Introduction to Optimization and Hadamard Semidifferential Calculus, Second Edition Michel C. Delfour, 2019-12-19 This second edition provides an enhanced exposition of the long overlooked Hadamard semidifferential calculus first introduced in the 1920s by mathematicians Jacques Hadamard and Maurice René Fréchet Hadamard semidifferential calculus is possibly the largest family of nondifferentiable functions that retains all the features of classical differential calculus including the chain rule making it a natural framework for initiating a large audience of undergraduates and non mathematicians into the world of nondifferentiable optimization Introduction to Optimization and Hadamard Semidifferential Calculus Second Edition builds upon its prior edition s foundations in Hadamard semidifferential calculus showcasing new material linked to convex analysis and nonsmooth optimization It presents a modern treatment of optimization and Hadamard semidifferential calculus while remaining at a level that is accessible to undergraduate students and challenges students with exercises related to problems in such fields as engineering mechanics medicine physics and economics Answers are supplied in Appendix B Students of mathematics physics engineering economics and other disciplines that demand a basic knowledge of mathematical analysis and linear algebra will find this a fitting primary or companion resource for their studies This textbook has been designed and tested for a one term course at the undergraduate level In its full version it is appropriate for a first year graduate course and as a reference
