Accelerate! James Brooke-Smith, 2022-09-29 The 1990s was the decade in which the Soviet Union collapsed and Francis Fukuyama declared the end of history Nelson Mandela was released from prison Google was launched and scientists in Edinburgh cloned a sheep from a single cell It was also a time in which the president of the United States discussed fellatio on network television and the world's most photographed woman died in a car crash in Paris Radical pop band The KLF burned a million quid on a Scottish island while the most watched programme on TV was Baywatch Anti globalisation protestors in France attacked McDonald's restaurants and American survivalists stockpiled guns and tinned food in preparation for Y2K For those who lived through it the 1990s glow in the memory with a mixture of proximity and distance familiarity and strangeness It is the decade about which we know so much yet understand too little Taking a kaleidoscopic view of the politics social history arts and popular culture of the era James Brooke Smith asks what was the 1990s A lost golden age of liberal optimism A time of fin de siècle decadence Or the seedbed for the discontents we face today

Abstractions and Embodiments Janet Abbate, Stephanie Dick, 2022-08-30 Cutting edge historians explore ideas communities and technologies around modern computing to explore how computers mediate social relations Computers have been framed both as a mirror for the human mind and as an irreducible other that humanness is defined against depending on different historical definitions of humanness They can serve both liberation and control because some people's freedom has historically been predicated on controlling others Historians of computing return again and again to these contradictions as they often reveal deeper structures Using twin frameworks of abstraction and embodiment a reformulation of the old mind/body dichotomy this anthology examines how social relations are enacted in and through computing The authors examining Abstraction revisit central concepts in computing including algorithm program clone and risk In doing so they demonstrate how the meanings of these terms reflect power relations and social identities The section on Embodiments focuses on sensory aspects of using computers as well as the ways in which gender race and other identities have shaped the opportunities and embodied experiences of computer workers and users Offering a rich and diverse set of studies in new areas the book explores such disparate themes as disability the influence of the punk movement working mothers as technical innovators and gaming behind the Iron Curtain Abstractions and Embodiments reimagines computing history by questioning canonical interpretations foregrounding new actors and contexts and highlighting neglected aspects of computing as an embodied experience It makes the profound case that both technology and the body are culturally shaped and that there can be no clear distinction between social intellectual and technical aspects of computing Contributors Janet

Upstream Dan Heath, 2020-03-03 Wall Street Journal Bestseller New York Times bestselling author Dan Heath explores how to prevent problems before they happen drawing on insights from hundreds of interviews with unconventional problem solvers So often in life we get stuck in a cycle of response We put out fires We deal with emergencies We stay downstream handling one problem after another but we never make our way upstream to fix the systems that caused the problems Cops chase robbers doctors treat patients with chronic illnesses and call center reps address customer complaints But many crimes chronic illnesses and customer complaints are preventable So why do our efforts skew so heavily toward reaction rather than prevention Upstream probes the psychological forces that push us downstream including problem blindness which can leave us oblivious to serious problems in our midst And Heath introduces us to the thinkers who have overcome these obstacles and scored massive victories by switching to an upstream mindset One online travel website prevented twenty million customer service calls every year by making some simple tweaks to its booking system A major urban school district cut its dropout rate in half after it figured out that it could predict which students would drop out as early as the ninth grade A European nation almost eliminated teenage alcohol and drug abuse by deliberately changing the nation's culture And one EMS system accelerated the emergency response time of its ambulances by using data to predict where 911 calls would emerge and forward deploying its ambulances to stand by in those areas Upstream delivers practical solutions for preventing problems rather than reacting to them How many problems in our lives and in society are we tolerating simply because we've forgotten that we can fix them

The Long Descent John Michael Greer, 2008-09-01 The author of Dark Age America shares a harrowing vision of the future and what you can do to take action and make change Americans are expressing deep concern about US dependence on petroleum rising energy prices and the threat of climate change Unlike the energy crisis of the 1970s however there is a lurking fear that now the times are different and the crisis may not easily be resolved The Long Descent examines the basis of such fear through three core themes Industrial society is following the same well worn path that has led other civilizations into decline a path involving a much slower and more complex transformation than the sudden catastrophes imagined by so many social critics today The roots of the crisis lie in the cultural stories that shape the way we understand the world Since problems cannot be solved with the same thinking that created them these ways of thinking need to be replaced with others better suited to the needs of our time It is too late for massive programs for top down change the change must come from individuals Hope exists in actions that range from taking up a handicraft or adopting an obsolete technology through planting an organic vegetable garden taking charge of your own health care or spirituality and building community Focusing eloquently on constructive adaptation to massive change this

book will have wide appeal Praise for The Long Descent At once erudite and entertaining Greer's exploration of the dynamics of societal collapse couldn't be more timely Richard Heinberg Senior Fellow Post Carbon Institute and author of The Party's Over and Peak Everything Candidates for public office and the voters who elect them should be required to read Greer's accurate diagnosis of the terminal illness our fossil energy subsidized industrial civilization has too long denied He shows how stubborn belief in perpetual progress blinded us to the abyss toward which we were speeding and thus impeded wise preparation for our unavoidable descent into a deindustrial age We must hope that the array of mitigating tools he prescribes may yet render that descent down the back side of Hubbert's peak less devastating than it will be if we insistently claim a right to be prodigal in using this finite Earth Willam R Catton Jr author of Overshoot The Ecological Basis of Revolutionary Change Internet Babylon Greg Holden, 2013-11-09 This book looks at the Internet from a sordid and entertaining perspective The line between truth and fiction is blurred on the net just as it is in Hollywood and so are the scandals involving well known movie and TV personalities politicians and the Internet's own brand of celebrities The battle between illusion and reality is every bit as intense on the Internet as on the celluloid screen Going beyond sites that glorify the seamier side to life Internet Babylon is a guide to the unique sites that appeal to selective sensibilities Internet Babylon gives you the ability to live vicariously through and be a participant in extraordinary even strange goings on that you might never otherwise encounter in your day to day life You'll not only find entertaining and titillating stories that define the rough and wild side of a major force in society that's still developing but you'll also discover the tools you need to be on top of breaking stories and find the news that's not fit to print

Eventually, you will extremely discover a extra experience and attainment by spending more cash. nevertheless when? get you consent that you require to get those all needs later having significantly cash? Why dont you attempt to get something basic in the beginning?
