War, Virtual War and Society, 2008-01-01 Rarely do academics and policymakers have the opportunity to sit down together and contemplate the broadest consequences of war Our comprehension has traditionally been limited to war's causes execution promotion opposition and immediate political and economic ends and aftermath But just as public health researchers are becoming aware of unexpected subtle and powerful consequences of human economic action we are beginning to realize that war has many short and long term consequences that we poorly understand but cannot afford to neglect These papers contribute to a growing discourse among academics scholars and lawmakers that is questioning and rethinking the nature and purpose of war By studying the effects of war on communities we can more readily understand and anticipate the consequences of present and future conflicts Such an understanding might well enable us to plan and execute military action with a more clearly defined set of post war goals in mind Whereas traditionally a government at war seeks the defeat of the adversary as its primary and often sole aim through a clearer understanding of war's effects other aims will also become prominent War like surgery could gradually become more refined could minimize damage in ways that are currently unimaginable and could involve an increasingly heavy responsibility to prepare for and facilitate reconstruction Projects such as this volume are of course only the beginning The more we understand the evolving nature of war the better prepared we will be to protect communities from its harmful effects

British Children's Literature and the First World War David Budgen, 2018-05-17 Perceptions of the Great War have changed significantly since its outbreak and children's authors have continually attempted to engage with those changes explaining and interpreting the events of 1914-18 for young readers British Children's Literature and the First World War

examines the role novels textbooks and story papers have played in shaping and reflecting understandings of the conflict throughout the 20th century David Budgen focuses on representations of the conflict since its onset in 1914 ending with the centenary commemorations of 2014 From the works of Percy F Westerman and Angela Brazil to more recent tales by Michael Morpurgo and Pat Mills Budgen traces developments of understanding and raises important questions about the presentation of history to the young He considers such issues as the motivations of children s authors and whether modern children s books about the past are necessarily more accurate than those written by their forebears Why for example do modern writers tend to ignore the global aspects of the First World War Did detailed narratives of battles written during the war really convey the truth of the conflict Most importantly he considers whether works aimed at children can ever achieve anything more than a partial and skewed response to such complex and tumultuous events *Book Bulletin* ,1919 **Bulletin of the Toronto Public Library** Toronto Public Library,1918
