Thinking In Time The Uses Of History For Decision Makers:

Thinking in Time Richard E. Neustadt, Ernest R. May, 1986 Provides a process and framework for using historical knowledge in intelligent decision making and presents several situations in which world leaders did and did not do this

Thinking in time R. E. Neustadt, **THINKING IN TIME: THE USES OF HISTORY FOR DECISION MAKERS**, 1986

Thinking Historically Francis J. Gavin, 2025-09-02 A compelling and insightful argument for historical study as a way to understand and navigate the complex often confusing world of decision making It seems obvious that we should use history to improve policy If we have a good understanding of the past it should enable better decisions in the present especially in the extraordinarily consequential worlds of statecraft and strategy But how do we gain that knowledge How should history be used Sadly it is rarely done well and historians and decision makers seldom interact But in this remarkable book Francis J Gavin explains the many ways historical knowledge can help us understand and navigate the complex often confusing world around us Good historical work convincingly captures the challenges and complexities the decisionmaker faces At its most useful history is less a narrowly defined field of study than a practice a mental awareness a discernment and a responsiveness to the past and how it unfolded into our present world a discipline in the best sense of the word Gavin demonstrates how a historical sensibility helps us to appreciate the unexpected complicates our assumptions makes the unfamiliar familiar and the familiar unfamiliar and requires us without entirely suspending moral judgment to try to understand others on their own terms This book is a powerful argument for thinking historically as a way for readers to apply wisdom in encountering what is foreign to them Professional Journal of the United States Army, 1988 **Analogies at War** Yuen Foong Khong, 2020-05-05 From World War I to Operation Desert Storm American policymakers have repeatedly invoked the lessons of history as they contemplated taking their nation to war Do these historical analogies actually shape policy or are they primarily tools of political justification Yuen Foong Khong argues that leaders use analogies not merely to justify policies but also to perform specific cognitive and information processing tasks essential to political decision making Khong identifies what these tasks are and shows how they can be used to explain the U S decision to intervene in Vietnam Relying on interviews with senior officials and on recently declassified documents the author demonstrates with a precision not attained by previous studies that the three most important analogies of the Vietnam era Korea Munich and Dien Bien Phu can account for America s Vietnam choices A special contribution is the author s use of cognitive social psychology to support his argument about how humans analogize and to explain why policymakers often use analogies poorly **Military Review**, 1988 **The Presidency of Gerald R. Ford** John Robert Greene, 1995 In addition Greene details Ford s rise to prominence within the Republican party chronicles the president s problematic relations with his staff the new Democratic Congress and Ronald Reagan sheds new light on the selection and performance of Vice President Nelson Rockefeller offers new insights into the election of 1976 and provides the first in depth look at Ford s clemency program for Vietnam era draft evaders

Deep State Marc Ambinder, D.B. Grady, 2013-02-14 There is a hidden country within the United States It was formed from the astonishing number of secrets held by the government and the growing ranks of secret keepers given charge over them The government secrecy industry speaks in a private language of codes and acronyms and follows an arcane set of rules and customs designed to perpetuate itself repel penetration and deflect oversight It justifies itself with the assertion that the American values worth preserving are often best sustained by subterfuge and deception Deep State written by two of the country's most respected national security journalists disassembles the secrecy apparatus of the United States and examines real world trends that ought to trouble everyone from the most aggressive hawk to the fiercest civil libertarian The book Provides the fullest account to date of the National Security Agency's controversial surveillance program first spun up in the dark days after 9/11 Examines President Obama's attempt to reconcile his instincts as a liberal with the realities of executive power and his use of the state secrets doctrine Exposes how the public's ubiquitous access to information has been the secrecy industry's toughest opponent to date and provides a full account of how WikiLeaks and other sunlight organizations are changing the government's approach to handling sensitive information for better and worse Explains how the increased exposure of secrets affects everything from Congressional budgets to Area 51 from SEAL Team Six and Delta Force to the FBI CIA and NSA Assesses whether the formal and informal mechanisms put in place to protect citizens from abuses by the American deep state work and how they might be reformed

Cultivating Congress William Paul Browne, 1995 The American Congress in the mid 1990s remains the object of voter discontent Public outcries against special interests and unresponsive incumbents have amplified an already pervasive scepticism towards Beltway politics The book covers policy towards agricultural issues in particular

The Presidency of James Earl Carter, Jr Burton Ira Kaufman, Scott Kaufman, 2006 A thoroughly revised updated and newly illustrated version of the Gaddis Smith called the best book on the totality of the Carter presidency The new edition includes more on the former president's foreign and environmental policies and expands coverage of the personal Carter as well as his wife Rosalyn's activist role during his administration

Chilberg, 1991 This text approaches the study of group communication as skill development integrated with current research It is written for the beginning student who needs to develop the skills for effective group interactions yet it seeks to show the student that research and theory are relevant to developing effective behaviors in groups The goal of the text is that students be able to evaluate group behavior and prescribe techniques for improving group interactions thus improving the quality of decisions made in groups The text includes a Rhands on S manual for guiding group meetings the Group Process Facilitator as well as a synthesis of the most current research in the field in language that students will understand

Uncertain Warriors David M. Barrett, 1993 Lyndon Johnson when it comes to his role in the Vietnam war is popularly portrayed as an irrational hawkish leader who bullied his advisers and refused to solicit a wide range of opinions That depiction David Barrett argues is simplistic and far from accurate

Journal of Defense &

Diplomacy ,1987 *Harvard Business School Core Collection* Baker Library,1993 *Naval War College Review* ,1989
Review of International Studies ,2003 **History and Public Policy** David B. Mock,1991 **The Atlantic** ,1986

History as Rhetoric Ronald H. Carpenter,1995 In the realm of the written word Ronald Carpenter reserves a privileged place for historical writing He contends that because of its assumed credibility historical writing holds sway over the present attitudes and future actions of the general public and world leaders Through extensive primary source research into the public and private writings of such well known and widely read American historians as Frederick Jackson Turner Alfred Thayer Mahan and Allan Nevins Carpenter examines what happens to this inherently credible medium when rhetorical prowess helps shape the writing of history He also evaluates the power that such discourse exercises on the public at large and on individuals empowered with making public policy Carpenter explicates the roles of style and narrative in enabling the writers of history to persuade through opinion leadership a process whereby historical writing authoritatively corroborates what people have learned from other sources Carpenter portrays several American historians as successful opinion leaders who at pivotal points in time persuaded readers with their discourse
