby Dick or the theme of sailing ships being displaced by steam The ideal of brotherhood so central to American sea fiction was severely compromised by the biological reality of a competitive warring nature Twentieth century sea fiction has continued to center on the biological world and address the possibility of democratic brotherhood but the issues were fundamentally changed by Darwin s theories This book will be a valuable source for students and scholars of American literature and will interest readers of sea fiction **The Publishers Weekly** ,1972 Scientific American ,1912

The Reason Why: General Science Robert Kemp Philp,1860 *Bookseller, Newsdealer and Stationer* ,1897
