Jefferson and the Iconography of Romanticism M. Kelsall, 1999-05-17 Jefferson and the Iconography of Romanticism is the first full length study to examine how Jefferson in the process of inventing the USA as the first new nation of the Romantic era sought to find an appropriate imagery to represent the people their homeland and the cultural ideal to which they should aspire It examines in detail the role of his villa at Monticello in embodying the national ideal shows how those ideals emerged and how they were subsequently challenged by the reinterpretation of Jefferson's iconography

The Geographic Revolution in Early America Martin Brückner, 2012-12-01 The rapid rise in popularity of maps and geography handbooks in the eighteenth century ushered in a new geographic literacy among nonelite Americans In a pathbreaking and richly illustrated examination of this transformation Martin Brückner argues that geographic literacy as it was played out in

popular literary genres written for example by William Byrd George Washington Thomas Jefferson Royall Tyler Charles Brockden Brown Meriwether Lewis and William Clark significantly influenced the formation of identity in America from the 1680s to the 1820s Drawing on historical geography cartography literary history and material culture Br ckner recovers a vibrant culture of geography consisting of property plats and surveying manuals decorative wall maps and school geographies the nation s first atlases and sentimental objects such as needlework samplers By showing how this geographic revolution affected the production of literature Br ckner demonstrates that the internalization of geography as a kind of language helped shape the literary construction of the modern American subject Empirically rich and provocative in its readings *The Geographic Revolution in Early America* proposes a new geographical basis for Anglo Americans understanding of their character and its expression in pedagogical and literary terms Language Anxiety Tim William Machan,2009-01-29 This engaging and wide ranging history of language anxiety ranges from the Tower of Babel to the internet It shows how worry about language results from and causes linguistic change as well as fuelling perennial concerns about class culture identity and social change *Print Technology in Scotland and America, 1740-1800* Louis Kirk McAuley,2013-11-07 In *Print Technology in Scotland and America* Louis Kirk McAuley investigates the mediation of popular political culture in Scotland and America from the transatlantic religious revivals known as the Great Awakening to the U S presidential election of 1800 By focusing on Scotland and America and in particular the tension between unity and fragmentation that characterizes eighteenth century Scottish and American literature and culture *Print Technology* aims to increase our understanding of how tensions within these corresponding political and cultural arenas altered the meaning of print as an instrument of empire and nation building McAuley reveals how seemingly disparate events including journalism and literary forgery were instrumental and innovative deployments of print not as a liberation technology as Habermas s analysis of print s structural transformation of the public sphere suggests but as a mediator of political tensions **Communication in History** David Crowley,Paul Heyer,2015-09-30 Updated in a new 6th edition *Communication in History* reveals how media has been influential in both maintaining social order and as powerful agents of change With revised new readings this anthology continues to be as one reviewer wrote the only book in the sea of History of Mass Communication books that introduces readers to a more expansive intellectually enlivening study of the relationship between human history and communication history From print to the Internet this book encompasses a wide range of topics that introduces readers to a more expansive intellectually enlivening study of the relationship between human history and communication history **English in the Middle Ages** Tim William Machan,2003-06-05 Professor Machan explores for the first time fully a new dimension in the understanding of the role of the English language in medieval England He is rigorous and sceptical in his examination of assumptions that have come to be too easily accepted about the rise of standard English about linguistic nationalism about the role of Lollardy in fostering the vernacular about the intrinsic funniness of regional dialects He uses literary texts well and offers from his particular

linguistic vantage point new and compelling interpretations of the dialect northernisms in Chaucer's Reeve's Tale and of the subtleties of the sociolect of courtly love conversation in Sir Gawain and the Green Knight Derek Pearsall Harvard University

What did people in England in the Middle Ages think about language What was their view of English French and Latin and how did this influence the way they communicated This book uses these questions as a basis for a ground breaking investigation into the use and status of the English language in medieval England Professor Machan suggests that many linguistic literary and historical considerations of medieval statements on language have significantly failed to take into account the social and linguistic contexts of their production In this volume he explores not only medieval ideas about language but also the discursive traditions which generated them English in the Middle Ages draws upon a wide range of documentary evidence including most notably the royal letters issued in 1258 prior to the Barons War The author also analyses the language spoken by Chaucer's pilgrims the conversations in Sir Gawain and the Green Knight and many other chronicles poems and commentaries The book concludes with a consideration of the post medieval history of the status of English in law literature and education The book will interest scholars from a range of disciplines particularly linguistics literature and history and is written in clear non technical language
