Toward Spatial Humanities Historical Gis And Spatial History The Spatial Humanities:

Toward Spatial Humanities Ian N. Gregory, Alistair Geddes, 2024-06-06 The application of Geographic Information Systems GIS to issues in history is among the most exciting developments in both digital and spatial humanities Describing a wide variety of applications the essays in this volume highlight the methodological and substantive implications of a spatial approach to history They illustrate how the use of GIS is changing our understanding of the geographies of the past and has become the basis for new ways to study history Contributors focus on current developments in the use of historical sources and explore the insights gained by applying GIS to develop historiography Toward Spatial Humanities is a compelling demonstration of how GIS can contribute to our historical understanding *The Spatial Humanities* David J. Bodenhamer, John Corrigan, Trevor M. Harris, 2010 Applying the analytical tools of GIS to new fields of research **The Routledge Companion to Spatial History** Ian Gregory, Don DeBats, Don Lafreniere, 2018-01-19 The Routledge Companion to Spatial History explores the full range of ways in which GIS can be used to study the past considering key questions such as what types of new knowledge can be developed solely as a consequence of using GIS and how effective GIS can be for different types of research Global in scope and covering a broad range of subjects the chapters in this volume discuss ways of turning sources into a GIS database methods of analysing these databases methods of visualising the results of the analyses and approaches to interpreting analyses and visualisations Chapter authors draw from a diverse collection of case studies from around the world covering topics from state power in imperial China to the urban property market in nineteenth century Rio de Janeiro health and society in twentieth century Britain and the demographic impact of the Second Battle of Ypres in 1915 Critically evaluating both the strengths and limitations of GIS and illustrated with over two hundred maps and figures this volume is an essential resource for all students and scholars interested in the use of GIS and spatial analysis as a method of historical research *A Guide to Spatial History* Konrad Lawson, Riccardo Bavaj, Bernhard Struck, 2022-01-07 This guide provides an overview of the thematic areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history Spatial history is not a field with clearly delineated boundaries For the most part it lacks a distinct unambiguous scholarly identity It can only be thought of in relation to other typically more established fields Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields Consequently it must be discussed in relation to a variety of historiographical contexts Each of these have their own intellectual genealogies institutional settings and conceptual path dependencies With this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical GIS research **Doing Spatial History** Riccardo Bavaj, Konrad Lawson, Bernhard Struck, 2021-12-30 This volume provides a practical introduction to spatial history through the lens of the different primary sources that historians use It is informed by a range of analytical

perspectives and conveys a sense of the various facets of spatial history in a tangible case study based manner The chapter authors hail from a variety of fields including early modern and modern history architectural history historical anthropology economic and social history as well as historical and human geography highlighting the way in which spatial history provides a common forum that facilitates discussion across disciplines The geographical scope of the volume takes readers on a journey through central western and east central Europe to Russia the Mediterranean the Ottoman Empire and East Asia as well as North and South America and New Zealand Divided into three parts the book covers particular types of sources different kinds of space and specific concepts tools and approaches offering the reader a thorough understanding of how sources can be used within spatial history specifically but also the different ways of looking at history more broadly Very much focusing on doing spatial history this is an accessible guide for both undergraduate and postgraduate students within modern history and its related fields Handbook of Digital Public History Serge Noiret, Mark Tebeau, Gerben

Zaagsma, 2022-04-04 This handbook provides a systematic overview of the present state of international research in digital public history Individual studies by internationally renowned public historians digital humanists and digital historians elucidate central issues in the field and present a critical account of the major public history accomplishments research activities and practices with the public and of their digital context The handbook applies an international and comparative approach looks at the historical development of the field focuses on technical background and the use of specific digital media and tools Furthermore the handbook analyzes connections with local communities and different publics worldwide when engaging in digital activities with the past indicating directions for future research and teaching activities

Researching urban space and the built environment Jasmine Kilburn-Toppin, Elaine Tierney, Charlotte Wildman, 2022-11-01 Researching urban space and the built environment is an accessible guide for historians keen to explore the spatial dimensions of the past Written in a clear and lively style it equips readers with the tools to effectively plan research and write innovative spatial histories By outlining and summarizing the theories and methodologies particularly pertinent to spatial research and by providing hands on advice on locating evidence and archives the book supports researchers in the development of their own original projects Through engagement with a rich array of primary evidence and useful historiographical case studies the guide opens up a huge variety of research possibilities This book is the ideal research companion for undergraduate and postgraduate students as well as independent researchers It is especially tailored for students in history and related disciplines in the humanities encountering spatial themes and methodologies for the first time **History by Numbers** Pat Hudson, Mina Ishizu, 2016-11-17 Fully updated and carefully revised this new 2nd edition of History by Numbers stands alone as the only textbook on quantitative methods suitable for students of history Even the numerically challenged will find inspiration Taking a problem solving approach and using authentic historical data it describes each method in turn including its origin purpose usefulness and associated pitfalls The problems are developed

gradually and with narrative skill allowing readers to experience the moment of discovery for each of the interpretative outcomes Quantitative methods are essential for the modern historian and this lively and accessible text will prove an invaluable guide for anyone entering the discipline

Moravian Soundscapes Sarah Justina Eyerly, 2020-05-05 In *Moravian Soundscapes* Sarah Eyerly contends that the study of sound is integral to understanding the interactions between German Moravian missionaries and Native communities in early Pennsylvania In the mid 18th century when the frontier between settler and Native communities was a shifting spatial and cultural borderland sound mattered People listened carefully to each other and the world around them In Moravian communities cultures of hearing and listening encompassed and also superseded musical traditions such as song and hymnody Complex biophonic geophonic and anthrophonic acoustic environments or soundscapes characterized daily life in Moravian settlements such as Bethlehem Nain Gnadenh tten and Friedensh tten Through detailed analyses and historically informed recreations of Moravian communal environmental and religious soundscapes and their attendant hymn traditions *Moravian Soundscapes* explores how sounds musical and nonmusical human and nonhuman shaped the Moravians religious culture Combined with access to an interactive website that immerses the reader in mid 18th century Pennsylvania and framed with an autobiographical narrative *Moravian Soundscapes* recovers the roles of sound and music in Moravian communities and provides a road map for similar studies of other places and religious traditions in the future

A History of Place in the Digital Age Stuart Dunn, 2019-02-13 *A History of Place in the Digital Age* explores the history and impact of Geographic Information Systems GIS and related digital mapping technologies in humanities research Providing a historical and methodological discussion of place in the most important primary materials which make up the human record including text and artefacts the book explains how these materials frame form and communicate location in the age of the internet This leads in to a discussion of how the World Wide Web distorts and skews place amplifying some voices and reducing others Drawing on several connected case studies from the early modern period to the present day the spatial writings of early modern antiquarians are explored as are the roots of approaches to place in archaeology and philosophy This forms the basis for a review of place online through the complex history of the invention of the internet in to the age of the interactive web and social media By doing so the book explores the key themes of spatial power and representation which these technologies frame *A History of Place in the Digital Age* will be of interest to scholars students and practitioners in a variety of humanities disciplines with an interest in understanding how technology can help them undertake research on spatial themes It will be of interest as primary work to historians of technology media and communications
