eliminate the obstacles to energy transition policies is pivotal to enhance research activities focused on the new EU Regulatory framework. Most in general, it is crucial a multidisciplinary approach focused on the fight to climate change and the implementation of sustainable development. In this book, several articles which offer a different perspective on the energy transition barriers from different points of view and under different methodologies. The book is composed of four parts. The first one is dedicated to the analysis of the methodology and the results offered by questionnaires supplied online in two languages: Italian and English. The survey is the basis of the Working Paper which is the deliverable of the ECPE Work Programme n. 2 and which constitutes the ground for a discussion into the research group. The second part of the volume collects the contributions focused on the social and economic barriers to prosumerism, while the third one is dedicated to a description of failure cases of self-consumption. Lesson learned by failure experiences in the world could favour a good implementation of the new EU Directive Renewable Energy Directive 2018/2001 RED II and Directive on common rules for the internal market for electricity 2019/944 IEM in Italy, an European Country which is strategic in the Energy policy of the Mediterranean area. The last part of the book is composed of the visions and perspectives offered by Italian testimonials engaged as actors in the new energy market with different roles. I am grateful for the generous support given by the editorial staff composed by Gopi Battinemi, Roberto Garetto, Federico Pascucci, Giovanni Russo and Karina Zabrodina, precious collaborators and valid researchers. Thanks also to the Scientific Committee which honoured our work: Marine Cornelis, Francisco Lled Yag e and Luis E. Quintero. As editor, I am sure you will appreciate the volume which would like to offer an insight on new issues and challenges offered by the energy transition era.

Research and

Innovation Forum 2022 Anna Visvizi, Orlando Troisi, Mara Grimaldi, 2023-03-14. This book features research presented and discussed during the Research Innovation Forum Rii Forum 2022. As such, this book offers a unique insight into emerging topics, issues and developments pertinent to the fields of technology innovation and education and their social impact. Papers included in this book apply inter and multi-disciplinary approaches to query such issues as technology enhanced teaching and learning, smart cities, information systems, cognitive computing and social networking. What brings these threads of the discussion together is the question of how advances in computer science, which are otherwise largely incomprehensible to researchers from other fields, can be effectively translated and capitalized on so as to make them beneficial for society as a whole. In this context, Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders including academics, the think tank sector and decision makers can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science.
