Weekend Pilots Technology Masculinity Aviation:

Weekend Pilots Alan Meyer, 2015-12-30 The inside story of the hypermasculine world of American private aviation In 1960 97 percent of private pilots were men More than half a century later this figure has barely changed In *Weekend Pilots* Alan Meyer provides an engaging account of the postWorld War II aviation community Drawing on public records trade association journals newspaper accounts and private papers and interviews Meyer takes readers inside a white male circle of the initiated that required exceptionally high skill levels that celebrated facing and overcoming risk and that encouraged fierce personal independence The Second World War proved an important turning point in popularizing private aviation Military flight schools and postwar GI Bill flight training swelled the ranks of private pilots with hundreds of thousands of young mostly middle class men Formal flight instruction screened and acculturated aspiring fliers to meet a masculine norm that traced its roots to prewar barnstorming and wartime combat training After the war the aviation community's response to aircraft designs played a significant part in the technological development of personal planes Meyer also considers the community of pilots outside the cockpit from the time honored tradition of hangar flying at local airports to air shows to national conventions of private fliers to argue that almost every aspect of private aviation reinforced the message that flying was by for and about men The first scholarly book to examine in detail the role of masculinity in aviation *Weekend Pilots* adds new dimensions to our understanding of embedded gender and its long term effects [General Aviation Aircraft Design](#)

Snorri Gudmundsson, 2021-10-31 *General Aviation Aircraft Design* Second Edition continues to be the engineer's best source for answers to realistic aircraft design questions The book has been expanded to provide design guidance for additional classes of aircraft including seaplanes biplanes UAS high speed business jets and electric airplanes In addition to conventional powerplants design guidance for battery systems electric motors and complete electric powertrains is offered The second edition contains new chapters Thrust Modeling for Gas Turbines Longitudinal Stability and Control Lateral and Directional Stability and Control These new chapters offer multiple practical methods to simplify the estimation of stability derivatives and introduce hinge moments and basic control system design Furthermore all chapters have been reorganized and feature updated material with additional analysis methods This edition also provides an introduction to design optimization using a wing optimization as an example for the beginner Written by an engineer with more than 25 years of design experience professional engineers aircraft designers aerodynamicists structural analysts performance analysts researchers and aerospace engineering students will value the book as the classic go to for aircraft design The printed book is now in color with 1011 figures and illustrations Presents the most common methods for conceptual aircraft design Clear presentation splits text into shaded regions separating engineering topics from mathematical derivations and examples Design topics range from the new 14 CFR Part 23 to analysis of ducted fans All chapters feature updated material with additional analysis methods Many chapters have been reorganized for further help Introduction to design optimization is

provided using a wing optimization as an example for the beginner Three new chapters are offered two of which focus on stability and control These offer multiple practical methods to simplify the estimation of stability derivatives The chapters introduce hinge moments and basic control system design Real world examples using aircraft such as the Cirrus SR 22 and Learjet 45

Needy Media Stephen Monteiro,2025-10-16 What makes our portable networked personal media devices smartphones tablets smartwatches so irresistible Reacting to our touch voice or gaze seizing and keeping our attention with sounds vibrations and screen prompts these objects construct an animated intimacy that builds trust and emotional dependence Needy Media explores how features such as face recognition awareness sensors and touchscreens have developed and intersected tying them to key concepts of psychology language and the body Surveying products and practices across a half century Stephen Monteiro argues that the appeal is as much about how media devices behave as it is about the information they convey Monteiro traces a symbiotic overreliance a neediness between users and devices fostered by personalized aspects of digital materiality The physical and emotional bonds that emerge he argues not only cast our devices as loyal companions adaptable to our needs and idiosyncrasies they also facilitate the corporate harvesting of massive amounts of personal data in the name of making technology more friendly intuitive and individualized Raising important questions about privacy and power Needy Media seeks answers in the complex and sensitive relationship between interface and body a coupling that makes the networked object both an essential psychological presence and a lingering concern for our sense of self

Earning Their Wings Sarah Parry Myers,2023-09-14 Established by the Army Air Force in 1943 the Women s Airforce Service Pilots WASP program opened to civilian women with a pilot s license who could afford to pay for their own transportation training and uniforms Despite their highly developed skill set rigorous training and often dangerous work the women of WASP were not granted military status until 1977 denied over three decades of Army Air Force benefits as well as the honor and respect given to male and female World War II veterans of other branches Sarah Parry Myers not only offers a history of this short lived program but considers its long term consequences for the women who participated and subsequent generations of servicewomen and activists Myers shows us how those in the WASP program bonded through their training living together in barracks sharing the dangers of risky flights and struggling to be recognized as military personnel and the friendships they forged lasted well after the Army Air Force dissolved the program Despite the WASP program s short duration its fliers formed activist networks and spent the next thirty years lobbying for recognition as veterans Their efforts were finally recognized when President Jimmy Carter signed a bill into law granting WASP participants retroactive veteran status entitling them to military benefits and burials

