Modern General Topology J.-I. Nagata, 1985-11-01 This classic work has been fundamentally revised to take account of recent developments in general topology The first three chapters remain unchanged except for numerous minor corrections and additional exercises but chapters IV VII and the new chapter VIII cover the rapid changes that have occurred since 1968 when the first edition appeared The reader will find many new topics in chapters IV VIII e g theory of Wallmann Shanin's compactification realcompact space various generalizations of paracompactness generalized metric spaces Dugundji type extension theory linearly ordered topological space theory of cardinal functions dyadic space etc that were in the author's opinion mostly special or isolated topics some twenty years ago but now settle down into the mainstream of general topology
