Language and Space An International Handbook of Linguistic Variation seeks to take full account of these developments in a comprehensive theoretically rich way The introductory volume examines the concept of space and linguistic approaches to it the structure and dynamics of language spaces and relevant research methods A second volume offers the first thorough exploration of the interplay between linguistic investigation and cartography and subsequent volumes uniformly document the state of research into the spatial dimension of particular language groupings Key features comprehensive coverage of the field in terms of theory and methods the unique volume stands alone since it neither is a handbook of dialectology or of areal linguistics nor a handbook on language variation alone gathers together a great number of distinguished scholars and experts in the field *Humanitarianism from Below* Alejandro Olayo-Méndez, 2025-08-05

Challenges the definition of humanitarian aid Aside from being one of the most important migration corridors in the world Mexico is becoming an immigrant destination itself with more and more migrants deciding or needing to stay in the country after failing to enter the United States In the absence of state aid migrant shelters have emerged as an informal welfare system for migrants asylum seekers refugees and deportees in Mexico Largely run by faith based humanitarian organizations these shelters have grown significantly in recent years Humanitarianism from Below examines the significance of these casas de migrantes migrant shelters in the migration process in Mexico The book also reviews the role of faith based humanitarian organizations whose engagement with migrants is perceived more as charity work than professional humanitarian work The volume argues that faith based humanitarian organizations work challenges traditional understandings of what counts as humanitarian aid It makes the case that in order to understand the full ecology of migration we need to understand not only how large organizations like the Red Cross work but also how these smaller and local entities with fewer resources interact with migrants on their journeys Most migration research tends to focus on its impact within home countries or in destination contexts rarely focusing on the actual migration process including the interactions that influence the course of the migration journey itself In conducting this research Alejandro Olayo M ndez traveled along migrant routes several times in order to gain knowledge about how migrants move and how they interact with the migrant shelters He offers a detailed look at the experiences and challenges of casas de migrantes in Mexico situating these faith based shelters as an integral part of Mexico s humanitarian ecosystem *Iran and the International System* Anoushiravan Ehteshami, Reza Molavi, 2012-03-29
