If the engine has recently been running, the exhaust system will be hot. Before working on or near the exhaust system, allow sufficient time for the exhaust system to cool so touching any part of a hot exhaust system could cause burn injuries.

Before starting work, ensure the motorcycle is stabilized and adequately supported. This will help prevent it from falling and causing injury to the operator or damage to the motorcycle.

1. Raise and support the rear of the motorcycle under the frame or engine. Position a block to support the rear wheel.
2. Remove the rider's seat (see page 17-10).
3. Disconnect and remove the battery (see page 10-15).
