Water Rights And Social Justice In The Mekong Region:

Water Rights and Social Justice in the Mekong Region Kate Lazarus, 2011 First Published in 2011 Routledge is an imprint of Taylor Francis an informa company

Water Rights and Social Justice in the Mekong Region Kate Lazarus, Bernadette P. Resurreccion, Nga Dao, Nathan Badenoch, 2012-06-25 The Mekong Region has come to represent many of the important water governance challenges faced more broadly by the mainland Southeast Asian region This book focuses on the complex nature of water rights and social justice in the Mekong region The chapters delve into the diverse social political and cultural dynamics that shape the various realities and scales of water governance in the region in an effort to bring to the forefront some of the local nuances required in the formulation of a larger vision of justice in water governance It is hoped that this contextualized analysis will deepen our understanding of the potential of and constraints on water rights in the region particularly in relation to the need to realize social justice The authors show how vitally important it is that water governance is democratized to allow a more equitable sharing of water resources and counteract the pressures of economic growth that may pose risks to social welfare and environmental sustainability *M-power Book Series on Water Governance in the Mekong Region: Water rights and social justice in the Mekong Region*, 2007

[The Right to Water](#) Farhana Sultana, Alex Loftus, 2013-10-18 The right to clean water has been adopted by the United Nations as a basic human right Yet how such universal calls for a right to water are understood negotiated experienced and struggled over remain key challenges The Right to Water elucidates how universal calls for rights articulate with local historical geographical contexts governance politics and social struggles thereby highlighting the challenges and the possibilities that exist Bringing together a unique range of academics policy makers and activists the book analyzes how struggles for the right to water have attempted to translate moral arguments over access to safe water into workable claims This book is an intervention at a crucial moment into the shape and future direction of struggles for the right to water in a range of political geographic and socio economics contexts seeking to be pro active in defining what this struggle could mean and how it might be taken forward in a far broader transformative politics The Right to Water engages with a range of approaches that focus on philosophical legal and governance perspectives before seeking to apply these more abstract arguments to an array of concrete struggles and case studies In so doing the book builds on empirical examples from Africa Asia Oceania Latin America the Middle East North America and the European Union

Interactive Approaches to Water Governance in Asia Kenji Otsuka, 2019-01-12 This book applies interactive perspectives which have historically mainly been discussed in the context of Western European countries to case studies on water governance in Asia It examines how these perspectives can be used to reveal complex and dynamic interactions in water governance in Asia and how interactions between policies and practices as well as those between formal institutes and emerging informal institutes come to pass In two introductory chapters and seven case studies in Asia two from China and each one from Japan Thailand the Philippines Indonesia and

India the book reveals the interactive forms currently emerging in Asia under hierarchical but often fragmented administrative systems In addition it explores emerging hybrid forms of interactive governance which bring together governmental and non governmental actors and discusses how the expected role of government and roles of non governmental actors could be changed to solve problems in a more cooperative manner In this context researchers from outside the locality could play an important role helping facilitate such forms of interactive governance The book offers extensive information on the essential features of interactive forms and on the role of such transdisciplinary approaches making it a valuable resource not only for scholars and university students but also for policymakers and grass roots practitioners directly involved in the interactive process of water governance *Water Conflicts* Mark Zeitoun, Naho Mirumachi, Jeroen Warner, 2020 The book breaks from the existing mold by deploying lively concepts and theory that shine a line on the dynamic interactions between states that are obliged to share a water resource whether or not they want to

Knowing the Salween River: Resource Politics of a Contested Transboundary River Carl Middleton, Vanessa Lamb, 2019-08-12 This open access book focuses on the Salween River shared by China Myanmar and Thailand that is increasingly at the heart of pressing regional development debates The basin supports the livelihoods of over 10 million people and within it there is great socio economic cultural and political diversity The basin is witnessing intensifying dynamics of resource extraction alongside large dam construction conservation and development intervention that is unfolding within a complex terrain of local national and transnational governance With a focus on the contested politics of water and associated resources in the Salween basin this book offers a collection of empirical case studies that highlights local knowledge and perspectives Given the paucity of grounded social science studies in this contested basin this book provides conceptual insights at the intersection of resource governance development and politics of knowledge relevant to researchers policy makers and practitioners at a time when rapid change is underway Fills a significant knowledge gap on a major river in Southeast Asia with empirical and conceptual contributions Inter disciplinary perspective and by a range of writers including academics policy makers and civil society researchers the majority from within Southeast Asia New policy insights on a river at the cross roads of a major political and development transition Routledge Handbook of the Environment in Southeast Asia Philip Hirsch, 2016-09-13 The environment is one of the defining issues of our times and it is closely linked to questions and dilemmas surrounding economic development Southeast Asia is one of the world s most economically and demographically dynamic regions and it is also one in which a host of environmental issues raise themselves The Routledge Handbook of the Environment in Southeast Asia is a collection of 30 chapters dealing with the most significant scholarly debates in this rapidly growing field of study Structured in four main parts it gives a comprehensive regional overview of and insight into the environment in Southeast Asia Wide ranging and balanced this handbook promotes scholarly understanding of how environmental issues are dealt with from diverse theoretical perspectives

It offers a detailed empirical understanding of the myriad environmental problems and challenges faced in Southeast Asia. This is the first publication of its kind in this field, a helpful companion for a global audience and for scholars of Southeast Asian studies from a variety of disciplines. China's Global Quest for Resources Fengshi Wu, Hongzhou Zhang, 2016-11-18

The world's key resources of energy, food, and water, which are closely connected and interdependent on each other, are coming under increasing pressure as a result of increasing population, development, and climate change. In the case of China, following its recent economic surge, energy, food, and water are already nearing the point of shortage. This book considers how China is working to avoid shortages of energy, food, and water and the effect this is having internationally. Subjects covered include domestic policy debates on China's resource strategies, challenges for managing transboundary waters related to China's responses from various regions and countries to China's Go Out strategy, and China's increasing energy links with Russia and declining agricultural trade with the United States. The book concludes by discussing in comparative perspective China's outward resource acquisition activities and the consequent policy implications. The Mekong: A Socio-legal Approach to River Basin Development Ben Boer, Philip Hirsch, Fleur Johns, Ben Saul, Natalia Scurrah, 2015-12-22

An international river basin is an ecological system, an economic thoroughfare, a geographical area, a font of life and livelihoods, a geopolitical network, and often a cultural icon. It is also a socio-legal phenomenon. This book is the first detailed study of an international river basin from a socio-legal perspective. The Mekong River Basin, which sustains approximately 70 million people across Cambodia, China, Laos, Myanmar, Thailand, and Vietnam, provides a prime example of the socio-legal complexities of governing a transboundary river and its tributaries. The book applies its socio-legal analysis to bring a fresh approach to understanding conflicts surrounding water governance in the Mekong River Basin. The authors describe the wide range of uses being made of legal doctrine and legal argument in ongoing disputes surrounding hydropower development in the Basin, putting to rest lingering caricatures of a single ASEAN way of navigating conflict. They call into question some of the common assumptions concerning the relationship between law and development. The book also sheds light on important questions concerning the global hybridization or crossover of public and private power and its ramifications for water governance. With current debates and looming conflicts over water governance globally and over shared rivers in particular, these issues could not be more pressing.
