*On Moral Law and Quest for Selfhood* Mohan Parasain, 2016-07-15 This book offers an original intersection of concepts from Immanuel Kant's moral command ethics and Søren Kierkegaard's existential ethics The Kantian formulation of moral law is based on theoretical ground while Kierkegaardian ethics of the quest for selfhood views it as the very act of living The present work provides an account of both these perspectives and questions whether these approaches to morality are mutually exclusionary Using Slavoj Žižek's parallax view in the realm of morality it argues that moral philosophy must engage with a constant critique of difference around which the transformation of our various perspectives to morality revolves This work appeals for furtherance of the conversation model and participation of perspectives to transcend positional confinement It advocates the traversing of the ethical parallax to allow for intellectual openness and an empathetic perception of the other Engaging and well researched this book will be of interest to scholars and researchers of ethics political philosophy and continental philosophy

Sellers, 2011-06-29 In three parts this volume in the AP/LS series explores the phenomena of captivity and risk management guided and informed by the theory method and policy of psychological jurisprudence The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent conditions of control These conditions impose barriers to justice and set limits on citizenship for one and all Situated at the nexus of political social theory mental health law and jurisprudential ethics the book examines and critiques constructs such as offenders and victims self and society therapeutic and restorative health harm and community So too are three total confinement case law data sets on which this analysis is based The volume stands alone in its efforts to systematically diagnose the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting 1 the rights of juveniles found competent to stand criminal trial the mentally ill placed in long term disciplinary isolation and sex offenders subjected to civil detention and community re entry monitoring 2 the often unmet needs of victims and 3 the demands of an ordered society Carefully balancing sophisticated insights with concrete and cutting edge applications the book concludes with a series of provocative yet practical recommendations for future research and meaningful reform within institutional practice programming and policy The *Ethics of Total Confinement* is a thought provoking and timely must read for anyone interested in the ethical and legal issues regarding madness citizenship and social justice It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us Instead the path forward must run through a return to the ethical and psychological roots of security and justice The *Ethics of Total*
