

# Understanding Sinusitis

## What is sinusitis?

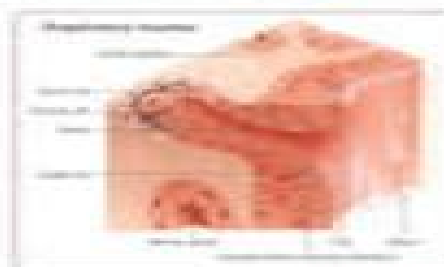

Sinusitis is inflammation of the sinuses, which are air-filled cavities in the skull. The sinuses are part of the respiratory system and help to filter and humidify the air we breathe. Sinusitis can be caused by a viral infection, a bacterial infection, or a fungal infection. It is often associated with a cold or the flu.

## Sinus pain

Sinus pain is a common symptom of sinusitis. It is caused by inflammation and swelling of the sinus lining, which can lead to a buildup of mucus and pressure in the sinuses. The pain is often described as a dull, aching pain that is worse when bending over or lying down.

## Frontal sinusitis, Ethmoiditis

Frontal sinusitis is inflammation of the frontal sinuses, which are located in the forehead area. Ethmoiditis is inflammation of the ethmoid sinuses, which are located in the center of the face. Both conditions can cause pain and swelling in the affected area.

## Symptoms of sinusitis

The symptoms of sinusitis can vary depending on the type and severity of the infection. Common symptoms include a runny nose, nasal congestion, facial pain or pressure, and a loss of taste and smell. Some people may also experience a fever or fatigue.

**Acute sinusitis:** This is the most common type of sinusitis and is usually caused by a viral infection. It typically lasts for less than 10 days.

**Chronic sinusitis:** This type of sinusitis lasts for more than 12 weeks and is often caused by a bacterial infection. It can be more difficult to treat than acute sinusitis.

**Subacute sinusitis:** This type of sinusitis lasts for between 10 and 12 weeks. It is often caused by a viral infection that has not fully resolved.

## Nasal mucin disease

Nasal mucin disease is a rare condition that causes the production of thick, sticky mucus in the nasal cavity. It is often associated with sinusitis and can lead to nasal obstruction and difficulty breathing.

## What is a deviated septum?

A deviated septum is a condition in which the nasal septum, the wall of cartilage and bone that separates the two nasal cavities, is bent or curved. This can lead to nasal obstruction and difficulty breathing.

Deviation

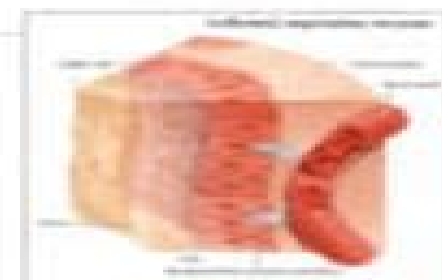

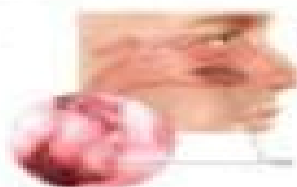

## Classification of sinusitis

**Acute:** This is the most common type of sinusitis and is usually caused by a viral infection. It typically lasts for less than 10 days.

**Chronic:** This type of sinusitis lasts for more than 12 weeks and is often caused by a bacterial infection. It can be more difficult to treat than acute sinusitis.

**Subacute:** This type of sinusitis lasts for between 10 and 12 weeks. It is often caused by a viral infection that has not fully resolved.

**Recurrent:** This type of sinusitis is characterized by frequent episodes of acute sinusitis that last for less than 10 days each.

## Difficulties with sinusitis

Sinusitis can be a difficult condition to manage, especially if it is chronic. It can lead to a variety of complications, including nasal obstruction, difficulty breathing, and a loss of taste and smell. In some cases, it can also lead to more serious complications, such as a fungal infection or a brain abscess.

## What are nasal polyps?

Nasal polyps are small, fleshy growths that develop in the lining of the nasal cavity. They can cause nasal obstruction and difficulty breathing.

## What is allergic fungal sinusitis?

Allergic fungal sinusitis is a rare condition that is caused by an allergic reaction to a fungal infection in the sinuses. It can lead to nasal obstruction and difficulty breathing.

## Diagnosing and treating sinusitis

**Diagnosis:** A doctor can diagnose sinusitis by examining the nasal cavity and sinuses. They may also perform a CT scan or a sinus X-ray to see if there is any inflammation or swelling.

**Treatment:** The treatment for sinusitis depends on the type and severity of the infection. For acute sinusitis, over-the-counter pain relievers and decongestants may be enough. For chronic sinusitis, a doctor may prescribe antibiotics or corticosteroids. In some cases, surgery may be necessary to remove the inflamed tissue.

**Prevention:** There are several things you can do to help prevent sinusitis. These include washing your hands frequently, avoiding allergens, and staying hydrated. If you have a deviated septum, you may want to consider surgery to correct it.
