Urbanization And Development In Asia Multidimensional Perspectives:

Urbanization and Development in Asia Jo Beall,Basudeb Guha-Khasnobis,Ravi Kanbur,2012-08-02 Using case studies from seven Asian countries this volume examines why people move from rural to urban areas how globalization affects such movements and the synergies between globalization urbanization and migration **Urbanization and Party Survival in China** Xiaobing Li,Xiansheng Tian,2016-11-21 While the Chinese urban movement has successfully transferred surplus labor from the countryside to urban industries that urgently require free and cheap labor numerous problems have arisen as a result of the unprecedented huge scale process Such conditions such as overcrowding substandard housing lack of social services corruption and abuse of power have often reached crisis stage American college students often ask How does the government control the largest urban population in the world Why do newly developed highly commercialized cities continue to support the Chinese Communist Party CCP rather than challenging the old regime What happens when urban residents have problems with a party controlled government This book collects essays from the best scholars in their fields and examines urban issues including identifying residents concerns analyzing policy problems and providing some answers to these pivotal questions They address this important topic from a Chinese American perspective through a cooperative interdisciplinary research effort among Chinese American scholars interested in the subject Their scholarship makes a significant contribution through multi faceted components from different fields such as economics political science criminal justice law anthropology sociology and education The authors introduce and explore the theory and practice of policy patterns political systems and social institutions by identifying key issues in Chinese government and society contained within the larger framework of the international sphere Originally from Beijing Shanghai Xi an Tianjin and other cities in China these authors have received training and advanced degrees from American universities and colleges thus bringing uncommon perspective and conclusions by focusing on urban studies specific to China Their endeavors move beyond the existing scholarship and seek to spark new debates and proposed solutions while reflecting on established schools of history religion linguistics and gender studies Crucial to this volume is the assessment of historical and empirical data found in these essays that place major events in the context of Chinese tradition its culture and national security Using comprehensive coverage to create a broad and solid foundation of knowledge this collection presents a better understanding of the current Chinese metropolitan climate and includes legitimate issues with city policy implementation Digital Geographies—Theory, Space, and Communities Abdul Shaban,2025-01-02 This machine generated volume with chapter introductions by the human expert showcases how digital technologies are having deep transformative impacts on geographies and temporalities of social political economic and personal lives They are altering perceptions and physicality of space and time They are giving birth to digital communities and societies where distance remains of little significance Virtual spaces and ICT have disrupted state sovereignties often liquidating their physical national boundaries The rise of the digital

economy shows that new important raw materials for the future are information rather than coal oil and minerals Digitalisation is also leading to several contradictory processes of democratisation rising welfare of the citizens as well as surveillance peripheralisation and exclusion States are taking pride in digitalising their services to the citizens with massive consequences on the welfare of those facing digital divides As a departure to and in addition to the usual understanding of digitalisation society and space the present volume engages with some of the critical questions while reviewing existing literature What are the space relations of digital technologies What are the forms and consequences of changing physical space human relations to digital space human relations How is the sense of time and space changing with pervasive performatives of in real time and virtual realities or with perceptible or portable spaces In what ways does digitalisation relate to knowledge and power Why and how must we theorise the digitalisation led transformative processes of sociality materiality and their spatialities The book will be useful for teachers researchers and students engaged in this new area of digital geography especially in social science and its subfields of sociology economics political sciences anthropology psychology development studies policy studies social work urban studies and planning For the full picture the volume can be read in combination with its companion volume on Digital Geographies Urbanisation Economy and Modelling Social Inequality as a Global Challenge Medani P. Bhandari, Shvindina Hanna, 2022-09-01 This book discusses the factors behind the inequalities embedded within our social economic and political systems Social inequalities are especially seen in the service sectors in the differences of access to healthcare education social protection housing systems childcare elderly care etc Cultural inequality which segregates people from the mainstream based on recognition problems with a specific groups social status language religion customs and norms is another widespread issue This book tries to present an accurate picture of these issues with cases studies from various countries Mostly when we talk about inequality the focus is on economic inequality however much inequality persists especially discrimination due to gender age origin ethnicity disability sexual orientation class and religion To end this situation there is a need for social economic and political reform Until or unless the marginalized groups are empowered the inequality issue cannot be solved or even minimized On the basis of various case studies this book encourages us to rethink societal development through the lens of growing inequalities and disparities The book presents new insights for evaluating the progress on social development The book highlights the current challenges of social inequality In combination this collection of edited papers gives an integrated understanding of the question of why is society unequal This book is aimed at those stakeholders who want to make or contribute to change and build an undivided socially inclusive society and to those who want to contribute to empowering society in the Twenty First century

Function-Based Spatiality and the Development of Korean Communities in Japan David Rands, 2014-05-21

Function Based Spatiality and the Development of Korean Communities in Japan utilizes the theoretical model of complex adaptive systems and introduces the concept of function based spatiality to investigate the roles of the urban environments of

