The Politics of Consumer Credit in the UK, 1938-1992 Stuart Aveyard, Paul Corthorn, Sean O'Connell, 2018-08-30 As early as the 1930s Britain had a highly innovative and profitable

mortgage sector that promoted a major extension in home ownership. These controversial and risky offerings had an equivalent in numerous hire purchase agreements with which new homes were furnished. Such developments were forerunners of the easy credit regime more commonly associated with the 1980s. Taking a long term perspective on this issue indicates that Britain's departure from European models of consumer credit markets was not simply a by-product of neoliberalism's influence on the Thatcher administration and this book offers a much fuller explanation to the phenomenon. It explores debates within and between the major political parties, reveals the infighting amongst civil service departments over management of consumer demand, charts the varying degrees of influence wielded by the Bank of England and finance capital as opposed to that of consumer durable manufacturers, reviews the perspectives of consumers and their representatives and explains the role of contingency and path dependency in these historical events. The central focus of this book is on consumer credit but this subject provides a case study through which to explore numerous other important areas of British history. These include debates on the issues of post war consensus, the impact of rising home ownership and its impact on consumer credit and personal finance markets, the management of consumer society, political responses to affluence, the development of consumer protection policy and the influence of neoliberalism.

Changing Inequalities and Societal Impacts in Rich Countries Brian Nolan, 2014. This book addresses key questions about whether inequality in incomes, wealth and education have been widening in a consistent fashion across 30 rich nations and whether this is exacerbating social problems and undermining the healthy functioning of democratic processes.

Housing Careers, Intergenerational Support and Family Relations Christian Lennartz, Richard Ronald, 2020-06-09. In this comprehensive volume authors from across the social sciences explore how housing wealth transfers have impacted the integration of families, society and the economy with a focus on the re-negotiation of the generational contract. While housing has always been central to the realization and reproduction of families, more recently the mutual embedding of home and family has become more obvious as realignments in housing markets, employment and welfare states have worked together to undermine housing access for new households, enhancing intergenerational interdependencies. More families have thus become involved in smoothening the routes of younger adult members into and up the housing ladder. While intergenerational support appears to have become much more widespread, it remains highly differentiated across countries, cities and regions as well as uneven between social and income classes. This book addresses the increasing role that family support and intergenerational transfers, in particular, are playing in sustaining the formation of new households and the transition of young adults towards social and economic autonomy. The authors draw on diverse international cases and a variety of methodologies in order to advance our understanding of housing as a key driver of contemporary social relations and inequalities. Hand, 2014-07-14 What is national wellbeing and what is progress Why measure these definitions Why are measures beyond economic performance needed and how will they be used How do we measure national wellbeing turn the definitions into observable quantities Where are we now and where to next These questions are asked and answered in this much needed timely book The Wellbeing of Nations provides an accessible and comprehensive overview of the measurement of national well being examining whether national wellbeing is more than the sum of the wellbeing of everyone in the country and identifying and reviewing requirements for new measures It begins with definitions describes how to operationalize those definitions and takes a critical look at the uses to which such measures are to be put The authors examine initiatives from around the world using the UK measuring national wellbeing programme as a case study throughout the book along with case studies drawn from other countries as well as discussion of the position in some countries not yet drawn into the national wellbeing scene
