The Voice Of Liberal Learning Michael Oakeshott On Education:

The Voice of Liberal Learning Michael Oakeshott, 2001 To those weary and wary of the cacophony about what's wrong with education in America and what ought to be done about it Oakeshott's voice beckons As usual his approach to the subject is subtle comprehensive and radical in the sense of summoning readers to the root of the matter That root Oakeshott believed is the very nature of learning itself and concomitantly the means as distinct from the method by which the life of learning is discovered cultivated and pursued As Oakeshott has written This then is what we are concerned with adventures in human self understanding Not the bare protestation that a human being is a self conscious reflective intelligence and that he does not live by bread alone but the actual enquiries utterances and actions in which human beings have expressed their understanding of the human condition This is the stuff of what has come to be called a liberal education liberal because it is liberated from the distracting business of satisfying contingent wants Includes a foreword by Timothy Fuller that reiterates the timelessness of Oakeshott's reflections amid the continuing clamour that characterises discourse about liberal education

Educational Theory and Jewish Studies in Conversation Harvey Shapiro, 2013 Educational Theory and Jewish Studies in Conversation From Volozhin to Buczacz by Harvey Shapiro PhD brings together two different fields of study modern Jewish studies and contemporary educational theory to provide new theoretical frameworks for their interaction Although Jewish studies and education programs at secular universities have joined denominational and transdenominational institutions of higher learning in adopting a dual or parallel course structure there has been little scholarly attention given to the basis for doing so Shapiro provides alternative theoretical frameworks for the relationship between Jewish studies and educational theory and discusses different ways of developing and articulating these relationships between disciplines Shapiro shows what is at stake when students and faculty think and communicate together across discourses in particular between the fields of education and Jewish studies Presenting an alternative to conventional notions of interdisciplinarity this book's import extends to virtually all relationships between the humanities and professional education when these different discourses illuminate and challenge one another

International Handbook of Philosophy of Education Paul

Smeyers, 2018-06-09 This handbook presents a comprehensive introduction to the core areas of philosophy of education combined with an up to date selection of the central themes It includes 95 newly commissioned articles that focus on and advance key arguments each essay incorporates essential background material serving to clarify the history and logic of the relevant topic examining the status quo of the discipline with respect to the topic and discussing the possible futures of the field The book provides a state of the art overview of philosophy of education covering a range of topics Voices from the present and the past deals with 36 major figures that philosophers of education rely on Schools of thought addresses 14 stances including Eastern Indigenous and African philosophies of education as well as religiously inspired philosophies of

education such as Jewish and Islamic Revisiting enduring educational debates scrutinizes 25 issues heavily debated in the past and the present for example care and justice democracy and the curriculum New areas and developments addresses 17 emerging issues that have garnered considerable attention like neuroscience videogames and radicalization The collection is relevant for lecturers teaching undergraduate and graduate courses in philosophy of education as well as for colleagues in teacher training Moreover it helps junior researchers in philosophy of education to situate the problems they are addressing within the wider field of philosophy of education and offers a valuable update for experienced scholars dealing with issues in the sub discipline Combined with different conceptions of the purpose of philosophy it discusses various aspects using diverse perspectives to do so Contributing Editors Section 1 Voices from the Present and the Past Nuraan Davids Section 2 Schools of Thought Christiane Thompson and Joris Vlieghe Section 3 Revisiting Enduring Debates Ann Chinnery Naomi Hodgson and Viktor Johansson Section 4 New Areas and Developments Kai Horsthemke Dirk Willem Postma and Claudia Ruitenberg

Rethinking College Education George Allan, 1997 Not a method of turning your degree back in and having your loans forgiven but an argument that by becoming vocational schools measured by reduced cost and efficient production colleges and universities are neglecting their essential purpose The reason for college education says Allan is to provide an environment within which students can absorb the moral practices that determine how they can acquire and evaluate knowledge best conduct their lives and become responsible adults He maintains that such learning requires imagination dialogue conversation and cultured intercourse Annotation copyrighted by Book News Inc Portland OR

