## **War Peace And Human Nature The Convergence Of Evolutionary And Cultural Views:**

*War, Peace, and Human Nature* Douglas P. Fry, 2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon.com Emergent Warfare in Our Evolutionary Past Nam C Kim, Marc Kissel, 2018-03-13

Why do we fight Have we always been fighting one another This book examines the origins and development of human forms of organized violence from an anthropological and archaeological perspective Kim and Kissel argue that human warfare is qualitatively different from forms of lethal intergroup violence seen elsewhere in the natural world and that its emergence is intimately connected to how humans evolved and to the emergence of human nature itself

**Why Humans Fight** Siniša Malešević, 2022-10-06 Malešević offers a novel sociological answer to the age old question Why do humans fight Instead of focusing on the motivations of solitary individuals he emphasises the centrality of the social and historical contexts that make fighting possible He argues that fighting is not an individual attribute but a social phenomenon shaped by one's relationships with other people Drawing on recent scholarship across a variety of academic disciplines as well as his own interviews with the former combatants Malešević shows that one's willingness to fight is a contextual phenomenon shaped by specific ideological and organisational logic This book explores the role biology psychology economics ideology and coercion play in one's experience of fighting emphasising the cultural and historical variability of combativeness By drawing from numerous historical and contemporary examples from all over the world Malešević demonstrates how social pugnacity is a relational and contextual phenomenon that possesses autonomous features

**The Causes of War and the Spread of Peace** Azar Gat, 2017 The causes of war why people fight is one of the big questions of human existence Azar Gat's book ranging from the beginning of prehistory to the 21st century offers a definitive answer to the lingering mystery *Mammal Societies* Tim Clutton-Brock, 2016-04-20 The book aims to integrate our understanding of mammalian societies into a novel synthesis that is relevant to behavioural ecologists ecologists and anthropologists It adopts a coherent structure that deals initially with the characteristics and strategies of females before covering those of males cooperative societies and hominid societies It reviews our current understanding both of the structure of societies and of the strategies of individuals it combines coverage of relevant areas of theory with coverage of interspecific comparisons intraspecific comparisons and experiments it explores both evolutionary causes of different traits and their ecological consequences and it integrates research on different groups of mammals with research on primates and humans and attempts to put research on human societies into a broader perspective Shadow Sophia Celia E.

Deane-Drummond,2021-02-25 Why do humans who seem to be exemplars of virtue also have the capacity to act in atrocious ways What are the roots of tendencies for sin and evil A popular assumption is that it is our animalistic natures that are responsible for human immorality and sin while our moral nature curtails and contains such tendencies through human powers of freedom and higher reason This book challenges such assumptions as being far too simplistic Through a careful engagement with evolutionary and psychological literature Celia Deane Drummond argues that tendencies towards vice are more often than not distortions of the very virtues that are capable of making us good After beginning with Augustine s classic theory of original sin the book probes the philosophical implications of sin s origins in dialogue with the philosophy of Paul Ricoeur Different vices are treated in both individual and collective settings in keeping with a multispecies approach Areas covered include selfishness pride violence anger injustice greed envy gluttony deception lying lust despair anxiety and sloth The work of Thomas Aquinas helps to illuminate and clarify much of this discussion on vice including those vices which are more distinctive for human persons in community with other beings Such an approach amounts to a search for the shadow side of human nature shadow sophia Facing that shadow is part of a fuller understanding of what makes us human and thus this book is a contribution to both theological anthropology and theological ethics *Archaeology of Households, Kinship, and Social Change* Lacey B. Carpenter,Anna Marie Prentiss,2021-11-24 Archaeology of Households Kinship and Social Change offers new perspectives on the processes of social change from the standpoint of household archaeology This volume develops new theoretical and methodological approaches to the archaeology of households pursuing three critical themes household diversity in human residential communities with and without archaeologically identifiable houses interactions within and between households that explicitly considers impacts of kin and non kin relationships and lastly change as a process that involves the choices made by members of households in the context of larger societal constraints Encompassing these themes authors explore the role of social ties and their material manifestations within the house dwelling or other constructed space how the household relates to other social units how households consolidate power and control over resources and how these changes manifest at multiple scales The case studies presented in this volume have broader implications for understanding the drivers of change the ways households create the contexts for change and how households serve as spaces for invention reaction and or resistance Understanding the nature of relationships within households is necessary for a more complete understanding of communities and regions as these ties are vital to explaining how and why societies change Taking a comparative outlook with case studies from around the world this volume will inform students and professionals researching household archaeology and be of interest to other disciplines concerned with the relationship between social networks and societal change *World Peace* Alex J. Bellamy,2019 This book investigates world peace what it is whether it might be achieved and how *The Rise of Organised Brutality* Siniša Malešević,2017-04-03 Challenging the prevailing belief that organised violence is experiencing historically continuous decline this book provides an

in depth sociological analysis that shows organised violence is in fact on the rise Malevi demonstrates that violence is determined by organisational capacity ideological penetration and micro solidarity rather than biological tendencies meaning that despite pre modern societies being exposed to spectacles of cruelty and torture such societies had no organisational means to systematically slaughter millions of individuals Malevi suggests that violence should not be analysed as just an event or process but also via changing perceptions of those events and processes and by linking this to broader social transformations on the inter polity and inter group levels he makes his key argument that organised violence has proliferated Focusing on wars revolutions genocides and terrorism this book shows how modern social organisations utilise ideology and micro solidarity to mobilise public support for mass scale violence

**Chimpanzees, War, and History** R. Brian Ferguson, 2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill
