Web Wisdom Marsha Ann Tate, 2018-10-10 The World Wide Web has undergone tremendous growth since the first edition of Web Wisdom How to Evaluate and Create Information Quality on the Web was conceived and written in the mid to late 1990s The phenomenal global expansion of the internet together with the increasing sophistication of online technologies and software applications requires us to be more savvy Web users especially given the growing complexity of Web based information This new edition of Web Wisdom covers key issues that users and creators of Web resources need to know regarding reliable and useful information on the Web including social media content Written in a straightforward and accessible format the book also provides critical evaluation techniques and tools to enhance Web based research and the creation of high quality content Features Includes checklists comprised of basic questions to ask when evaluating or creating web resources Provides an expanded discussion of copyright trademark and other related issues with specific reference to web authoring Contains a chapter devoted exclusively to social media applications and their unique evaluation challenges Presents a new section that addresses the evaluation challenges that are related to combining traditional and social media content Offers a new section focused on computer generated text and its allied evaluation challenges Introduces a revised and expanded companion website that provides a variety of supplemental materials related to the evaluation and creation of web content as well as links to additional examples This book demonstrates how to adapt and apply the five core traditional evaluation criteria authority accuracy objectivity currency coverage originally introduced in the first edition to the modern day Web environment

Web Wisdom, 2009-11-17 Mobile technologies faster connection speeds and the 24 7 connectivity that has lead to the development of social media have created an explosion of Internet use in the ten years since the initial publication of Web Wisdom How To Evaluate and Create Information Quality on the Web A decade ago these technologies and activities did not exist or

Cultural Psychology Durairaj Maheswaran, Sharon Shavitt, 2014-10-13 First published in 2000 This is Volume 9 No 2 of the Journal of Consumer Psychology Although there is growing interest in cultural differences in consumer behavior focused and systematic consumer research on the topic is still in its infancy The contributors to this special issue

address the conceptual and methodological issues that are central to conducting cross cultural research including selecting or blending emic and etic research approaches achieving measurement equivalence expanding the cultural constructs and geographical regions under investigation and understanding mediating processes In the process they review the progress that has been made in addressing these issues in consumer psychology and suggest a number of priorities for future research in this important domain Relational Calculus for Actionable Knowledge Michel Barès,Éloi Bossé,2022-01-21 This book focuses on one of the major challenges of the newly created scientific domain known as data science turning data into actionable knowledge in order to exploit increasing data volumes and deal with their inherent complexity Actionable knowledge has been qualitatively and intensively studied in management business and the social sciences but in computer science and engineering its connection has only recently been established to data mining and its evolution Knowledge Discovery and Data Mining KDD Data mining seeks to extract interesting patterns from data but until now the patterns discovered from data have not always been actionable for decision makers in Socio Technical Organizations STO With the evolution of the Internet and connectivity STOs have evolved into Cyber Physical and Social Systems CPSS that are known to describe our world today In such complex and dynamic environments the conventional KDD process is insufficient and additional processes are required to transform complex data into actionable knowledge Readers are presented with advanced knowledge concepts and the analytics and information fusion AIF processes aimed at delivering actionable knowledge The authors provide an understanding of the concept of relation and its exploitation relational calculus as well as the formalization of specific dimensions of knowledge that achieve a semantic growth along the AIF processes This book serves as an important technical presentation of relational calculus and its application to processing chains in order to generate actionable knowledge It is ideal for graduate students researchers or industry professionals interested in decision science and knowledge engineering **The Internet Encyclopedia, Volume 2 (G - O)** Hossein Bidgoli,2004-04-27 The Internet Encyclopedia in a 3 volume reference work on the internet as a business tool IT platform and communications and commerce medium EJISE Volume 14 Issue 1 , The Evolution of the Internet in the Business Sector Piet Kommers,Pedro Isaias,Kommers Issa,2014-11-30 Efficiency and Efficacy are crucial to the success of national and international business operations today With this in mind businesses are continuously searching for the information and communication technologies that will improve job productivity and performance and enhance communications collaboration cooperation and connection between employees employers and stakeholders The Evolution of the Internet in the Business Sector Web 1 0 to Web 3 0 takes a historical look at the policy implementation management and governance of productivity enhancing technologies This work shares best practices with public and private universities IS developers and researchers education managers and business and web professionals interested in implementing the latest technologies to improve organizational productivity and communication Knowledge Sharing in the Integrated Enterprise Peter Bernus,Mark Fox,2005-09-20

Enterprise Architects in their endeavor to achieve Enterprise Integration have limited guidance on how best to use Enterprise Models and Modeling Tools to support their practice It is widely recognized that the practice of engineering enterprises needs a number of models but how to maintain the relation between these models with ease is still a problem Model interoperability is an issue on multiple counts How to interchange models between enterprise modeling tools How to maintain the interdependencies between models whether they describe the enterprise on the same level but from different points of view or from the same point of view but on different levels of abstraction and granularity How to maintain a coherent and evolving set of enterprise models in support of continuous change processes How to use and reuse enterprise models as a knowledge resource The answers to these questions are of great importance to anyone who is implementing ISO9001 2000 requirements whether through using enterprise architecture practice or not although it can be argued that a well executed architecture practice should satisfy ISO9001 without additional effort This volume attacks the problem on three fronts 1 Authors working in international standardisation and tool development as well as in enterprise modeling research present the latest developments in semantic integration 2 Authors who are practitioners of or conducting active research in enterprise architecting methodologies give an account on the latest developments and strategic directions in architecture frameworks and methodologies 3 Authors who use or develop information integration infrastructures present best practice and future trends of this aspect of enterprise integration Chapters of this book include contributions to the International Conference on Enterprise Integration and Modelling Technology ICEIMT 04 and those presented at the Design of Information Infrastructure Systems for Manufacturing DIISM 04 Workshop While DIISM is traditionally oriented at supporting manufacturing practice the results have a far greater domain of applicability
