Cities and Urban Cultures Deborah Stevenson, 2003-04-16 What is distinctive about urban life What key trends have shaped the contemporary city How have the city and urban cultures been explained by sociology and cultural studies This is the first book to explore cities and urban life from the perspectives of both sociology and cultural theory Through an interdisciplinary approach and use of case material the book demonstrates that the real city of physicality and struggle and the imagined city of representations are entwined in the construction of urban cultures Starting with a comparison of the rural and the urban the book considers ways of imagining the city and of conceptualising urban cultures It goes on to investigate the implications of several pivotal urban and cultural trends such as the use of the arts and local cultures in city re imaging and the ways in which modernism postmodernism and globalisation have shaped the built environment and the orientation of academic enquiry Also examined is the way in which representations of the urban landscape in film literature art and popular texts have informed dominant ideas about the way certain city spaces including city centres urban waterfronts and so called global cities should look function and feel Designed as a text for undergraduate courses in cultural studies sociology and wider social science this book traces the development of urban environments from the nineteenth century to the present and illuminates the nature of urban life

Urban Space in the Middle Ages and the Early Modern Age Albrecht Classen, 2009-12-15 Although the city as a central entity did not simply disappear with the Fall of the Roman Empire the development of urban space at least since the twelfth century played a

major role in the history of medieval and early modern mentality within a social economic and religious framework Whereas some poets projected urban space as a new utopia others simply reflected the new significance of the urban environment as a stage where their characters operate very successfully As today the premodern city was the locus where different social groups and classes got together sometimes peacefully sometimes in hostile terms The historical development of the relationship between Christians and Jews for instance was deeply determined by the living conditions within a city By the late Middle Ages nobility and bourgeoisie began to intermingle within the urban space which set the stage for dramatic and far reaching changes in the social and economic make up of society Legal historical aspects also find as much consideration as practical questions concerning water supply and sewer systems Moreover the early modern city within the Ottoman and Middle Eastern world likewise finds consideration Finally as some contributors observe the urban space provided considerable opportunities for women to carve out a niche for themselves in economic terms
