Ylimaki, 2017-10-04 This book is open access under a CC BY 4.0 license This volume argues for the need of a common ground that bridges leadership studies curriculum theory and Didaktik It proposes a non-affirmative education theory and its core concepts along with discursive institutionalism as an analytical tool to bridge these fields It concludes with implications of its coherent theoretical framing for future empirical research Recent neoliberal policies and transnational governance practices point toward new tensions in nation state education These challenges affect governance leadership and curriculum involving changes in aims and values that demand coherence Yet the traditionally disparate fields of educational leadership curriculum theory and Didaktik have developed separately both in terms of approaches to theory and theorizing in USA Europe and Asia and in the ways in which these theoretical traditions have informed empirical studies over time An additional aspect is that modern education theory was developed in relation to nation state education which in the meantime has become more complicated due to issues of globalism This volume examines the current state of affairs and addresses the issues involved In doing so it opens up a space for a renewed and thoughtful dialogue to rethink and re-theorize these traditions with non-affirmative education theory moving beyond social reproduction and social transformation perspectives

Paradigm Debates in Curriculum and Supervision Linda Behar-Horenstein,Jeffrey Glanz,2000-01-30 Paradigm debates in the educational research community are a frequent if not common occurrence How do paradigm debates in other educational fields such as curriculum and supervision shape educators understanding and practice In this volume it is suggested that educators adherence to particular views of curriculum and supervision is influential in guiding their beliefs and subsequent actions For example a widely accepted belief is that if an individual adopts a mechanistic view of the curriculum then s he is likely to deliver a curriculum grounded in pre established objectives and evaluate student achievement in relationship to formulated objectives Postmodernists contend that such educators are bound by rigid bifurcation and a constrictive linear logic In supervision educational leaders who favor leadership styles comprised by autocratic behaviors tend to create school climates that favor a top down approach to human relationships Autocratic leaders rely on hierarchical organizational structures and styles that seek to instill compliance and subordination Yet prospective administrators who want concrete proposals put in practice find modern perspectives of supervision helpful In contrast postmodern supervisors allege that such leaders disallow the emergence of relevant and authentic relationships that might occur when conventional hierarchical structures are diminished and open lines of communication between teachers students administrators become normative The chapters in this book present an in

depth analysis of how an individual's predisposition towards modern and postmodern views of curriculum and supervision are likely to influence 1 curriculum development 2 teaching styles 3 leadership styles 4 teacher and student evaluation and 5 the missions intrinsic to the creation of professional preparation programs that serve to promulgate existing practice or create a new order of teachers and administrator
