Thinking Through Rituals Philosophical Perspectives:

Thinking Through Rituals Kevin Schilbrack, 2004-08-02 *Thinking Through Rituals* explores religious ritual acts and their connection to meaning and truth building upon their special status as virtually pure forms of belief in action **Thinking Through Rituals** Kevin Schilbrack, 2004 This text proposes a new philosophical understanding of rituals as strategies giving access to knowledge of the world in opposition to traditional approaches which see rituals as forms of social organization and control **Knowing Body, Moving Mind** Patricia Q Campbell, 2011-09-02 *Knowing Body Moving Mind* explores ritualizing and learning in meditation classes at two Buddhist centers in Toronto Based on interviews with students and teachers it explores the ways formal Buddhist practices generate learning discovering that body and mind together gain new skills and understanding by way of embodied gestural rites *Myth and Philosophy in Platonic Dialogues* Omid Tofighian, 2016-11-15 This book rethinks Plato's creation and use of myth by drawing on theories and methods from myth studies religious studies literary theory and related fields Individual myths function differently depending on cultural practice religious context or literary tradition and this interdisciplinary study merges new perspectives in Plato studies with recent scholarship and theories pertaining to myth Significant overlaps exist between prominent modern theories of myth and attitudes and approaches in studies of Plato's myths Considering recent developments in myth studies this book asks new questions about the evaluation of myth in Plato Its appreciation of the historical conditions shaping and directing the study of Plato's myths opens deeper philosophical questions about the relationship between philosophy and myth and the relevance of myth studies to philosophical debates It also extends the discussion to address philosophical questions and perspectives on the distinction between argument and narrative *Journal of Ritual Studies*, 2003 **Theorizing Rituals: Issues, topics, approaches, concepts** Joannes Augustinus Maria Snoek, 2006 Volume one of *Theorizing Rituals* assembles 34 leading scholars from various countries and disciplines working within this field The authors review main methodological and meta theoretical problems part I followed by some of the classical issues part II Further chapters discuss main approaches to theorizing rituals part III and explore some key analytical concepts for theorizing rituals part IV The volume is provided with extensive indices **The Quaker Condition** Pink Dandelion, Peter Jeffrey Collins, 2008 This book focuses primarily on what we have termed the Quaker Condition TM It looks sociologically at the condition of present day British Quakerism This original and innovative collection contributes to several different though obviously connected fields within the study of religion It operates on five levels In the first place the volume is the first to represent substantially the contribution of social science to the study of Quakerism and therefore provides useful comparative material for those whose focus is on other faith groups Second the book focuses largely on British Quakerism and so enriches the pool of resources relating to the sociology of British religion and British culture more generally Third there are very few sociological volumes dedicated to the analysis of a single faith group Fourth the book represents an in depth study of a liberal faith group when liberal religion is the focus of much

scholarly debate at present particularly with reference to the secularisation thesis The study of British Quakerism is especially fascinating in this regard given how the group can be described almost as hyper or ultra liberal prefiguring many of the developments which may overtake currently more conservative groups Fifth the volume represents a particularly collective way of working of interest to all those concerned with the methodology of social research with the design and construction of the volume jointly agreed by all the authors Regular meetings of the group and a conference based on these chapters has culminated in a book far more interwoven and layered than a typical edited collection TM

Philosophy and the Study of Religions Kevin Schilbrack, 2014-03-03 Philosophy and the Study of Religions A Manifesto advocates a radical transformation of the discipline from its current narrow focus on questions of God to a fully global form of critical reflection on religions in all their variety and dimensions Opens the discipline of philosophy of religion to the religious diversity that characterizes the world today Builds bridges between philosophy of religion and the other interpretative and explanatory approaches in the field of religious studies Provides a manifesto for a global approach to the subject that is a practice centred rather than a belief centred activity Gives attention to reflexive critical studies of religion as socially constructed and historically located *American Book Publishing Record*, 2007

Women and Religion: Texts, rituals, and authoritative knowledge Pamela Edith Klassen, Shari Golberg, Danielle Lefebvre, 2009 This collection is an essential research tool for all students specializing in religion and women s studies and is equally useful to those working in related fields such as anthropology cultural studies history literary studies philosophy political science psychology and theology By tracing the evolution of the topic from the beginnings of feminist research on religion to more contemporary debates about categorizations of gender in the study of religion this four volume collection serves the needs of both specialist and generalist users Women and Religion includes essays treating a broad range of religious traditions while focusing on particular methodological and theoretical concerns common to the study of women and religion Organized thematically each volume includes the most formative theoretical contributions to the field grouped together with articles that explore a particular set of issues from a range of traditions with the use of methodologies drawn from anthropology history sociology textual criticism and religious studies Each volume s introductory essay explicitly problematizes the central categories of analysis operating in the study of women and religion for example women gender religion body science and colonialism while also setting the articles in their historical context

Mediating Across Difference Morgan J. Brigg, Roland Bleiker, 2011-01-31 Mediating Across Difference is based on a fundamental premise to deal adequately with conflict and particularly with conflict stemming from cultural and other differences requires genuine openness to different cultural practices and dialogue between different ways of knowing and being Equally essential is a shift away from understanding cultural difference as an inevitable source of conflict and the development of a more critical attitude toward previously under examined Western assumptions about conflict and its resolution To address the ensuing challenges this book introduces and explores some of the rich insights into

conflict resolution emanating from Asia and Oceania Although often overlooked these local traditions offer a range of useful ways of thinking about and dealing with difference and conflict in a globalizing world To bring these traditions into exchange with mainstream Western conflict resolution the editors present the results of collaborative work between experienced scholars and culturally knowledgeable practitioners from numerous parts of Asia and Oceania The result is a series of interventions that challenge conventional Western notions of conflict resolution and provide academics policy makers diplomats mediators and local conflict workers with new possibilities to approach prevent and resolve conflict Contributors Roland Bleiker Volker Boege Morgan Brigg Stephen Chan Frans de Jalong Sr Lorraine Garasu Mary Graham Hoang Young ju Carwyn Jones Joy Kere Debra McDougall Norifumi Namatame Chengxin Pan Oliver Richmond Deborah Bird Rose Muhadi Sugiono Tarja V yrynen Polly O Walker Jacqueline Wasilewski

Reflexions in the Flesh Nick Crossley,2006-09 In this book Nick Crossley explores the concept of reflexive embodiment how we as embodied beings reflect upon our own embodiment He considers the ways in which we modify and maintain our bodies from brushing our teeth and washing our faces through to tattooing and bodybuilding Some forms of body work are demanded by social conventions others represent legitimate choices and others still deviate from or resist the norm He argues that a proper understanding of reflexive embodiment must be alert to these differences and that we must appreciate that our bodies are not passive or inert substances that we can mould as we like They change in ways that we do not intend and of which we are not aware and they may prove difficult to change in the ways we do intend Many theorists in sociology offer perspectives on the link between society and body modification mostly focused in one way or another upon modernity