A Connected Metropolis Maxwell Johnson,2023-07 In *A Connected Metropolis* Maxwell Johnson describes Los Angeles s rise in the early twentieth century as catalyzed by a series of upper class debates about the city s connections to the outside world By focusing on specific moments in the city s development when tensions over Los Angeles s connections or lack thereof emerged Johnson ties each

movement to two or three contemporary figures who influenced the debates at hand The elites previous efforts to secure nationwide and global connections for Los Angeles were wildly successful following World War II As a result the city became a landing spot for African American migrants Cambodian and Laotian refugees and Mexican and Central American immigrants Johnson argues that the city s history is more defined by external relationships than previously understood and those relationships have given the history of the city more continuity than originally recognized At the turn of the twentieth century the politics of connection revolved around initiatives to tie Los Angeles to other places both tangibly and metaphorically Elites built tangible connections to secure among other things the water that irrigated the citrus farms of Los Angeles the capital that propelled its businesses and the people who migrated from the Midwest to buy its houses To build metaphorical connections that located the city amid transcontinental and trans Pacific movements elites themselves often transcended nearby borders and pursued connections at will Los Angeles stood as a focal point for elite ambitions a place with a more ambivalent relationship to external connections The true story of Los Angeles s rise lies in the spectacular visions and rambunctious activism of a group of elite men dedicated to transforming a remote frontier town into a global metropolis

Tiger Check Steven A. Fino,2017-11 The fielding of automated flight controls and weapons systems in fighter aircraft from 1950 to 1980 challenged the significance ascribed to several of the pilots historical skillsets such as superb hand eye coordination required for aggressive stick and rudder maneuvering and perfect eyesight and crack marksmanship required for long range visual detection and destruction of the enemy Highly automated systems would proponents argued simplify the pilot s tasks while increasing his lethality in the air thereby opening fighter aviation to broader segments of the population However these new systems often required new unique skills which the pilots struggled to identify and develop Moreover the challenges that accompanied these technologies were not restricted to individual fighter cockpits but rather extended across the pilots tactical formations altering the social norms that had governed the fighter pilot profession since its establishment In the end the skills that made a fighter pilot great in 1980 bore little resemblance to those of even thirty years prior despite the precepts embedded within the myth of the fighter pilot As such this history illuminates the rich interaction between human and machine that often accompanies automation in the workplace It is broadly applicable to other enterprises confronting increased automation from remotely piloted aviation to Google cars It should appeal to those interested in the history of technology and automation as well as the general population of military aviation enthusiasts

Provided by publisher From Dead Ends to Cold Warriors Peter W.Y. Lee,2021-02-12 After World War II studies examining youth culture on the silver screen start with James Dean But the angst that Dean symbolized anxieties over parents the Establishment and the expectations of future citizen soldiers long predated Rebels without a Cause Historians have largely overlooked how the Great Depression and World War II impacted and shaped the Cold War and youth contributed to the national ideologies of family and freedom From Dead Ends to Cold Warriors explores this gap by connecting facets of

boyhood as represented in American film from the 1930s to the postwar years From the Andy Hardy series to pictures such as *The Searcher* *Intruder in the Dust* and *The Gunfighter* boy characters addressed larger concerns over the dysfunctional family unit militarism the race question and the international scene as the Korean War began Navigating the political social and economic milieus inside and outside of Hollywood Peter W Y Lee demonstrates that continuities from the 1930s

influenced the unique postwar moment coalescing into anticommunism and the Cold War **Masculinity in the Modern West** Christopher E. Forth, 2008-09-16 Across the Western world crisis is the word most commonly used to describe the state of masculinity today but how new is this idea Can we identify a time when masculinity was actually stable and secure Masculinity in the Modern West engages with these questions by examining how traditional ideals about male physical prowess have clashed with the lifestyle changes that accompanied the rise of modern civilization since 1700 In countries like America Britain France Germany and Russia modernity bolstered male dominance in commerce politics technology and the world of ideas yet images of masculinity have continued to be haunted by the negative effects that polite cerebral consumerist and sedentary lifestyles might have on the minds and bodies of men Modernity thus exercises a double logic that supports male privilege while diminishing the physical difference used to legitimate that privilege By focusing on the male body this wide ranging study proposes that crises of masculinity may be structural and thus inescapable features of life in our world **Program of the Annual Meeting - American Historical Association** American Historical Association, 2006

The American psychologist, 1959 **Human Factors Digest**, 1989 **Collaborative Crew Performance in Complex Operational Systems** North Atlantic Treaty Organization. Research and Technology Organization. Human Factors and Medicine Panel. Symposium, 1998 Contains the proceedings of the first RTO Human Factors and Medical Panel HFM Symposium held in Edinburgh Scotland April 20-22 1998 including the Technical Evaluation Report and Keynote Addresses Research and applications in human factors has frequently only considered individual operator interfaces for limited work domains in well defined scenarios as evaluated by unitary measures As we progress towards the next millennium complex operations will increasingly require consideration and integration of the collaborative

element wherein crew performance becomes a critical factor for success The goal of this symposium has been to bring together a global perspective on issues and factors that need to be understood when systems design is focused on the crew operating in a complex environment Hence the papers contained in these proceedings give the reader a broad multidisciplinary view of needs requirements ongoing research and development projects and various research agendas that will bring about new technologies approaches and measures with regard to collaborative crew performance The papers and multiple perspectives contained in these proceedings provide a baseline for understanding many elements of crew performance and in that sense will be valuable for the human factors specialist that must now design for the collaborative element and be concerned with the broad bandwidth of complexities within the operational setting Additionally the volume provides information for researchers scientists and engineers in many different areas who find themselves immersed in collaborative systems design
