## **Understanding Neighbourhood Dynamics New Insights For Neighbourhood Effects Research:**

*Understanding Neighbourhood Dynamics* Maarten van Ham, David Manley, Nick Bailey, Ludi Simpson, Duncan Maclennan, 2012-09-27 This rare interdisciplinary combination of research into neighbourhood dynamics and effects attempts to unravel the complex relationship between disadvantaged neighbourhoods and the life outcomes of the residents who live therein. It seeks to overcome the notorious difficulties of establishing an empirical causal relationship between living in a disadvantaged area and the poorer health and well-being often found in such places. There remains a widespread belief in neighbourhood effects that living in a poorer area can adversely affect residents' life chances. These chapters caution that neighbourhood effects cannot be fully understood without a profound understanding of the changes to and selective mobility into and out of these areas. Featuring fresh research findings from a number of countries and data sources including from the UK, Australia, Sweden and the USA, this book offers fresh perspectives on neighbourhood choice and dynamics as well as new material for social scientists, geographers and policy makers alike. It enriches neighbourhood effects research with insights from the closely related but currently largely separate literature on neighbourhood dynamics.

**Neighbourhood Effects or Neighbourhood Based Problems?** David Manley, Maarten van Ham, Nick Bailey, Ludi Simpson, Duncan Maclennan, 2013-06-26 This edited volume critically examines the link between area-based policies, neighbourhood-based problems and neighbourhood effects. The idea that living in disadvantaged neighbourhoods has a negative effect on residents' life chances over and above the effect of their individual characteristics. Over the last few decades, Western governments have persistently pursued area-based policies to fight such effects despite a lack of evidence that they exist or that these policies make a difference. The first part of this book presents case studies of perceived neighbourhood-based problems in the domains of crime, health, educational outcomes and employment. The second part of the book presents an international overview of the policies that different governments have implemented in response to these neighbourhood-based problems and discusses the theoretical and conceptual processes behind place-based policy making. Case studies are drawn from a diverse range of countries including the United Kingdom, The Netherlands, Australia, Canada and the USA.

*Research Handbook on Urban Sociology* Miguel A. Martínez, 2024-04-12 Emphasising the social, critical and situated dimensions of the urban, this comprehensive Research Handbook presents a unique collection of theoretical and empirical perspectives on urban sociology. Bringing together expert contributors from across the world, it provides a rich overview and research agenda for contemporary urban sociological scholarship.

**Ethnic Spatial Segregation in European Cities** Hans Skifter Andersen, 2019-05-15 This book provides the first in-depth interpretation of how to understand the causes of ethnic residential segregation across Western European countries and the USA. In many countries, ethnic minorities have obtained low-quality housing and may be concentrated in certain parts of cities. This book asks to what extent ethnic segregation can be assigned to special preferences for housing and neighbourhoods among ethnic minorities. Is it the behaviour of the native

majority or is it a result of housing and urban policies Ethnic segregation differs greatly across European countries and cities Chapters discuss the extent to which these differences can be explained by welfare state systems levels of immigration and the ethnic composition of minorities The book also considers the impact of housing policy and the spatial structure of urban housing markets created by urban planning and policies This book will appeal to teachers students and researchers working with segregation urban sociology and geography It will also be valuable to civil servants in central and local governments who are working with measures to combat ethnic segregation and its consequences

**Cities, Economic Inequality and Justice** Edwin Buitelaar, Anet Weterings, Roderik Ponds, 2017-07-28 Increasing economic inequality in cities and the spatial translation of that into more segregated neighbourhoods is top of the political agenda in developed countries While the overall living standards have increased in the last century the focus has now shifted from poverty to economic differences with a particular focus on the gap between the very poor and the ultra rich The authors observe a common view among policy makers and researchers alike that urban economic inequality and segregation are increasing that this increase is bad and that money and people in the case of segregation need to be redistributed in response In six compact chapters this book enriches and broadens the debate Chapters bring together the literature on the social effects of economic inequality and segregation and question whether there are sizable effects and what their direction positive or negative is The often conflated concepts of economic inequality and segregation and social injustice is disentangled and the moral implications are reflected on The book is essential reading for students and academics of Planning Theory Planning Ethics Urban Geography Urban Economics Economic Geography and Urban Sociology

Rethinking Neighborhoods William A.V. Clark, 2024-05-02 Although neighborhoods are sometimes perceived as just a backdrop to our lives there is considerable evidence that they are central to our sense of wellbeing and in the functioning of the city Rethinking Neighborhoods is about these areas of geography what we know about how neighborhoods function why they matter and how we chose where to live

Handbook of Urban Segregation Sako Musterd, 2020-03-28 The Handbook of Urban Segregation scrutinises key debates on spatial inequality in cities across the globe It engages with multiple domains including residential places public spaces and the field of education In addition it tackles crucial group dimensions across race class and culture as well as age groups the urban rich middle class and gentrified households This timely Handbook provides a key contribution to understanding what urban segregation is about why it has developed what its consequences are and how it is measured conceptualised and framed

**Arrival Neighborhoods in Europe since the mid-19th Century** David Templin, 2024-08-26 This book uses the concept of arrival spaces to examine the relationship between migration processes social infrastructures and the transformation of urban spaces in Europe since the mid 19th century Case studies cover cities from London to Palermo and from Antwerp to St Petersburg including both metropolises and small towns The chapters examine the emergence of settlement patterns the functioning of arrival infrastructures and the public representations of neighborhoods which have been shaped by internal or

international migrations By understanding these neighborhoods as spaces of arrival and as infrastructural hubs this volume offers a new perspective on the profound impact of migration on European cities in modern and contemporary history This volume makes a valuable contribution to both migration research and urban history and will be of interest to researchers and students studying the relationship between cities and migration in Europe s past and present Neighborhood Decline Ronald van Kempen,Gideon Bolt,Maarten van Ham,2018-10-18 The global financial and economic crisis that hit the world since 2008 has affected the lives of many people all over the world and resulted in declining incomes rising unemployment foreclosures forced residential moves and cut backs in government expenditure The extent to which the crisis has affected urban neighborhoods and has led to rising intra urban inequalities has not yet received much attention The implemented budget cuts and austerity programs of national and local governments are likely to have hit some neighborhoods more than others The authors of this this book which come from a variety of countries and disciplines show that the economic crisis has affected poor neighborhoods more severely than more affluent ones The tendency of the state to retreat from these neighborhoods has negative consequences for their residents and may even nullify the investments that have been made in many poor neighborhoods in the recent past This book was originally published as a special issue of Urban Geography

**Entrepreneurship in Cities** Colin Mason,Darja Reuschke,Stephen Syrett,Maarten van Ham,2015-12-18

Entrepreneurship in Cities focuses on the neglected role of the home and the residential neighbourhood context for entrepreneurship and businesses within cities The overall objective of the book is to develop a new interdisciplinary perspective that links entrepreneurship research with neighbourhood and urban studies A key contribution is to show that entrepreneurship in cities is more than agglomeration economies and high tech clusters This is the first book to connect entrepreneurship with neighbourhoods and homes recognising that business activity in the city is not confined to central business districts high streets and industrial estates but is also found in residential neighbourhoods It highlights the importance of home based businesses for the economy of cities These often overlooked types of businesses and workers significantly contribute to the buzz that makes cities favourable places to live and work
