These Are The Generations:

Generations Judith Burnett, 2016-04-15 *Generations The Time Machine in Theory and Practice* challenges the fragmented and diverse use of the concept of generation commonly found in the social sciences. It approaches the concept in a manner that stretches the sociological imagination away from its orientation toward the present by building the concept of the passage of time into our understanding of the social. It proposes an innovative and exciting view of the field of generations, lifting it out from life course and cohort analysis and reconstituting the area with fresh and dynamic ways of seeing. With its unique intellectually innovative and sustained critical study of generational work, *Generations* will appeal to scholars across a range of social sciences and humanities and will be of particular interest to social theorists and anthropologists as well as sociologists of social history, consumption, identity, and culture. **These are the Generations** Matthew A. Thomas, 2013-02-20

Using a combination of form critical and linguistic methods, the author seeks to understand the role of the toledot formula, often translated "These are the generations of Name," in shaping the book of Genesis and the Pentateuch as a whole. An examination of the formula uncovers that it functions primarily as a heading to major sections of text and draws the reader's attention to focus on an ever narrower range of characters. By starting from the perspective of the surface structure of the text and addressing questions that investigation raises, the study is able to uncover and resolve a number of tensions within the text as well as provide insights into a number of other questions surrounding the toledot headings and the organization of the structure of the Pentateuch. *An Old Testament Commentary for English Readers: Deuteronomy, Joshua, Judges, Ruth, Samuel* Charles John Ellicott, 1883

The Metamorphosis of the World Ulrich Beck, 2016-09-02 We live in a world that is increasingly difficult to understand. It is not just changing; it is metamorphosing. Change implies that some things change but other things remain the same. Capitalism changes but some aspects of capitalism remain as they always were. Metamorphosis implies a much more radical transformation in which the old certainties of modern society are falling away and something quite new is emerging. To grasp this metamorphosis of the world, it is necessary to explore the new beginnings, to focus on what is emerging from the old and seek to grasp future structures and norms in the turmoil of the present. Take climate change: much of the debate about climate change has focused on whether or not it is really happening and if it is, what we can do to stop or contain it. But this emphasis on solutions blinds us to the fact that climate change is an agent of metamorphosis. It has already altered our way of being in the world; the way we live in the world. Think about the world and seek to act upon the world through our actions and politics. Rising sea levels are creating new landscapes of inequality, drawing new world maps whose key lines are not traditional boundaries between nation states but elevations above sea level. It is creating an entirely different way of conceptualizing the world and our chances of survival within it. The theory of metamorphosis goes beyond theory of world risk society; it is not about the negative side effects of goods but the positive side effects of bads. They produce normative horizons of common goods and propel us beyond the national frame.
