

WE COULD NOT FAIL

THE FIRST AFRICAN AMERICANS
IN THE SPACE PROGRAM

RICHARD PAUL & STEVEN MOSS

We Could Not Fail The First African Americans In The Space Program

Brian C. Odom, Stephen P. Waring

We Could Not Fail The First African Americans In The Space Program:

We Could Not Fail Richard Paul, Steven Moss, 2015-05-01 This surprising and insightful history profiles ten African American engineers, mathematicians, and others who worked for NASA's space program. Lauren Helmuth, New York Times Book Review. The Space Age began just as the struggle for civil rights forced Americans to confront the bitter legacy of slavery, discrimination, and violence against African Americans. NASA itself became an agent of social change with President Kennedy opening its workplaces to African Americans. In *We Could Not Fail*, Richard Paul and Steven Moss profile ten pioneer African American space workers whose stories illustrate the role NASA and the space program played in promoting civil rights. Paul and Moss recount how these technicians, mathematicians, engineers, and an astronaut candidate surmounted barriers and navigated being the sole African American in a NASA work group. These brave and determined men went on to help transform Southern society by integrating colleges, patenting new inventions, holding elective office, and reviving and governing defunct towns. Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration, *We Could Not Fail* demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement. [NASA and the Long Civil Rights Movement](#) Brian C. Odom, Stephen P. Waring, 2022-04-12 Examining the ways in which NASA's goal of space exploration both conflicted and aligned with the cause of racial equality, this volume provides new insights into the complex relationship between the space program and the civil rights movement in the Jim Crow South and abroad. **Gender and the Race for Space** Erinn McComb, 2025-06-10 The American astronaut image was informed by early Cold War ideals of masculinity that helped mold a distinctly American anti-communist masculinity which appeared on the surface anyway to resolve not only an American crisis of masculinity but helped win the Cold War on an ideological and popular level. This American image focused on strict gender binaries of man as the protector controlling technology and containing communism while woman was the passive actor with spaceflight technology left behind in the home waiting for the return of the astronaut husband. Allowing women to fly into space would have represented a lack of individual control with spaceflight technology. **Space Craze** Margaret A. Weitekamp, 2022-10-18 A space historian's tour through astounding spaceflight history and the Smithsonian's collection of space and science fiction memorabilia. Winner of the American Institute of Aeronautics and Astronautics 2024 Gardner Lasser Aerospace History Literature Award. Spanning from the 1929 debut of the futuristic Buck Rogers to present-day privatization of spaceflight, *Space Craze* celebrates America's endless enthusiasm for space exploration. Author Margaret Weitekamp, curator at the Smithsonian's National Air and Space Museum, writes with warmth and personal experience to guide readers through extraordinary spaceflight history while highlighting objects from the Smithsonian's spaceflight collection. Featuring historical milestones in space exploration, films and TV shows, literature and comic strips, toys and games, and internet communities, *Space Craze* is a sci-fi lover's dream. The book investigates how spaceflight, both real and imagined,

has served as the nexus where contemporary American concerns such as race gender sexuality freedom and national identity have been explored and redefined Chronological chapters include Chapter 1 Buck Rogers Ray Guns and the Space Frontier Chapter 2 Space Forts Television and the Cold War Mindset Chapter 3 John Glenn the Apollo Program and Fluctuating Spaceflight Enthusiasm Chapter 4 Star Trek Star Wars and Burgeoning Fandoms Chapter 5 Generation X the Space Shuttle and Promoting Education Chapter 6 Space Stations Spaceflight Enthusiasm and Online Fandom Chapter 7 Streaming Services Battling Billionaires and Accelerated Change From the almost 650 million viewers who tuned in to watch the first steps on the Moon to the ardent Star Trek fandom that burgeoned into a cultural force Space Craze taps into the country's enduring love affair with space

The Smithsonian History of Space Exploration Roger D. Launius, 2018-10-23 The first in depth fully illustrated history of global space discovery and exploration from ancient times to the modern era The Smithsonian History of Space Exploration examines civilization's continued desire to explore the next frontier as only the Smithsonian can do it Buzz Aldrin Gemini 12 and Apollo 11 astronaut and author of *No Dream Is Too High* Former NASA and Smithsonian space curator and historian Roger D Launius presents a comprehensive history of our endeavors to understand the universe honoring millennia of human curiosity ingenuity and achievement This extensive study of international space exploration is packed with over 500 photographs illustrations graphics and cutaways plus plenty of sidebars on key scientific and technological developments influential figures and pioneering spacecraft Starting with space exploration's origins in the pioneering work undertaken by ancient civilizations and the great discoveries of the Renaissance thinkers Launius also devotes whole chapters to our space race to the Moon space planes and orbital stations and the lure of the red planet Mars He also offers new insights into well known moments such as the launch of Sputnik 1 and the Apollo Moon landing and explores the unexpected events and hidden figures of space history The final chapters cover the technological and mechanical breakthroughs enabling humans to explore far beyond our own planet in recent decades speculating on the future of space exploration including space tourism and our possible future as an extraterrestrial species This is a must read for space buffs and everyone intrigued by the history and future of scientific discovery This oversize offering is a space nerd's dream come true Booklist *Air & Space Smithsonian*, 2013 *Talking Book Topics*, 2016 Star Crossed Emma

Barry, Genevieve Turner, 2017-04-04 Houston Texas 1964 Geraldine Brixton is ready to make history as the first female American astronaut After a childhood traveling the air show circuit she works as a pilot so she's more than prepared for the flying But space demands more than operating equipment and the last obstacle in her way is also the most serious math Beverly Fox has made a career crunching the numbers that launch men into space Numbers aren't her problem limits are From the narrow expectations of her parents to discrimination at work Bev's life has been cut down over and over Only in her hidden activities after dark does she feel whole Wanting to do her part to get a woman into space Bev offers to help Geri conquer math But neither anticipates her intense attraction or that it might be shared Together they could soar to everything
