Transformations in Consciousness Franklin Merrell-Wolff, 1995-01-01 This book presents a philosophy that includes the enlightenment experience a philosophy grounded on the authority of direct realization resulting from transformation in consciousness

Transformations in Consciousness Franklin Merrell-Wolff, 1995-07-06 This book presents a philosophy that includes the enlightenment experience a philosophy grounded on the authority of direct realization resulting from transformation in consciousness

American Gnosis Arthur Versluis, 2023-10-20 Drawing from the early Christian heretical category of Gnosticism American Gnosis explores the emergence of new forms of Gnostic religion throughout the Americas Arthur Versluis explores the concept of Gnosis and examines neo gnostic elements in contemporary American culture including in religion literature film and politics

Going beyond the Pairs Dennis McCort, 2001-06-21 Argues that German Romanticism Zen Buddhism and deconstruction for all their cultural differences are three expressions of a universal vision

Science as a Spiritual Practice Imants Barušs, 2015-10-21 Science as a Spiritual Practice is in three parts In the first part the author argues that there are problems with materialism and that self transformation could lead individual scientists to more comprehensive ways of understanding reality In the second part he takes on the contentious notion of inner knowledge and shows how access to inner knowledge could be possible in some altered states of consciousness The third part is an analysis of the philosophy of Franklin Wolff who claimed that the transcendent states of consciousness which occurred for him resulted from his mathematical approach to spirituality

The Secular Religion of Franklin Merrell-Wolff Dave Vliegenthart, 2018-01-16 In The Secular Religion of Franklin Merrell Wolff An Intellectual History of Anti intellectualism in Modern America Dave Vliegenthart offers an account of the life and teachings of the modern American mystic Franklin Merrell Wolff 1887 1985 who combined secular and religious sources from eastern and western traditions in order to elaborate and legitimate his metaphysical claim to the realization of a transcendental reality beyond reason Using Merrell Wolff as a typical example of a modern western guru Vliegenthart investigates the larger sociological and historical context of the ongoing grand narrative that asserts a widespread anti intellectualism in modern American culture exploring developments in religious philosophical and psychological discourses in North America from 1800 until the present

Scale Theory Joshua DiCaglio, 2021-11-30 A pioneering call for a new understanding of scale across the humanities How is it possible that you are simultaneously cells atoms a body quarks a component in an ecological network a moment in the thermodynamic dispersal of the sun and an element in the gravitational whirl of galaxies In this way we routinely transform reality into things already outside of direct human experience things we hardly comprehend even as we speak of DNA climate effects toxic molecules and viruses How do we find ourselves with these disorienting layers of scale Enter Scale Theory which provides a foundational theory of scale that explains how scale works the parameters of scalar thinking and how scale refigures reality that teaches us how to think in terms of scale no matter where our interests may lie Joshua DiCaglio takes us

on a fascinating journey through six thought experiments that provide clarifying yet provocative definitions for scale and new ways of thinking about classic concepts ranging from unity to identity Because our worldviews and philosophies are largely built on nonscalar experience he then takes us slowly through the ways scale challenges and reconfigures objects subjects and relations Scale Theory is in a sense nondisciplinary weaving together a dizzying array of sciences from nanoscience to ecology with discussions from the humanities from philosophy to rhetoric In the process a curious pattern emerges attempts to face the significance of scale inevitably enter terrain closer to mysticism than science Rather than dismiss this connection DiCaglio examines the reasons for it redefining mysticism in terms of scale and integrating contemplative philosophies into the discussion The result is a powerful account of the implications and challenges of scale attuned to the way scale transforms both reality and ourselves

Magic and Mysticism Arthur Versluis, 2007-05-22 Magic and Mysticism An Introduction to Western Esoteric Traditions is a concise overview from antiquity to the present of all the major Western religious esoteric movements Topics covered include alchemy Gnosticism Hermeticism Rosicrucianism Theosophy and many more Magic and Mysticism is ideal for students of Mysticism and New Religious Movements as well as for general readers of Metaphysics and Esoterica

Cultivating Perfection Louis Komjathy, 2007-09-30 This important work focuses on early Quanzhen Complete Perfection Daoism a twelfth century Daoist religious movement and subsequent monastic order Emphasis in this first study to approach Quanzhen from a comparative religious studies perspective is placed on the complex interplay among views of self specific training regimens and the types of experiences that were expected to follow from dedicated praxis On the basis of historical contextualization and textual analysis it is demonstrated that in its formative and incipient organized phases Quanzhen was a Daoist religious community consisting of a few renunciants dedicated to religious praxis The study proper is followed by a complete annotated translation of a text attributed to the founder which represents one of only two early Quanzhen texts translated to date Subsequent appendices address issues of dating and contents of the early textual corpus as well as technical Quanzhen religious terminology

Chinese Metaphysics and its Problems Chenyang Li, Franklin Perkins, 2015-04-30 This volume of new essays is the first English language anthology devoted to Chinese metaphysics The essays explore the key themes of Chinese philosophy from pre Qin to modern times starting with important concepts such as yin yang and qi and taking the reader through the major periods in Chinese thought from the Classical period through Chinese Buddhism and Neo Confucianism into the twentieth century philosophy of Xiong Shili They explore the major traditions within Chinese philosophy including Daoism and Mohism and a broad range of metaphysical topics including monism theories of individuation and the relationship between reality and falsehood The volume will be a valuable resource for upper level students and scholars of metaphysics Chinese philosophy or comparative philosophy and with its rich insights into the ethical social and political dimensions of Chinese society it will also interest students of Asian studies and Chinese intellectual history
