The Upside Of Down Catastrophe Creativity And The Renewal Of Civilization:

The Upside of Down Thomas Homer-Dixon, 2010-04-16 Environmental disasters Terrorist wars Energy scarcity Is this the world's fate a downward spiral that ultimately spells the collapse of society Perhaps says acclaimed author Thomas Homer Dixon or perhaps these crises can actually lead to renewal for ourselves and planet earth The Upside of Down takes the reader on a mind stretching tour of societies management or mismanagement of disasters over time From the demise of ancient Rome to contemporary climate change this spellbinding book analyzes what happens when multiple crises compound to cause what the author calls synchronous failure But crisis doesn't have to mean total calamity Through catagenesis or creative bold reform in the wake of breakdown it is possible to reinvent our future Drawing on the worlds of archeology poetry politics science and economics The Upside of Down is certain to provoke controversy and stir imaginations across the globe The author's wide ranging expertise makes his insights and proposals particularly acute as people of all nations try to grapple with how we can survive tomorrow's inevitable shocks to our global system There is no guarantee of success but there are ways to begin thinking about a better world and The Upside of Down is the ideal place to start thinking *The Upside of Down* Thomas F. Homer-Dixon, Thomas Homer-Dixon, 2007 Today's converging energy environmental economic political stresses could case a breakdown of national global order In this book Thomas Homer Dixon shows how to choose a better route into the future Drawing on an array of disciplines Homer Dixon's acute insights are imaginative controversial

The Little Big Number Dirk Philipsen, 2015-05-26 The story of GDP and why we need a better measurement of growth In one lifetime GDP or Gross Domestic Product has ballooned from a narrow economic tool into a global article of faith As The Little Big Number demonstrates this spells trouble While economies and cultures measure their performance by it GDP only measures output It ignores central facts such as quality costs or purpose Sustainability and quality of life are overlooked Losses don't count The world can no longer afford GDP rule GDP ignores real development Dirk Philipsen demonstrates how the history of GDP reveals unique opportunities to fashion smarter goals and measures The Little Big Number explores a possible roadmap for a future that advances quality of life rather than indiscriminate growth Children and their Urban Environment Claire Freeman, Paul Tranter, 2012-10-02 In our fast changing urban world the impacts of social and environmental change on children are often overlooked Children and their Urban Environment examines these impacts in detail looking at the key activities spaces and experiences children have and how these can be managed to ensure that children benefit from change The authors highlight the importance of planners architects and housing professionals in creating positive environments for children and involving them in the planning process They argue that children's lives are becoming simultaneously both richer and more deprived and that despite apparently increasing wealth disparities between children are increasing further Each chapter includes international examples of good practice and policy innovations for redressing the balance in favour of child supportive environments The book seeks to embrace childhood as a time of freedom

social engagement and environmental adventure and to encourage creation of environments that better meet the needs of children The authors argue that in doing so we will build more sustainable neighbourhoods cities and societies for the future

The Great Awakening Anna Grear,2020 As we enter a time of climate catastrophe worsening inequality and collapsing market state systems can human societies transcend the old dysfunctional paradigms and build the world anew There are many signs of hope In The Great Awakening twelve cutting edge activists scholars and change makers probe the deep roots of our current predicament while reflecting on the social DNA for a post capitalist future We learn about seed sharing in agriculture blockchain technologies for networked collaboration cosmological peer production of houses and vehicles creative hacks on law and new ways of thinking and enacting a rich collaborative future This surge of creativity is propelled by the social practices of commoning new modes of life for creating and sharing wealth in fair minded ecologically respectful ways It is clear that the multiple entangled crises produced by neoliberal capitalism cannot be resolved by existing political and legal institutions which are imploding under the weight of their own contradictions Present and future needs can be met by systems that go beyond the market and state With experiments and struggle a growing pluriverse of commoners from Europe and the US to the Global South and cyberspace are demonstrating some fundamentally new ways of thinking being and acting This ontological shift of perspective is making new worlds possible *Analyzing Collapse* Miroslav Bárta,2019-08-27

