Transforming Tales Transforming Tales:

Transforming Tales Miranda Griffin, 2015-08-27 *Transforming Tales* argues that the study of transformation is crucial for understanding a wide range of canonical work in medieval French literature. From the *lais* and Arthurian romances of the twelfth and thirteenth centuries through the *Roman de la Rose* and its widespread influence to the fourteenth century *Ovide moralis* and the vast prose cycles of the late Middle Ages, metamorphosis is a recurrent theme resulting in some of the best known and most powerful literature of the era. *Transforming Tales* is the first book in English to explore in detail the importance of ideas of metamorphosis in French literature from the twelfth to the fifteenth centuries. This book's purpose is twofold: it traces a series of figures—the werewolf, the snake woman, the nymph, the magician, amongst others—as they are transformed within individual texts, and it also examines the way in which the stories of transformation themselves become rewritten during the course of the Middle Ages. Griffin's approach combines close readings and comparisons of literary texts with readings informed by modern critical theories which are grounded in many of the ideas raised by medieval metamorphosis: the body, gender, identity, and categories of life. Literary depictions and reworkings of transformation raise questions about medieval understandings of the differences between human and animal, man and woman, God and man, life and death; these are the questions explored in *Transforming Tales*.

Transforming Tales Rob Parkinson, 2009 This book reveals the true impact of stories on our lives and how stories can create feelings of hope, take away psychological distress, and even stimulate the immune system. It contains over 90 short stories and allows readers to understand the patterns storytellers use to captivate attention and how truths are often encapsulated in stories.
