among the main threats posed by climate change wreaking havoc on both human and nonhuman forms of life. This book engages with instances of extreme events related to water droughts, floods, deluges, and the impact of climate change on some waterbodies, seas, and wetlands in contemporary Anglophone novels. By taking into account a corpus of novels ranging from the various areas of the Anglophone world and thus shuttling between the Global North and the Global South, the book reads these novels as water stories. This volume pays attention to the pervasive presence of water in all aspects of our lives, thus showing how narratives can offer insightful accounts of the present water crisis. Alternating between an econarratological perspective, reflections on the Anthropocene, and the human/nonhuman imbrications within the blue humanities, the book contributes significantly to the considerations of the imaginative possibilities of these water stories, showing how narratives can offer insightful accounts of the present water crisis.

Noah's Arkive Jeffrey J. Cohen, Julian Yates, 2023-06-13. A timely rethinking of the archetypal story of Noah, the great flood, and who was left behind as the waters rose. Most people know the story of Noah from a children's bible or a play set with a colorful ship, bearded Noah, pairs of animals, and an uncomplicated vision of survival. Noah's ark, however, will forever be haunted by what it leaves to the rising waters so that the world can begin again. In *Noah's Arkive*, Jeffrey J. Cohen and Julian Yates examine the long history of imagining endurance against climate catastrophe, as well as alternative ways of creating refuge. They trace how the elements of the flood narrative were elaborated in medieval and early modern art, text, and music, and now shape writing and thinking during the current age of anthropogenic climate change. Arguing that the biblical ark may well be the worst possible exemplar of human behavior, the chapters draw on a range of sources from the Epic of Gilgamesh and Ovid's tale of Deucalion and Pyrrha to speculative fiction, climate fiction, and stories of art dwelling with environmental catastrophe. *Noah's Arkive* uncovers the startling afterlife of the Genesis narrative, written from the perspective of Noah's wife and family, the animals on the ark, and those excluded and so left behind to die. This book of recovered stories speaks eloquently to the ethical and political burdens of living through the Anthropocene. Following a climate change narrative across the millennia, *Noah's Arkive* surveys the long history of dwelling with the consequences of choosing only a few to survive in order to start the world over. It is an intriguing meditation on how the story of the ark can frame how we think about environmental catastrophe and refuge, conservation, and exclusion, offering hope for a better future by heeding what we know from the past.

Negotiating Waters: Seas, Oceans, and Passageways in the Colonial and Postcolonial Anglophone World André Dodeman, Nancy Pedri, 2020-01-31. This book examines how seas, oceans, and passageways have shaped and reshaped cultural identities, spurred stories of reunion and separation, and redefined entire nations. It explores how entire communities have crossed seas and oceans voluntarily or not to settle in foreign lands and undergone identity, cultural, and literary transformations. It also explores how these crossings are represented. The book thus contributes to oceanic studies, a field of study that asks how the seas and oceans have and continue to affect political narratives of exploration, cartography, international maritime law, identity, insularity, and

literary issues survival narratives fishing stories Divided into three sections *Negotiating Waters* explores the management the crossings and the re imaginings of the seas and oceans that played such an important role in the configuration of the colonial and postcolonial world and imagination In their careful considerations of how water figures prominently in maps travel journals diaries letters and literary narratives from the 17th century onwards the three thematic sections come together to shed light on how water in all of its shapes and forms has marked lands nations and identities They thus offer readers from different disciplines and with different colonial and postcolonial interests the possibility to investigate and discover new approaches to maritime spaces By advancing views on how seas and oceans exert power through representation *Negotiating Waters* engages in important critical work in an age of rising concern about maritime environments

This book examines the cultural impact, readership, and market position of literary fiction, challenging assumptions about its decline. The book uncovers the motivations behind readers' choices and how literary fiction shapes their understanding of the world. It also investigates the roles of publishers, booksellers, and literary prizes in the book market and how literary fiction engages with social and political issues.
