both material links and subjective or affective ties It also foregrounds attachment as a variable relation often dependent on its implied other detachment However while the first term of this relation is relatively well known the second is seriously under researched and deserves far more attention Key questions explored are what is detachment how does it work and what are the theoretical underpinnings and implications of this concept How do practices and strategies of detachment configure and re agence markets How do markets provoke attitudes and dispositions of detachment How do detachment strategies become qualified as political and with what consequences The authors in this unique collection explore these questions using an array of empirical cases ranging from fast fashion to food supply chains energy savings schemes to unpackaged food Working across economic sociology science and technology studies STS cultural studies politics and consumer research they highlight the complexities significance and impacts of letting go in market configurations The chapters in this book were originally published as a special issue of the journal Consumption Markets Culture
