Transformers Retribution:

Transformers: Retribution David J. Williams, Mark Williams, 2014-01-28 For decades Transformers fans across the globe have marveled at the mighty clashes of Megatron and Optimus Prime and speculated about their arrival on planet Earth Now in Transformers Retribution the prequel to the Transformers animated series the epic odyssey of these two great warriors is finally revealed as Autobots and Decepticons battle one another and the most diabolic foe they've ever encountered Aboard the Ark Optimus Prime leads his Autobots through deep space searching for the AllSpark so vital to their home planet Cybertron Megatron's not far behind and his Decepticons are itching for war But a mysterious planet conceals an enemy far more cunning and powerful the Quintessons Masters of tyranny technology and twisted double crosses the Quintessons are out to enslave both Autobots and Decepticons Their deadly bag of tricks includes fiendish trials and a secret link all the way back to Cybertron where Shockwave is wreaking havoc with supercomputer Vector Sigma In the coming conflagration Star Seekers Wreckers Alpha Trion and Sharkticons all have their parts to play For none can dodge the Quintesson juggernaut of evil and none will escape the cataclysmic life and death battles that will catapult Autobots and Decepticons to Earth

Transformers David J. Williams, Mark S. Williams, 2014 Optimus Prime leads his Autobots through deep space and Megatron's not far behind His Decepticons are itching for war A mysterious planet conceals an enemy far more cunning and powerful the Quintessons

Transformers Jacquelyn Small, 1994 Small one of the pioneers of transpersonal psychology has won wide professional acceptance for her complete model of this new approach to human development Now revised for individual seekers as well as therapists Transformers shows how we can develop spiritual knowledge and power wisdom and ultimately enlightenment

Regulators Gone Wild Rich Trzupek, 2012-01-31 Environmental regulations aren't always about environmental protection Today more than ever regulations seem to have been designed by activists rather than scientists Regulators Gone Wild is the shocking inside story of how the green movement and big government have united to stifle American productivity and hamstring American innovation not by design but as the inevitable consequence of pursuing a utopian vision of environmental purity As a respected scientist and consultant Rich Trzupek has seen the EPA lose its focus on cleaning up the environment turning instead to mindless bureaucracies and sweeping policies with negligible environmental impact Meanwhile the green industry continues to exploit bad science to sell the public on their aggressive agenda The result Trzupek reports is a plethora of regulations that have warped incentives and thwarted American industry's ability to create long term wealth With these forces now focused on climate change and initiatives to reduce fossil fuel use the march to castigate and control industry Regulators Gone Wild contends is entering an unprecedented and dangerous phase that could put the economic fortunes of the country in peril for generations This enhanced ebook features the bonus video The EPA's Green Tyranny

The Materiality of Magic Ceri Houlbrook, Natalie Armitage, 2015-12-31 The subject of magic has long been considered peripheral and sensationalist the word itself having become something of an academic taboo However beliefs in magic and the rituals that surround them are extensive as are their material manifestations and to avoid them is to ignore a prevalent aspect of cultures worldwide from prehistory to the present day The Materiality of Magic addresses the value of the material record as a resource in investigations into magic ritual practices and popular beliefs The chronological and geographic focuses of the papers presented here vary from prehistory to the present day including numinous interpretations of fossils and ritual deposits in Bronze Age Europe apotropaic devices in Roman and Medieval Britain the evolution of superstitions and ritual customs from the voodoo doll of Europe and Africa to a Scottish wishing tree and an exploration of spatiality in West African healing practices The objectives of this collection of nine papers are twofold First to provide a platform from which to showcase innovative research and theoretical approaches in a subject which has largely been neglected within archaeology and related disciplines and secondly to redress this neglect The papers were presented at the 2012 Theoretical Archaeology Group TAG conference in Liverpool