This book explores the long term trends in the development of what was the first complex civilization in history the Old Kingdom of Egypt c 2650 2200 BC the period that saw the construction of eternal monuments such as Djoser's Step Pyramid complex in Saqqara the pyramids of the great Fourth Dynasty kings in Giza and spectacular tombs of high officials throughout Egypt The present study aims to show that the historical trajectory of the period was marked by specific processes that characterize most of the world's civilizations the role of the ruling elite the growth of bureaucracy the proliferation of interest groups and adaptation to climate change to name but a few and the way that these processes held the germ of ultimate collapse The case is made that the rise and fall of the Old Kingdom state is of relevance to the study of the anatomy of development of any complex civilization *The Axial Age and Its Consequences* Robert N. Bellah,Hans Joas,2012-10-31 This book makes the bold claim that intellectual sophistication was born worldwide during the middle centuries of the first millennium bce From Axial Age thinkers we inherited a sense of the world as a place not just to experience but to investigate envision and alter A variety of utopian visions emerged and led to both reform and repression

Manufacturing Green Prosperity Jon Rynn,2010-07-12 This timely set of solutions based on a new theory of economics shows how America can reverse its inexorable economic decline and stop the bleeding of its middle class by rebuilding its manufacturing sector on a green basis Manufacturing Green Prosperity The Power to Rebuild the American Middle Class connects two critical issues the importance of manufacturing to the growth and fair distribution of national wealth and the need to create an environmentally sustainable society In so doing the book offers groundbreaking arguments demonstrating

the centrality of manufacturing and shows ways in which creating a green economy will rebuild U S manufacturing and expand the middle class Drawing from the fields of political science economics ecology history engineering and philosophy the author challenges existing myths about manufacturing exposes the weaknesses of neoclassical economics and proposes a production centered alternative America he persuasively argues needs a sophisticated green manufacturing base in order to create an entirely new transportation and energy infrastructure one that will make cities ecologically sustainable prevent the worst effects of global warming protect vulnerable ecosystems and counter the depletion of oil coal and other critical natural resources

Standards, Emergence, and Complex Outcomes D. Linda Garcia, 2025-07-16 Standards Emergence and Complex Outcomes redefines how we think about standards framing them as interfaces that govern interactions and connect causes to their effects Expanding beyond traditional technical and geopolitical discussions Garcia introduces a fresh theoretical perspective that positions standards as central to understanding complexity From food safety and workplace regulations to standardized parts in manufacturing and our reliance on technology standards shape nearly every aspect of modern life By proposing a multidimensional approach Garcia argues that standards are the mechanisms driving change complexity is the backdrop for this change emergence is the process by which change unfolds and evolution is its ultimate outcome Each chapter explores key elements of complexity theory and supports them with compelling historical and empirical examples providing a richly detailed narrative that deepens understanding This book is an essential resource for academics and students across the social sciences policymakers shaping standards dependent fields and professionals in industries where standards dictate progress Whether you re exploring the intersections of technology governance and complexity or looking to better navigate the systems shaping our world this book offers vital insights into the pivotal role of standards in our increasingly interconnected society

The City of Grace David Wadley, 2019-11-29 In this sweeping appraisal of the urban condition David Wadley argues that anything less than high level resolution in modelling the well being of inhabitants is wasting precious time Humanity is encountering rising entropy caused by unsustainable economic and demographic expansion Supported by a strong interdisciplinary backdrop featuring systems and crisis theories The City of Grace tackles these obstacles by picturing gracious function and graceful form in a human scale settlement In an attempt to salvage things lost in the teleology of urban development over the last 100 years the outlook is both heterodox and contrarian How long can we all go on in the present way In addressing grace a more elevated concept than those focusing previous urban analyses this manifesto aims not to placate or please but instead to get humanity to face the encompassing realities it tries so hard to forget
