The Organ Shortage Crisis in America Andrew Michael Flescher, 2018-03-01 Nearly 120 000 people are in need of healthy organs in the United States Every ten minutes a new name is added to the list while on average twenty people die each day waiting for an organ to become available Worse our traditional reliance on cadaveric organ donation is becoming increasingly insufficient and in recent years there has been a decline in the number of living donors as well as in the percentage of living donors relative to overall kidney donors Some transplant surgeons and policy advocates have responded to this shortage by arguing for the legalization of the sale of organs among living donors Andrew Flescher objects to this approach by going beyond concerns traditionally cited about social justice commodification and patient safety and moving squarely onto the terrain of discussing what motivates major and costly acts of human selflessness What is the most efficacious means of attracting prospective living kidney donors Flescher drawing on literature in the fields of moral psychology and economics as well as on scores of interviews with living donors suggests that inculcating a sense of altruism and civic duty is a more effective means of increasing donor participation than the resort to financial incentives He encourages individuals to spend time with patients on dialysis in order to become acquainted with their plight and as an alternative to lump sum payments consider innovative solutions that positively impact living donor participation that do not undermine the spirit of the National Organ Transplant Act of 1984 This book not only re examines the important debate over whether to allow the sale of organs it is also the first volume in the field to take a close look at alternative solutions to the organ shortage crisis

Organ donation - og behovet for en ny model Andreas Albertsen, 2020-09-03 Lige nu venter over 400 danskere på et nyt organ der kan forbedre og forlænge deres liv De venter i usikkerhed og nogle venter forgæves I Danmark dør der hver anden uge et menneske der venter på en transplantation fordi vi ikke har organer nok til at redde alle Organdonation og behovet for en ny model undersøger hvorfor det danske system til organdonation ikke er godt nok Herhjemme har vi aktivt tilvalg mens andre lande som Wales Belgien og New Zealand har andre donationsmodeller De har eksperimenteret med både aktivt fravalg og tvungent valg og deres

resultater viser at vi godt kan få flere til at donere på en måde der er etisk forsvarlig Bogen diskuterer således også de filosofiske problemstillinger der knytter sig til organdonation Om den enkelte kan bestemme over sin egen krop efter døden Om efterladte familiemedlemmer skal have vetoet mod transplantation Og om vi som samfund bør prioritere nogle mennesker over andre i køen til et nyt organ og dermed måske et nyt liv

Living Donor Organ Transplantation Rainer W.G. Gruessner, Enrico Benedetti, 2024-01-22 Living Organ Donor Transplantation Second Edition puts the entire discipline in perspective while guiding readers step by step through the most common organ transplant surgeries Organized into four cohesive parts and featuring numerous surgical illustrations this sourcebook delivers an incisive look at every key consideration for general surgeons who perform transplantations from patient selection to recipient workup and outcomes and emphasizes the most humanitarian approaches Sections provide content on living donor uterus transplantation new operative techniques including the use of robotic and minimally invasive transplant procedures new immunosuppressive regimens new protocols of tolerance induction including stem cell therapy and transplantation and much more Chapter authors are international leaders in their fields and represent institutions from four continents Americas USA Argentina Brazil Canada Europe France Germany Italy Spain Sweden UK Asia China Japan Korea Taiwan Australia Provides an A-Z operation oriented guide to the field of living donor organ transplantation Examines a wide spectrum of solid organ transplantation procedures liver pancreas kidney intestine with accompanying chapters on the history of the procedure the donor the recipient and cost analysis Covers techniques that explain adequate pretransplant workup and posttransplant care Covers cultural differences ethical and legal issues social issues current financial incentives and the illegal organ trade

Organ Donation and Transplantation Gurch Randhawa, 2012-02-08 Transplantation has succeeded in prolonging the lives of those fortunate enough to have received the gift of a body organ Alongside this life saving development there lies another sadder side to the story there are not enough organs to meet the ever increasing demand This not only places an increasing emotional and physical burden among the waiting patients and families but heaps a great financial burden upon health services This book provides an analysis and overview of public policy developments and clinical developments that will hopefully ensure an increased availability of organs and greater graft survival Medical policy and academic experts from around the world have contributed chapters to the book
