Wargaming for Leaders: Strategic Decision Making from the Battlefield to the Boardroom Mark L. Herman, Mark D. Frost, 2008-12-01 If you had the opportunity to probe the future make strategic choices and view their consequences before making expensive and irretrievable decisions wouldn't you take advantage of it Of course you would And in a world of asymmetrical conflict security threats intense global competition and economic uncertainty there is an even higher premium on road testing plans and strategies whether they're spearheaded by government organizations transnational corporations or emerging megacommunities Wargaming for Leaders provides a methodology to get at the issues that one leader no matter how visionary cannot grasp on his or her own How By bringing together the real experts on the topic at hand to wage cognitive warfare Through tapping the collective wisdom surrounding an issue experts can experience the future in a risk free environment and find answers to questions that had not been on their radar often with unexpected and startling results With examples from the fields of military corporate and public policy three wargaming developers from Booz Allen Hamilton deliver compelling insights on this problem solving method including fascinating details on how A large equipment manufacturer determined whether making a merger was strategically right for its business growth as well as which technology investments it needed to drop A four star U S general tested his war plan for Iraq and uncovered specific fixes that might have prevented a prolonged conflict An increasingly clogged air traffic system faced a security versus convenience issue determined whether military airspace could be used during peak demand periods Wargaming allows organizations of every type and every size to organize information plot out scenarios and tap into the collective expertise of participants The results allow everyone to identify and tackle obstacles solve problems and find new ways to innovate and further performance goals Get ready for the battle of your organizational life and prepare to reap the spoils of victory *Simulation and Wargaming* Charles Turnitsa, Curtis Blais, Andreas Tolk, 2022-01-06 Understanding the potential synergies between computer simulation and wargaming Based on the insights of experts in both domains Simulation and Wargaming comprehensively explores the intersection between computer simulation and wargaming This book shows how the practice of wargaming can be augmented and provide more detail oriented insights using computer simulation particularly as the complexity of military operations and the need for computational decision aids increases The distinguished authors have hit upon two practical areas that have tremendous applications to share with one another but do not seem to be aware of that fact The book includes insights into The application of the data driven speed inherent to computer simulation to wargames The application of the insight and analysis gained from wargames to computer simulation The areas of concern raised by the combination of these two disparate yet related fields New research and application opportunities emerging from the intersection Addressing professionals in the wargaming modeling and simulation industries as well as decision makers and organizational leaders involved with wargaming and simulation Simulation and Wargaming offers a multifaceted and

insightful read and provides the foundation for future interdisciplinary progress in both domains *Signal* ,2008

Historical Simulation and Wargames Riccardo Masini,2024-09-18 This book is a comprehensive study on analog historical simulation games exploring both their theoretical concepts and practical solutions It considers the various ways used by simulation games to depict the different dynamics of historical events and analyzes how commercial analog miniature and board wargames can become valuable tools for historical research and provide a more modern and captivating interpretation of past events The nature of simulation is discussed exposing its differences with other forms of ludic activity both analog and digital as well as intellectual speculation Many of the most common game mechanics are analyzed in depth and in their practical use to answer whether reconstructive simulations dedicated to historical episodes can provide valuable reliable and useful insights for researchers It critically examines the challenges presented to game designers that look to produce an accurate even if not necessarily complex simulation of historical events The book will be of great interest to those curious about the potential applications of such a powerful research and experimental tool for historical sociologic and anthropologic research as well as wargaming and board gaming enthusiasts looking to gain a deeper understanding of the inner workings of historical simulations

The Craft of Wargaming Jeffrey Appleget,Robert Burks,Frederick Cameron,2020-09-01 The Craft of Wargaming is designed to support supervisors planners and analysts who use wargames to support their organizations missions The authors focus on providing analysts and planners with a clear methodology that allows them to initiate design develop conduct and analyze wargames Built around the analytic wargaming construct organizations or individuals can easily adapt this methodology to construct educational and experiential wargames The book breaks the wargame creation process into five distinct phases Initiate Design Develop Conduct and Analyze For each phase the authors identify key tasks a wargaming team must address to have a reasonable chance at designing developing conducting and analyzing a successful wargame While these five stages are critical to the process of constructing any wargame it should be understood that the craft of wargaming is learned through active participation not by reading or watching This craft must be practiced as part of the learning process and the included practical exercises provide an opportunity to experience the construction of an analytical wargame The authors also discuss critical supervisory tasks that are essential to manage the wargaming team s efforts While the creators are focused on the design and development of the game itself supervisors must set conditions for the wargame to be a success best practices and beware of the pitfalls that may set the wargame up to fail worst practices The book demonstrates using the analytical wargaming framework to create relevant and useful planning wargames It also reinforces using the analytical wargaming framework for seminar wargames that without rigor are useless The book demonstrates the benefits of using the analytical wargaming process to design educational and experiential games

Decision Making for the Strategic Leader George E. Rector, Peter T. Tarpgaard, William F. Foster, Dietrich Kuhlmann, Michala M. Smith, Harry James Maihafer, Army War College (U.S.), 1997 Decision making is a process whereby a leader when confronted with a problem selects a course of action or solution from a set of possible courses of action Since there is generally some uncertainty about the future we cannot be sure of the consequences of the decision that is chosen Soundness and timeliness in decision making depend to a great extent on the method used This is a creative process connected with the search for the new and best means of successful accomplishment of the mission Inasmuch as the process is basically creative and cognitive in nature the most important requirement on the process for making a decision is its correspondence to dialectics the theory of knowledge logic and the principles of military art The achievements and conclusions of such sciences as psychology mathematics and cybernetics can be of great assistance to the commander making decisions today His mission consequently is to master logical and mathematical methods of thinking and cognizing developed by modern science Decision making during the Information Age has become an enormously complex undertaking There has been an increasing tendency to turn to quantitative techniques and models as a potential means for assisting the decision maker The purpose of this paper is to describe the decision making process from a simple systems approach to a more complex and dynamic approach focus on the essence of the decision making process and to provide a representative sample of quantitative techniques for making decisions as a strategic leader It is hoped that this paper will serve as a basis for a course that will assist future senior leaders in the process of decision making and may act as a connecting force between the analytical techniques on one hand and the recognitional techniques on the other