Undeclared Chris Higgins, 2024-05-14 An imaginative tour of the contemporary university as it could be a place to discover self knowledge meaning and purpose What if college were not just a means of acquiring credentials but a place to pursue our formation as whole persons striving to lead lives of meaning and purpose In Undeclared Chris Higgins confronts the contemporary university in a bid to reclaim a formative mission for higher education In a series of searching essays and pointed interludes Higgins challenges us to acknowledge how far our practices have drifted from our ideals asking What would it look like to build a college from the ground up to support self discovery and personal integration What does it mean to be a public university and are there any left How can the humanities help the jobified university begin to take vocation seriously Cutting through the underbrush of received ideas Higgins follows the insight where it leads clearing a path from the corporate multiversity to the renaissance in higher education that was Black Mountain College and back again Along the way we tour a campus bent on becoming a shopping mall accompany John Dewey through a midlife crisis and witness the first happening Through diverse and grounded philosophical engagements Undeclared assembles the resources to expand the contemporary educational imagination

Neoliberalizing the University: Implications for American Democracy Sanford Schram, 2017-10-02 This collection brings together essays to address the crisis of Higher Education today focusing on its neoliberalization Higher Education has been under assault for several decades as neoliberalism's preference for market

based reforms sweeps across the US political economy The recent push for neoliberalizing the academy comes at a time when it is ripe for change especially as it continues to confront growing financial pressure particularly in the public sector The resulting cutbacks in public funding especially to state universities led to a variety of debilitating changes increases in tuition growing student debt more students combining working and schooling declining graduation rates for minorities and low income students increased reliance on adjuncts and temporary faculty and most recently growing interest in mass processing of students via online instruction While many serious questions arise once we begin to examine what is happening in higher education today one particularly critical question concerns the implications of these changes on the relationship of education to as yet still unrealized democratic ideals The 12 essays collected in this volume create important resources for students faculty citizens and policymakers who want to find ways to address contemporary threats to the higher education democracy connection This book was originally published as a special issue of New Political Science

Fifty Modern Thinkers on Education Joy Palmer, David Edward Cooper, Liora Bresler, 2001 Looks at fifty of the twentieth century's most significant contributors to the debate on education Each essay gives key biographical information an outline of the individual's principal achievements and activities an assessment of his or her impact and influence and a list of their major writings and suggested further reading

The Democratic Theory of Michael Oakeshott Michael Minch, 2009 This book offers a description explanation and evaluation of Michael Oakeshott's democratic theory He was not a democratic theorist as such but as a twentieth century English political theorist for whom liberal theory held deep importance his thought often engaged democratic theory implicitly and many times did so explicitly The author's project penetrates two renewals The first is the revitalization of interest in Oakeshott and the second is the renewal of democratic theory which began in the 1980s In respect to this latter renewal the book engages the deliberative turn in democratic theory These revivals create the context for this new look at Oakeshott To state the matter as a problem one might say that in light of new and fecund democratic theory it is a problem for political theory if one of the most important political theorists of the twentieth century is left out of the discourse insofar as he has something relevant to say about deliberative democracy It is of no small importance that almost all the work in democratic theory being done these days is of the deliberative discursive kind or responses to it That is deliberative theory is driving the agenda of democratic theory The author argues that Oakeshott does indeed have something relevant to say which is applicable to this democratic theory

An Ethical Education Mortimer N. S. Sellers, 1994-11-10 This book considers the ethical basis of fundamental university policies with special emphasis on how issues of community and diversity influence education Students faculty and administrators must seek to maintain a sense of community as diversity increasingly characterises university campuses This raises four central questions which are addressed in this volume What should the aims of universities be given their changed demography How should university curricula reflect multicultural society Does the new environment require special treatment of campus speech What role should affirmative

action play in promoting diversity or community in the academy The shared premise of these essays presented from a variety of perspectives is that university administrators teachers and academic ethicists will all benefit from examining such issues together The contributors approach academic ethics from very diverse institutional roles and ideological positions and this provides a broad and provocative basis for classroom and institutional discussion of the aims of the university the curriculum campus speech and affirmative action These essays will help to give pluralism meaning and establish the common purpose and community of good will that make academic discourse possible
