Information Quality and Governance for Business Intelligence Yeoh, William, Talburt, John R., Zhou, Yinle, 2013-12-31 Business intelligence initiatives have been dominating the technology priority list of many organizations. However, the lack of effective information quality and governance strategies and policies has been meeting these initiatives with some challenges. *Information Quality and Governance for Business Intelligence* presents the latest exchange of academic research on all aspects of practicing and managing information using a multidisciplinary approach that examines its quality for organizational growth. This book is an essential reference tool for researchers, practitioners, and university students specializing in business intelligence, information quality, and information systems. *Security Management, Integrity, and Internal Control in Information Systems* Steve Furnell, Paul Dowland, Bhavani Thuraisingham, X. Sean Wang, 2006-06-03 This is the first joint working conference between the IFIP Working Groups 11.1 and 11.5. We hope this joint conference will promote collaboration among researchers who focus on the security management issues and those who are interested in integrity and control of information systems. Indeed, as management at any level may be increasingly held answerable for the reliable and secure operation of the information systems and services in their respective organizations in the same manner as they are for financial aspects of the enterprise, there is an increasing need for ensuring proper standards of integrity and control in information systems in order to ensure that data software and ultimately the business processes are complete, adequate, and valid for intended functionality and expectations of the owner, i.e., the user organization. As organizers, we would like to thank the members of the international program committee for their review work during the paper selection process. We would also like to thank the authors of the invited papers who added valuable contribution to this first joint working conference. Paul Dowland, X. Sean Wang, December 2005. Contents: Preface, vii. Session 1: Security Standards. Information Security Standards Adoption Drivers. Invited Paper 1: JEAN NOEL EZINGEARD AND DAVID BIRCHALL. Data Quality Dimensions for Information Systems Security: A Theoretical Exposition. Invited Paper 21: GURVIRENDER TEJAY GURPREET DHILLON AND AMITA GOYAL. CHIN From XML to RDF Syntax Semantics.