Tokyo and Osaka in the development of Korean communities in Japan Analysis of distinct Korean communities allows for the examination of urban factors of each city which contributed to the patterns of Korean immigration and community formation By utilizing a comparative narrative of the two cities distinctions between the organic growth of Osaka and the planned city of Tokyo are illuminated Additionally the discussion utilizes the concept of function based spatiality to show how each city interacted with its surrounding regional national and global spheres The functions of Tokyo as a gateway to Western modernization and center of the Japanese state shaped the interactions with Korean immigrants Likewise Osaka s functions as a center of mercantilism and second city played a large role in how Koreans were incorporated into the urban ethnoscape Taken together these two examples provide insight to the dynamics of urban systems on the development of immigrant communities

Reducing Inequalities Towards Sustainable Development Goals Medani P. Bhandari,2022-09-01 The Sustainable Development Goals SDGs are a set of global goals that meet some of the most pressing challenges facing our world today Goal 10 concerns reducing global inequalities Inequality is currently seen in the social political and economic structures of communities at both the national and international level The United Nation s approach to sustainable development is to create a set of goals and targets try to minimize the accelerating gaps of inequality The book presents new insights for evaluating the progress on SDGs especially goal 10 it also boldly sets new economic social and environmental targets for reducing inequality Using case studies this book encourages readers to view economic development through the lens of growing inequalities and disparities Such inequalities are clearly becoming more obvious as the world is better connected and information is quickly shared The books main aim is therefore to direct the efforts of scholars practitioners and policymakers to swiftly find the balance between the three pillars of sustainable development The main challenges and focus of each chapter are different and collectively they give an integrated understanding of the phenomenon of sustainable development and its diverse aspects This book will be useful for policymakers social and environmental activists agencies educators and practitioners in the sphere of social or environmental economics The methodology of the research can be replicated and taken forward by future researchers in the field

Inequality - the unbeatable challenge Medani P. Bhandari,Shvindina Hanna,2022-09-01 This edited book presents some unexplored issues of economic inequality including case studies of various countries Inequality is a chronic and divisive factor of society Inequality exists as an integral attribute of human development Communities nations and systems are not evolving at the same speed and rate and thus require different resources in different amounts However the distribution of winnings is also uneven due to the multidimensionality of influencing factors When we talk about inequality it is not just inequality of income or wealth it is first inequality in access to priorities and human needs to shelter to clean water air health care and also to appropriate vaccination systems and assistance security systems and safety guarantees for the future Past financial crises and the current pandemic shock has revealed bugs in the system shaking it and changing our perception of the norms We may have no doubts that inequality is an

unsolved problem but now we need to find out is it unbeatable There is still lack of knowledge around how inequality has been grounded throughout human civilization why society is stratified and classified economically politically socially and religiously and why the discrimination due to gender sexual orientation country of origin language differences immigration status caste race and ethnicity This book addresses these issues in a holistic way as well as including case studies of various countries It tries to find out why inequality has been unbeatable and what would be the best policies to overcome this challenge

How Ideas Shape Urban Political Development Richardson Dilworth, Timothy P. R. Weaver, 2020-06-12 A collection of international case studies that demonstrate the importance of ideas to urban political development Ideas interests and institutions are the holy trinity of the study of politics Of the three ideas are arguably the hardest with which to grapple and despite a generally broad agreement concerning their fundamental importance the most often neglected Nowhere is this more evident than in the study of urban politics and urban political development The essays in How Ideas Shape Urban Political Development argue that ideas have been the real drivers behind urban political development and offer as evidence national and international examples some unique to specific cities regions and countries and some of global impact Within the United States contributors examine the idea of blight and how it became a powerful metaphor in city planning the identification of racially defined spaces especially black cities and city neighborhoods as specific targets of neoliberal disciplinary practices the paradox of members of Congress who were active supporters of civil rights legislation in the 1950s and 1960s but enjoyed the support of big city political machines that were hardly liberal when it came to questions of race in their home districts and the intersection of national education policy local school politics and the politics of immigration Essays compare the ways in which national urban policies have taken different shapes in countries similar to the United States namely Canada and the United Kingdom The volume also presents case studies of city based political development in Chile China India and Africa areas of the world that have experienced a more recent form of urbanization that feature deep and intimate ties and similarities to urban political development in the Global North but which have occurred on a broader scale Contributors Daniel B. From Land Disputes to Sustainable Environmental Development Ozay Mehmet, Vedat Yorucu, 2024-04-20 This book is written to transform land disputes toward win win outcomes utilizing the latest sustainable development theory Land has always been a source of conflict a contest of competing homelands and ideologies but it can also act as an agency of peace making promoting economic and social development This dualism will be the theme of this book as there is a dearth of studies exclusively focused on land The book's coverage is comprehensive examining land and property disputes with case studies in modern times along with a problem solving approach utilizing such economic theorems as Location and Growth Poles theories The

UN's Sustainable Development Goals will be used as our overarching framework. The overall aim of the book is to transform land disputes toward win-win outcomes utilizing latest sustainable development theory. *World Economic and Social Survey 2013* United Nations, Department of Economic and Social Affairs, 2013. This volume contributes to the deliberations on addressing sustainable development challenges with a focus on three important cross-sectoral issues identified for action and follow-up at the 2012 United Nations Conference on Sustainable Development: sustainable cities, food security, and energy transformation. page four of cover
