Dynamics of the Contemporary University Neil J. Smelser, 2013-03-15 This book is an expanded version of the Clark Kerr Lectures of 2012 delivered by Neil Smelser at the University of California at Berkeley in January and February of that year The initial exposition is of a theory of change labeled structural accretion that has characterized the history of American higher education mainly but not exclusively of universities The essence of the theory is that institutions of higher education progressively add functions structures and constituencies as they grow but seldom shed them yielding increasingly complex structures The first two lectures trace the multiple ramifications of this principle into other arenas including the essence of complexity in the academic setting the solidification of academic disciplines and departments changes in faculty roles and the academic community the growth of political constituencies academic administration and governance and academic stratification by prestige In closing Smelser analyzes a number of contemporary trends and problems that are superimposed on the already complex structures of higher education such as the diminishing public support without alterations of governance and accountability the increasing pattern of commercialization in higher education the growth of distance learning and for profit institutions and the spectacular growth of temporary and part time faculty

Composition in the Age of Austerity Nancy Welch, Tony Scott, 2016-04-01 In the face of the gradual saturation of US public education by the logics of neoliberalism educators often find themselves at a loss to respond let alone resist Through state defunding and many other reforms fueled by austerity politics a majority of educators are becoming casual labor in US universities while those who hang onto secure employment are pressed to act as self supporting entrepreneurs or do more with less Focusing on the discipline of writing studies this collection addresses the sense of crisis that many educators experience in this age of austerity The chapters in this book chronicle how neoliberal political economy shapes writing assessments curricula teacher agency program administration and funding distribution Contributors also focus on how neoliberal political economy dictates the direction of scholarship because the economic and political agenda shaping the terms of work the methods of delivery and the ways of valuing and assessing writing also shape the primary concerns and directions of scholarship *Composition in the Age of Austerity* offers critical accounts of how the restructuring of higher education is shaping the daily realities of composition programs The book documents the effects and implications of the current restructuring examines how cherished rhetorical ideals actually leave the field unprepared to respond effectively to defunding and corporatizing trends and establishes points of departure for collective response

The Intellectual Properties of Learning John Willinsky, 2018-01-02 Providing a sweeping millennium plus history of the learned book in the

West John Willinsky puts current debates over intellectual property into context asking what it is about learning that helped to create the concept even as it gave the products of knowledge a different legal and economic standing than other sorts of property Willinsky begins with Saint Jerome in the fifth century then traces the evolution of reading writing and editing practices in monasteries schools universities and among independent scholars through the medieval period and into the Renaissance He delves into the influx of Islamic learning and the rediscovery of classical texts the dissolution of the monasteries and the founding of the Bodleian Library before finally arriving at John Locke whose influential lobbying helped bring about the first copyright law the Statute of Anne of 1710 Willinsky s bravura tour through this history shows that learning gave rise to our idea of intellectual property while remaining distinct from if not wholly uncompromised by the commercial economy that this concept inspired making it clear that today s push for marketable intellectual property threatens the very nature of the quest for learning on which it rests
