Us Submarines 1941-45 New Vanguard:

US Submarines 1941-45 Jim Christley, 2012-02-20 Naval warfare in the Pacific changed completely with the Japanese attack on Pearl Harbor in 1941. The strategic emphasis shifted from battleships to much more lethal far ranging weapons systems. One of these was the submarine. This book details the design and development, classes, weapons and equipment, tactics and operational history of the US submarine in World War II. Detailed tables, photographs and superb color plates depict the force that had an effect far beyond its size: the submarine accounted for 55% of all Japanese shipping losses despite suffering the highest percentage loss of any unit of the United States Armed Forces in World War II. **Imperial**

Japanese Navy Submarines 1941-45 Mark Stille, 2012-06-20 During World War II the Imperial Japanese Navy was at the forefront of submarine technology. It fielded the largest pre nuclear submarines in the world, some capable of carrying floatplane bombers which operated alongside fast combat vessels and midget submarines, all equipped with the best torpedoes available. The Japanese submarine fleet should have been an awe inspiring force but despite playing a crucial scouting role and enjoying several notable successes it was surprisingly ineffective. Alongside unique color plates Mark Stille describes the astounding technical advances of this range of vessels and the wartime tactics responsible for their failure.

US Nuclear Submarines Jim Christley, 2012-01-20 The adoption of nuclear power revolutionized submarine design and means that vessels can stay underwater for months trailing the enemy or training weapons on land targets from secret positions always there never seen. Jim Christley, a former submariner, explores here the influence of Admiral Hyman Rickover in cautiously introducing these stealthy machines of war and frankly discusses the power and perils of using nuclear reactors at sea. Using unique and detailed artwork he outlines the many evolving aspects of design within the submarine classes from the very first nuclear submarine, USS Nautilus, to the classes under construction even now. **Imperial Japanese Navy**

Battleships 1941-45 Mark Stille, 2012-05-20 The Imperial Japanese Navy of World War II surpassed the Allied and Axis fleets in innovation and technology. This title covers the 12 Japanese battleships that saw service between 1941 and 1945, including the mighty Yamato. Each class is considered in light of its design and construction, its armament and wartime modifications. The author, Mark Stille, uses primary sources and dramatic photographs to tell the story of these mighty battleships at war, including their major engagements during the raid at Pearl Harbor and the battle of Midway. The first English language book to include photographs from the prestigious Fukui Collection, this investigation will fascinate any naval enthusiast. **Imperial Japanese Navy Light Cruisers 1941-45** Mark Stille, 2012-02-20 The Imperial Japanese Navy

went to war with 17 light cruisers and another three cruiser sized training ships. Of these most were 5,500 ton ships designed to act as destroyer squadron flagships. This made them much different in capabilities and mission from their American counterparts. During the war the Japanese built another five light cruisers, all but one of which maintained the design premise of being able to serve as destroyer squadron flagships. During the war Japanese light cruisers were active throughout the

Pacific performing many missions in addition to their flagship duties Mark Stille continues Osprey's coverage of the IJN of WWII with this concise and complete study of all 25 ships from their design and development to their ultimate fates Detailed Osprey artwork and rare period photographs from the Fukui collection held in Kure Japan illustrate this discussion **US Navy Aircraft Carriers 1942-45** Mark Stille, 2012-05-20 Aircraft carriers were the US Navy's principal weapon against Japan during the Pacific War Development of the Essex class began in 1939 becoming the largest class of carrier ever to be built Early in the Pacific War it became renowned for its Sunday Punch of 36 fighter planes 36 dive bombers and 18 torpedo planes Alongside the lighter Independence class these carriers formed the formidable Fast Carrier Force in the Pacific Featuring artwork detailing the interior and exterior features of the ships this book explores their design development and the action they saw in the Pacific including the climactic battles of Philippine Sea Leyte Gulf and Okinawa Imperial

Japanese Navy Heavy Cruisers 1941-45 Mark Stille, 2012-05-20 Designed with little more than a passing nod to the international naval treaties of the inter war period the Imperial Japanese Navy's heavy cruisers were fast and heavily armed Like the other vessels of the Japanese Navy the heavy cruisers were technologically superior to and far more innovative than their Allied rivals whom they met in many of the major Pacific Theatre battles including Midway and Leyte Gulf Mark Stille continues his study of the IJN of WWII with this fascinating topic addressing the design and development of all 18 ships in the six heavy cruiser classes from pre war construction and mid war alterations to their operational histories and eventual fates *U-boats of the Kaiser's Navy* Gordon Williamson, 2012-03-20 As was the case in World War II one of the greatest threats to Britain during World War I was the German U boat menace This book traces the development of the U boat threat from the Brandtaucher designed by Wilhelm Bauer the father of the German submarine arm in 1850 through to the commissioning of Germany's first U boat to go into service the U 1 in 1906 It then covers the main types of World War I U boat detailing the operational history of the U boat service in depth with a particular focus on the campaigns in the Atlantic and Mediterranean as well as the slow build up of anti submarine measures by the allies **Kriegsmarine U-boats**

1939-45 (1) Gordon Williamson, 2012-04-20 This the first of two volumes on Germany's World War II U boats traces their development from the early U boats of the Kaiser's Navy the prohibition on Germany having U boats following the Armistice in 1918 and the subsequent Treaty of Versailles the secret development of U boats using a cover firm in Holland culminating in the formation of the 1st U boat Flotilla in 1935 with the modern Type II The operational history section includes examples from the Classes Type VIIA Type VIIB VIID VIIE and VIIF before concentrating on the mainstay of the U boat arm the Type VIIC Comparisons are also made with the standard allied submarines their strengths weaknesses and U boat tactics

Modern Israeli Tanks and Infantry Carriers 1985-2004 Marsh Gelbart, 2012-05-20 Over the last two decades of the 20th century the Israel Defence Force IDF introduced a variety of new AFVs Old models such as the M48 and M60 were improved beyond recognition in the form of the Magach 7 The performance of Israel's indigenous Merkava tank was similarly enhanced

with new variants and the new Merkava 4 MBT entered service Israeli infantry also received machines such as the Achzarit assault carrier the Puma combat engineer vehicle and the Nagmachon and Nakpadon tank based carriers intended for low intensity conflicts Featuring illustrations this book examines the design modification and combat history of these formidable fighting machines
