Thinking In Time An Introduction To Henri Bergson

Terry C. Jones

Thinking In Time An Introduction To Henri Bergson:

Thinking in Time Suzanne Guerlac, 2006 In recent years we have grown accustomed to philosophical language that is intensely self conscious and rhetorically thick often tragic in tone It is enlivening to read Bergson who exerts so little rhetorical pressure while exacting such a *Time, Temporality and Legal Judgment* Tanzil Chowdhury, 2020-05-25 This book challenges the correspondence theory of judicial fact construction that legal rules resemble and subsume facts out there and instead provides an account of judicial fact construction through legally produced times or adjudicative temporalities that structure legal subject and event formation in legal judgement Drawing on Bergsonian and Gadamerian theories of time this book details how certain adjudicative temporalities can produce fully willed and autonomous subjects through time framed legal events in effect the paradigmatic liberal legal subject or how alternative adjudicative temporalities may structure legal subjects that are situated and constituted by social structures The consequences of this novel account of legal judgement are fourfold The first is that judicial fact construction is not exclusively determined by the legal rule s but by adjudication s production of temporalities The second is that the selection between different adjudicative temporalities is generally indeterminate though influenced by wider social structures As will be argued social structures framed as a particular type of past produced by certain adjudicative temporalities may either be incorporated in the rendering of the legal event or elided The third is that with the book s focus on criminal law different deployments of adjudicative temporalities effect responsibility ascription Finally it is argued that the demystification of time as that which structures event and subject formation reveals another way in which to uncover the politics of legal judgement and the potential for its transformative potential through either its inclusion or its elision of social structures in adjudication s determination of facts This book will be of interest to students and scholars in the field of legal judgement legal theory and jurisprudence **Heidegger's**

Alternative History of Time Emily Hughes, Marilyn Stendera, 2024-04-02 This book reconstructs Heidegger s philosophy of time by reading his work with and against a series of key interlocutors that he nominates as being central to his own critical history of time In doing so it explains what makes time of such significance for Heidegger and argues that Heidegger can contribute to contemporary debates in the philosophy of time Time is a central concern for Heidegger yet his thinking on the subject is fragmented making it difficult to grasp its depth complexity and promise Heidegger traces out a history that focuses on the conceptualisations of time put forward by Aristotle Plotinus Augustine Kant Hegel Bergson and Husserl an alternative history of time that challenges how time has been defined and studied within both philosophy and the sciences This book explores what happens when we take seriously Heidegger s claim that these seven figures are essential to any understanding of time setting out what this can tell us about existence possibility and philosophy as a historical discipline Heidegger s Alternative History of Time will appeal to scholars and advanced students working on Heidegger phenomenology the philosophy of time and the history of philosophy **UC Irvine Law Review** ,2014 *MLN.* ,2005 *MLN* pioneered the

introduction of contemporary continental criticism into American scholarship Critical studies in the modern languages Italian Hispanic German French and recent work in comparative literature are the basis for articles and notes in MLN Four single language issues and one comparative literature issue are published each year Derrida and the Time of the Political Pheng Cheah, Suzanne Guerlac, 2009-01-16 A collection assessing the implications of Derridas thought for contemporary political theory and politics *Bibliografisch Repertorium Van de Wijsbegeerte* ,2007 Comptes Rendus Philosophiques ,2007

Metahistory and Memory Makito Yurita, 2008 **The Virginia Quarterly Review** ,2006 Philosophy, an Introduction to the Art of Wondering James Lee Christian, 1986 *Journal of the History of Ideas* ,2006 An international quarterly devoted to intellectual history **Choice** ,2006-09 **The History of Continental Philosophy** Alan D. Schrift, 2011-01-01 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume History of Continental Philosophy will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant s philosophy and its initial reception the History traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment Throughout the volumes examine important philosophical figures and developments in their historical political and cultural contexts The first reference of its kind A History of Continental Philosophy has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers texts and movements in rigorous yet jargon free essays suitable for both undergraduates and seasoned specialists These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy surveying the distinctive sometimes overlapping characteristics and approaches of each tradition Featuring helpful overviews of major topics and plotting road maps to their underlying contexts A History of Continental Philosophy is destined to be the resource of first and last resort for students and scholars alike **The Invention of Time and Space** Patrice F. Dassoigne, 2016-09-30 This investigation of time and space is motivated by gaps in our current understanding by the lack of definitions by our failure to appreciate the nature of these entities by our inability to pin down their properties The author s approach is based on two key ideas The first idea is to seek the geo historical origins of time and space concepts A thorough investigation of a diversified archaeological corpus allows him to draft coherent definitions it furthermore gives clues as to whether time and space were discovered or invented The second idea is to define the units before trying to define space and time The results presented here are unexpected Time and space were not discovered in nature but they were invented time is not a phenomenon and space has no materiality they are only concepts This runs

contrary to the opinion of most scientific and the philosophical authorities although one would seek in vain for a theoretical validation of the conventional position This book will provide much food for thought for philosophers and scientists as well as interested general readers Bibliographic Index ,2009 **Publications of the Modern Language Association of America** ,2009 **The British National Bibliography** Arthur James Wells,2006 **The SAGE Handbook of Process Organization Studies** Ann Langley,Haridimos Tsoukas,2016-12-14 The SAGE Handbook of Process Organization Studies provides a comprehensive and timely overview of the field This volume offers a compendium of perspectives on process thinking process organizational theory process research methodology and empirical applications The emphasis is on a combination of pedagogical contributions and in depth reviews of current thinking and research in each of the selected areas combined with the development of agendas for future research The Handbook is divided into five sections Part One Process Philosophy Part Two Process Theory Part Three Process Methodology Part Four Process Applications Part Five Process Perspectives Thinking Fred Casey,1926
