Vegemite, the Melbourne Cup, surf life saving, and Eureka do not necessarily need to provoke in you a warm nostalgic glow or even mild curiosity for this book to be of interest. Although you may like to know that three out of four of these defining icons of Australian society owe their existence to what Lyons refers to as "third sector" organizations.¹

One of the more interesting contributions of this book is to promote the concept of a third sector of society that incorporates not just nonprofit organizations (those with a specific prohibition on the distribution of surpluses) but also cooperatives and mutuals. Even among nonprofit organizations Lyons is careful to ensure that the reader is aware he is including member-benefit organizations, as well as the public-serving nonprofits, which are the focus of much of the scholarly attention in the United States. Despite recurring limitations in available data, Lyons is also careful to ensure that he does not slip into the common error of only counting those organizations that employ staff, let alone the too frequent error of government-sponsored research in only counting the even smaller subset of third-sector organizations that receive government funding. Indeed, Lyons reminds us early in the book that only around 6% of third-sector organizations in Australia have paid employees. Even fewer get government funding.

In breaking out of a U.S. conceptual straight jacket for the sector, he owes much to continental European thinking—most especially the French concept of *l'économie sociale*, which is virtually identical to Lyon's definition

Wallis,2003 In this book the authors outline how policymakers in advanced countries have moved away from exclusive reliance on the public sector in social service delivery towards a more multi faceted approach that seeks to combine the strengths of public agencies private firms and voluntary organizations This development raises interesting and complex questions concerning the comparative advantages of these respective groups in the delivery of goods and services The Political Economy of the Voluntary Sectoradopts a comparative institutions approach to assess the strengths and weaknesses of the government market and voluntary sectors as alternative instruments for implementing social and economic policies The authors examine existing market failure government failure and supply side models of non profit organizations before proposing a new leadership theory of the voluntary sector They then explore the interface between the voluntary sector and the development of social capital The book culminates in an investigation of appropriate public policy approaches towards the voluntary sector This book will be warmly welcomed by academics students and researchers working on alternative methods of public policy program delivery primarily from the disciplines of economics political science and public administration Practitioners drawn from the public and voluntary sectors as well as public policymakers in governments from around the world will also find this accessible book of great interest *Health, Social Change & Communities* Pranee Liamputtong,Heather Gardner,2003 Governments while concentrating on policy development and the pursuit of strategic approaches have concurrently distanced themselves from the direct provision of services to become funders not providers Funding is provided to agencies whether from the public or private sector on the basis of the strength of their competitive tenders and the number of relevant organizations that they have included The effects that these and other changes in the political and economic sectors have had on Australian society at the beginning of the 21st century are the concern of the authors of Health Social Change and Communities Since communities are both the recipients and the participants in health and social policy the book is a

sympathetic but critical analysis of some of those community groups and how they are faring in terms of health and social indicators All of the chapters focus on the four main areas An overview of current social cultural or epidemiological perspectives relevant to the community and their members health Problems or issues in Australian society as reflective of wider international concerns A discussion of relevant health policies and programs Measures that can be taken to improve the health of selected groups in the community Health Social Change and Communities is written for readers who either have an interest or who are engaged in working with members of communities With its presentation of diversity in communities the book provides insights to enlighten and influence thinking about health and social policy *Between the State and the Market* Ledivina V. Cariño,2002 **Strategic Alliances in Brazil** Jennie Irene Daniels,2007 **Giving it Away** Denis Tracey,2003 Based on interviews with 60 individuals and families about their philanthropic activities and ideas this study of philanthropy in Australia shows how and why Australians give away their time and money and how they decide which causes and organizations to support Issues discussed include the emergence of the new rich how greater economic and financial literacy have led to greater confidence with investment decisions and how new interest in the concept of corporate citizenship is encouraging business leaders to reassess their approach to corporate giving **Environment & Planning** ,2003 **Handbook of Applied Developmental Science** Richard M.
