Us Patrol Torpedo Boats World War II New Vanguard:

US Patrol Torpedo Boats Gordon L. Rottman, 2011-03-15 Motor torpedo boat development began in the early 1900s and the vessels first saw service during World War I However it was not until the late 1930s that the US Navy commenced the development of the Patrol Torpedo or PT boat The PT boat was designed for attacking larger warships with torpedoes using its stealth ability high speed and small size to launch and survive these attacks although they were employed in a wide variety of other missions including rescuing General MacArthur and his entourage from the Philippines This book examines the design and development of these unique craft very few of which survive today and goes on to examine their role and combat deployment in World War II

US Marine Corps Tanks of World War II Steven J. Zaloga, 2012-01-20 During World War II the US Marine Corps formed six tank battalions that battled through the harsh conditions of the Pacific Theatre Using the same basic tanks as the US Army notably the M3 and M5A1 light tanks and the M4 Sherman medium tank the marines made both technical and tactical innovations to make them more effective in the fight against the Japanese Deep wading equipment flamethrower tanks and even wooden armor all became part of the Marine arsenal This book examines the tactics and technology that made the US Marine Corps tank service unique in the annals of warfare

Ships of the American Revolutionary Navy Mark Lardas, 2012-01-20 Mark Lardas explores the origins of American warships primarily light and medium frigates built for the Continental Navy during the years 1776-1783 This was the first navy of the United States and much of the fleet was comprised of ships that had been modified from existing vessels converted into warships to provide a crucial service during the American Revolutionary War Despite having no real funding this unique fleet had a surprising amount of success against the might of the Royal Navy and this title discusses the strengths and weaknesses of each design and the differences between European and American warships of the time With a close look at how these ships performed in key battles as well as the exploits of John Paul Jones the founding father of the United States Navy this is a complete illustrated overview of the ships service and development until France's entry into the war and the subsequent decline in importance of the Continental Navy

U-boats of the Kaiser's Navy Gordon Williamson, 2012-03-20 As was the case in World War II one of the greatest threats to Britain during World War I was the German U boat menace This book traces the development of the U boat threat from the Brandtaucher designed by Wilhelm Bauer the father of the German submarine arm in 1850 through to the commissioning of Germany's first U boat to go into service the U 1 in 1906 It then covers the main types of World War I U boat detailing the operational history of the U boat service in depth with a particular focus on the campaigns in the Atlantic and Mediterranean as well as the slow build up of anti submarine measures by the allies

US Navy Aircraft Carriers 1942-45 Mark Stille, 2012-05-20 Aircraft carriers were the US Navy's principal weapon against Japan during the Pacific War Development of the Essex class began in 1939 becoming the largest class of carrier ever to be built Early in the Pacific War it became renowned for its Sunday Punch of 36 fighter planes 36 dive bombers and 18 torpedo

planes Alongside the lighter Independence class these carriers formed the formidable Fast Carrier Force in the Pacific Featuring artwork detailing the interior and exterior features of the ships this book explores their design development and the action they saw in the Pacific including the climactic battles of Philippine Sea Leyte Gulf and Okinawa War Elephants Konstantin Nossov,2012-04-20 Elephants have been deployed as weapons for centuries particularly in South and South East Asia where war elephants constituted the bulk of most armies in the region from antiquity right up to the 19th century This book offers an insight into the incredible history of these living tanks focusing on the design of the equipment and armament that made them so terrifying The author Konstantin S Nossov traces the history of war elephants from their deployment against Alexander the Great s army at the battle of Gaugamela through to their use in the 19th century by the armies of South East Asia analyzing the battle formation and tactics of war elephants in action and how these tactics developed

British Mark I Tank 1916 David Fletcher,2012-05-20 In 1915 a machine christened Little Willie changed the way that wars were fought Little Willie was a fully tracked armoured vehicle that could break a trench system Its development was completed in December 1915 but by then it had already been superseded by an improved design Mother This was the first rhomboid tank and the prototype for the Mark 1 which would influence a whole generation of tank building This book details the development of the Mark I and its surprise arrival in France in the middle of 1916 during the closing weeks of the battles of the Somme US Nuclear Submarines Jim Christley,2012-01-20 The adoption of nuclear power revolutionized submarine design Vessels can stay underwater for months trailing the enemy or training weapons on land targets from secret positions always there never seen Jim Christley a former submariner explores here the influence of Admiral Hyman Rickover in cautiously introducing these stealthy machines of war and frankly discusses the power and perils of using nuclear reactors at sea Using unique and detailed artwork he outlines the many evolving aspects of design within the submarine classes from the very first nuclear submarine USS Nautilus to the classes under construction even now **Cromwell Cruiser Tank**

1942-50 David Fletcher,Richard C Harley,2012-05-20 For most of World War II British tank development remained faithful to the design philosophy inaugurated during World War I Experiences in North Africa highlighted flaws in this basic design however and the General Staff identified the need for a new heavy cruiser that could combine speed and manoeuvrability with increased armour and armament The Cromwell Cruiser tank was designed as a result and soon proved itself one of the fastest and most successful tanks deployed by the Allies during World War II This book details the design and development of the Cromwell and its many variants from its introduction at D Day through its many successes in the final year of World War II and beyond **Modern Israeli Tanks and Infantry Carriers 1985-2004** Marsh Gelbart,2012-05-20 Over the last two decades the Israel Defence Force IDF has introduced a variety of new AFVs Old models such as the M48 and M60 have been improved beyond recognition in the form of the Magach 7 The performance of Israel s indigenous Merkava tank has been similarly enhanced with new variants and the new Merkava 4 MBT has recently entered service Israeli infantry have also

received machines such as the Achzarit assault carrier the Puma combat engineer vehicle and the Nagmachon and Nakpadon tank based carriers intended for low intensity conflicts This book examines the design modification and combat history of these formidable fighting machines
