

Rubric: Understanding Weather

Criteria for assessment	Evidence of levels of performance		
Mathematics Ability to create graphs and data tables.	Constructs graphs and tables with assistance, or constructs graphs and tables with minimal or inaccurate labelling.	Creates all the nominated types of graphs and tables, provides labels and enters data accurately.	Creates all the nominated types of graphs and tables, labels all aspects neatly and accurately and enters data accurately and clearly.
Knowledge / understanding of how to read graphs / data tables.	Requires assistance to use the data in order to provide answers to the questions.	Provides accurate answers to most of the questions.	Provides accurate answers to all of the questions and justifies answers by referring to data in the relevant graph/table.
Ability to calculate averages and ranges.	Has some difficulty calculating averages and ranges for each city. Has shown limited or no working out.	Has accurately calculated most averages and ranges for each city and has justified answers by showing most working out.	Has accurately calculated all averages and ranges for each city and has justified answers by showing all working out.
Thinking Processes Ability to use appropriate strategies of reasoning and/or thinking tools to analyse.	Explains one possible reason for the difference in temperature from city to city. With assistance, analyses the range of temperatures in a city.	Provides several satisfactory reasons for differences in temperature from city to city and analyses the range of temperatures in a city, referring to most of the listed factors. Demonstrates effective use of a thinking tool or strategy.	Explains in accurate detail a number of factors affecting temperature and effectively analyses the range of temperatures in a city with reference to all of the listed factors. Makes connections with the collected data. Demonstrates effective use of a thinking tool or strategy.
Ability to analyse collected data in order to make and explain predictions.	Makes predictions but does not use the collected data as the basis of those predictions.	Uses the collected data appropriately to predict likely maximum and minimum temperatures for the given cities. Explains the predictions.	Uses the collected data accurately and appropriately to predict likely maximum and minimum temperatures for the given cities. Provides detailed explanations for each of the predictions.

Weather And Climate Project Rubric:

Adventures in Authentic Learning Kristin Harrington, 2020-12-08 This insider's guide from a seasoned technology coach provides classroom teachers with ideas and strategies to help students develop real world projects to support authentic learning. Not every teacher has a dedicated coach who can support them in the classroom. Even those who do can benefit from additional ideas and support from a seasoned coach. Written by an experienced instructional technologist, this book is designed to help fill this role, showing teachers how to empower students to take charge of their own learning and provide creative and authentic opportunities for students to demonstrate their knowledge through projects. With this book, teachers will get the guidance they need to help students engage in learning experiences that allow them to reflect on their level of knowledge and what they need to learn while exploring topics that correspond with their interests. Instead of providing text-based slideshow presentations that students read off a screen, teachers will learn to guide students in creating tutorial videos, providing peer reviews, curating their own resources, and participating in debates. The book shows how to take the fear out of edtech projects and presentations while helping educators solve the problem of finding time to develop and manage authentic projects. Offers a blueprint for implementing high-quality strategies and lesson ideas in classes with a plethora of practical resources to inspire students. Demonstrates the importance of pedagogy before tech with some activities highlighting a blend of hands-on learning and technology. Aligns projects to the ISTE Standards, providing a road map for creating valuable opportunities to help students become successful lifelong learners. Includes at least three project lesson plans in every chapter with adaptations for brick and mortar and online learning, as well as templates and student examples. For those just beginning to implement projects in their classroom, this book provides a framework for getting started. For those who have been incorporating student projects successfully for years, this book provides fresh ideas and strategies to help students further develop as creative communicators. Audience: K-12 educators and edtech coaches. Clustering Standards in Integrated Units Diane L. Ronis, 2008 This book provides a wealth of information for teachers who are seeking new ways to meet the needs of all learners for high academic achievement. Marguerita K. DeSander, Assistant Professor of Leadership and Policy Studies, The George Washington University. Using this book as part of the alignment process will greatly enhance any classroom curriculum. Joen M. Painter, Education Consultant. Develop integrated, meaningful units that engage students and address multiple standards. Using a student-oriented approach, Clustering Standards in Integrated Units, Second Edition, offers guidelines for designing interdisciplinary units that combine content areas, address standards, and involve students in their own learning and assessment. Diane L. Ronis offers a framework for organizing, implementing, and evaluating units and provides sample rubrics, templates, and reproducibles for the planning process. Drawing on a constructivist approach and geared to meet students' individual learning needs, the text demonstrates how to integrate content across multiple curriculum areas. Make instruction meaningful using new information about how the brain works.

Encourage students to pose and investigate questions relevant to the real world Access specific Web sites for meeting state standards This book helps seasoned and novice teachers facilitate collaborative learning with teams of students and assist them in making significant connections between their own experiences and events in the real world *Social-Emotional Learning Through STEAM Projects, Grades 4-5* Season Mussey,2022-02-27 Social Emotional Learning Through STEAM Projects Grades 4 5 helps educators target the development of social and emotional learning SEL competencies for high ability learners through interdisciplinary project based inquiry Aligned with STEAM content standards each of the nine projects introduces students to a real world problem through essential questions and the presentation of a primary source document Both the content and the inquiry process support SEL competency development from self awareness to selfmanagement social awareness relationship skills and responsible decision making As students work to understand and pose solutions to each problem they gain the knowledge and practical skills needed to become more socially and emotionally competent individuals in their classroom communities Differentiation in Practice Carol A. Tomlinson,Cindy A. Strickland,2005 This third book in the Differentiation in Practice series presents annotated lesson plans to illustrate how real teachers incorporate differentiation principles and strategies throughout an entire instructional unit Doing Science Neal A. Glasgow,1996-08-23 Offers new views and strategies to enliven the teaching of science by incorporating the investigative aspects of the subject Bound to provide invaluable help in solving a very serious national problem William J Lennarz Professor and Chairman Dept of Biochemistry and Cell Biology State University of New York at Stony Brook Provides science teaches with innovative ways to involve students in working on dynamic real world problems and projects This probmel based student centered approach to doing science focuses on life science learning and includes lessons from biology chemistry and physics This holistic method has been incorporated into the national standards for science education Includes practical examples on how to Utilize the natural curiosity concern and creativity of students to turn them into active participants in instruction instead of passive recipients Design and develop problem and activity scenarios and assess and evaluate the end results Teach students where and how to collect and analyze data in order to find the solutions to questions and problems Recruit and incorporate community mentors into your students projects Addresses issues of liability and includes sample projects policies and release and permission forms The author provides all the tools you need to turn life sciences into a living science **Harcourt Science: Earth science, [grade] 5, Units C and D, teacher's ed** ,2000 **Systems - Exploration, Culture, and Ecology** Sarah Wolfensohn,2007-07 Systems Book 3 Economics Climate and Comparisons is the third book in the Differentiated Curriculum Kit for Grade 4 In this book students will explore the system of free enterprise weather systems and the systems on other planets and many other things Grade 4 **Prentice Hall Science Explorer: Teacher's ed** ,2005 Democratizing data: Environmental data access and its future Michael C.
