The War Against Animals Critical Animal Studies:

The War Against Animals Dinesh Joseph Wadiwel, 2015-06-25 In *The War against Animals* Dinesh Wadiwel draws on critical political theory to provide a provocative account of how our mainstay relationships with animals are founded upon systemic hostility and bio political sovereign violence

The War against Animals Dinesh Wadiwel, 2015-06-24 Are non human animals our friends or enemies In this provocative book Dinesh Wadiwel argues that our mainstay relationships with billions of animals are essentially hostile *The War against Animals* asks us to interrogate this sustained violence across its intersubjective institutional and epistemic dimensions Drawing from Foucault Spivak and Derrida *The War against Animals* argues that our sovereign claim of superiority over other animals is founded on nothing else but violence Through innovative readings of Locke and Marx Dinesh Wadiwel argues that property in animals represents a bio political conquest that aims to secure animals as the spoils of war The goal for pro animal advocacy must be to challenge this violent sovereignty and recognize animal resistance through forms of counter conduct and truce

Animals and War Anthony J. Nocella II, Colin Salter, Judy K.C. Bentley, 2013-12-19 *Animals and War* Confronting the Military Animal Industrial Complex is the first book to examine how nonhuman animals are used for war by military forces Each chapter delves deeply into modes of nonhuman animal exploitation as weapons test subjects and transportation and as casualties of war leading to homelessness starvation and death With leading scholar activists writing each chapter this is an important text in the fields of peace studies and critical animal studies This is a must read for anyone interested in ending war and fostering peace and justice

[Animals in International Law](#) Anne Peters, 2021-05-25 The plight of animal individuals and species inflicted on them by human activity is a global problem with detrimental repercussions for all humans and for the entire planet This book gives an overview of the most important international legal regimes that directly address and indirectly affect animals It covers species conservation treaties notably the international whaling regime the farm animal protection rules of the EU international trade law and the international law of armed conflict It also analyses the potential for an international regime of animal rights Finding that international law creates more harm than good for animals the author suggests progressive treaty interpretation treaty making and animal interest representation to close the animal welfare gap in international law A body of global animal law needs to be developed accompanied by critical global animal studies

Animals as Legal Beings Maneesha Deckha, 2020-12-16 In *Animals as Legal Beings* Maneesha Deckha critically examines how Canadian law and by extension other legal orders around the world participate in the social construction of the human animal divide and the abject rendering of animals as property Through a rigorous but cogent analysis Deckha calls for replacing the exploitative property classification for animals with a new transformative legal status or subjectivity called beingness In developing a new legal subjectivity for animals one oriented toward respecting animals for who they are rather than their proximity to idealized versions of humanness *Animals as Legal Beings* seeks to bring critical animal theorizations and animal law closer together

Throughout Deckha draws upon the feminist animal care tradition as well as feminist theories of embodiment and relationality postcolonial theory and critical animal studies Her argument is critical of the liberal legal view of animals and directed at a legal subjectivity for animals attentive to their embodied vulnerability and desirous of an animal friendly cultural shift in the core foundations of anthropocentric legal systems Theoretically informed yet accessibly presented *Animals as Legal Beings* makes a significant contribution to an array of interdisciplinary debates and is an innovative and astute argument for a meaningful more than human turn in law and policy

Animals and War Anthony J. Nocella, Colin Salter, Judy K. C. Bentley, 2015 *Animals and War* Confronting the Military Animal Industrial Complex is the first book to examine how nonhuman animals are used for war by military forces Each chapter delves deeply into modes of nonhuman animal exploitation as weapons test subjects and transportation and as casualties of war leading to homelessness starvation and death With leading scholar activists writing each chapter this is an important text in the fields of peace studies and critical animal studies This is a must read for anyone interested in ending war and fostering peace and justice

The Animal Research War P. Michael Conn, James V. Parker, 2008-05-15 When overzealous animal rights activists threaten one of America's best known scientists and academic leaders he collaborates with an analyst of animal rights to produce a personal account of what it is like to be a medical researcher targeted by such a powerful movement This thoughtful and surprising book analyzes the effect of animal extremism on the world's scientists their institutions and professional societies P Michael Conn and James V Parker analyze the motivations of animal rights extremists while also delving into the changing ways in which the public and legal system views animals The *Animal Research War* counters the lies propagated by extremist animal rights organizations for example the fact that animals comprise only 6% of any medical research and very little harm comes to animals under experimentation This book is an intriguing and compelling platform from which to better understand the plight of the modern scientist and the risk to scientific advancement if animal extremism is allowed to win

Social Theory and Practice, 2021-10 *Animals and Capital* Associate Professor in Socio-Legal Studies and Human Rights Dinesh Joseph Wadiwel, Dinesh Joseph Wadiwel, 2025-02-28 The first systematic application of Marx's value theory to animal labour within the context of capitalist food systems

Anarchism and Animal Liberation Anthony J. Nocella II, Richard J. White, Erika Cudworth, 2015-07-20 Building upon anarchist critiques of racism sexism ableism and classism this collection of new essays melds anarchism with animal advocacy in arguing that speciesism is an ideological and social norm rooted in hierarchy and inequality Rising from the anarchist influenced Occupy Movement this book brings together international scholars and activists who challenge us all to look more critically into the causes of speciesism and to take a broader view of peace social justice and the nature of oppression Animal advocates have long argued that speciesism will end if the humanity adopts a vegan ethic This concept is developed into the argument that the vegan ethic has the most promise if it is also anti capitalist and against all forms of domination

Animals and Capital Dinesh Joseph Wadiwel, 2023-10-17 The first

systematic application of Marx's value theory to animal labour within the context of capitalist food systems **Research resources reporter** ,1997 **Live Animal Trade & Transport Magazine** ,1993 *Campaign* ,1992 **Steroids** Alvin Silverstein, Virginia B.
