The Life and Death of Ancient Cities Greg Woolf, 2020-06-01 This book tells the story of the rise and collapse of Europe's first great urban experiment Drawing on the latest historical and archaeological evidence Greg Woolf provides a rich history of the ancient Mediterranean city and attempts to solve the puzzles about its rapid emergence and equally rapid decline making comparisons along the way with contemporary urban experience

On Earth as in Heaven? Melanie C. Ross, 2025-07-15 Explore the ways material economies have shaped past liturgical practices and continue to underlie our worship today Because the stuff of Christian worship is inextricably enmeshed in the marketplace it seems that our liturgical practices materiality and economics are forever intertwined In *On Earth as in Heaven* leading scholars who presented the 2023 Yale Institute of Sacred Music Liturgy Conference break new disciplinary ground by investigating complex dynamics of liturgical production distribution and power throughout history This collection critically engages the tension between earthly materialities and eschatological visions of Christian hope offering innovative methodologies case studies and approaches that promise to stimulate further research in liturgical studies and beyond

The World between Empires Blair Fowlkes-Childs, Michael Seymour, 2019-03-18 The World between Empires presents a new perspective on the art and culture of the Middle East in the years 100 B C A D 250 a time marked by the struggle for control by the Roman and Parthian Empires For the first time this book weaves together the cultural histories of the cities

along the great incense and silk routes that connected southwestern Arabia Nabataea Judaea Syria and Mesopotamia It captures the intricate web of influence and religious diversity that emerged in the Middle East through the exchange of goods and ideas And for our current age when several of the archaeological sites featured here including Palmyra Dura Europos and Hatra have been subject to deliberate destruction and looting it addresses the crucial subject of preserving what has been lost and contextualizes the significance of these works on a local and global scale This essential volume features 186 objects of exceptional importance from Europe the Middle East and the United States Readers are taken on a fascinating journey that explores sites of intense political and religious struggles against Roman rule as well as important religious centers and military bulwarks of the Parthian Empire Reaching across two millennia The World between Empires brings vividly to life how individuals and cities in ancient times defined themselves and how these factors continue to resonate today

Delta Waters National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Strategic Research for Integrated Water Resources Management, 2013-12-12

The Water Institute of the Gulf is a not for profit independent research institute dedicated to advancing the understanding of coastal deltaic river and water resource systems both within the Gulf Coast and around the world Their mission supports the practical application of innovative science and engineering providing solutions that benefit society Those who make policy for coastal and deltaic systems as well as managers of natural resources need high quality science and engineering to guide their decisions The Water Institute of the Gulf began operations in 2012 to address exactly this sort of challenge

Delta Waters offers advice to The Water Institute of the Gulf that it might use as part of its strategic planning process This report focuses on strategic research to support integrated water resources management in the lower Mississippi River delta and includes international comparative assessments The recommendations of Delta Waters promote a human and environmental systems approach to scientific research that supports integrated water and environmental resources management in the lower Mississippi River and delta and offers ideas regarding comparative assessments with other relevant deltaic regions around the world This report provides input for research into common deltaic problems and challenges identifies strategic research for The Water Institute of the Gulf and suggests ways that the organization can utilize knowledge gained from the lower Mississippi River and delta system in developing a research program to support water management decisions in other large river delta complexes

You Will Be Assimilated David P. Goldman, 2020-07-09

America has finally recognized China's bid for world dominance but we're still losing ground Domination of the next generation of mobile broadband is just the tip of the spear Like the Borg in Star Trek China will assimilate you into a virtual empire controlled by Chinese technology China is taking control of the Fourth Industrial Revolution the economy of artificial intelligence and quantum computing just as

America dominated the Third Industrial Revolution driven by the computer. Long in planning, China's scheme erupted into public awareness when it emerged as the world leader in 5G internet. America is on track to become poor, dependent and vulnerable unless we revive the American genius for innovation. Trade wars and tech boycotts have failed to slow China's plans. David P. Goldman watched China unfold its imperial plan from the inside as an investment banker in China and strategic consultant and as a principal of a great Asian news organization, the Asia Times. This is an eyewitness, firsthand account of the biggest turning point in world affairs since the Second World War, with a clear explanation of what it means for America and for you, and what America can do to remain the world's leading superpower. Humans Versus Nature Daniel R. Headrick, 2020. Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago, human beings have sought to exploit their environments, extracting as many resources as their technological ingenuity has allowed. As technologies have advanced in recent centuries, that impulse has remained largely unchecked, exponentially accelerating the human impact on the environment. Humans versus Nature tells a history of the global environment from the Stone Age to the present, emphasizing the adversarial relationship between the human and natural worlds. Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance. Daniel R. Headrick shows how environmental changes, epidemics, climate shocks, and volcanic eruptions have molded human societies and cultures, sometimes overwhelming them. At the same time, he traces the history of anthropogenic changes in the environment: species extinctions, global warming, deforestation, and resource depletion back to the age of hunters and gatherers and the first farmers and herders. He shows how human interventions, such as irrigation systems, overfishing, and the Industrial Revolution, have in turn harmed the very societies that initiated them. Throughout, Headrick examines how human-driven environmental changes are interwoven with larger global systems, dramatically reshaping the complex relationship between people and the natural world. In doing so, he roots the current environmental crisis in the deep past. Wheat Mike J. Gooding, Peter R. Shewry, 2022-01-27. Wheat is produced on a greater area, grown over a wider geographic range, and traded internationally as a commodity more than any other arable crop. Wheat alone provides 20% of the calories and protein in the global human diet. Understanding the interactions between wheat production, the environment, and human nutrition is essential for meeting the demands of food security as we approach the middle of the 21st century. Wheat: Environment, Food, and Health is written by two leading authorities in the field and offers insights into critical issues, such as the sustainability of wheat production, the challenges of both mitigating and adapting to environmental change, and the effects of wheat consumption on human health. Covering a broad range of topics, the authors introduce the historical development and utilization of the wheat crop, describe the factors affecting the quality and acceptability of wheat for different uses, discuss the soil characteristics that are required for and changed by wheat production, examine the water, temperature, and light requirements of wheat systems, explore the methods and sustainability of plant breeding, and describe farmer approaches to improving crop yields. Describe the development, structure, and

composition of wheat grain Discuss the contribution and impacts both positive and negative of wheat consumption on human health Discuss how modern technologies and new approaches are addressing the challenges of maintaining wheat production Wheat Environment Food and Health is an essential resource for researchers and academics in disciplines including agriculture plant biology applied biology botany food science and nutrition crop improvement food security environmental sustainability and human health

The Three Ages of Government Jos C.N. Raadschelders, 2020-11-05 It is only in the last 250 years that ordinary people in some parts of the world have become citizens rather than subjects This change happened in a very short period between 1780 and 1820 a result of the foundations of democracy laid in the age of revolutions A century later local governments embraced this shift due to rapid industrialization urbanization and population growth During the twentieth century all democratic governments began to perform a range of tasks functions and services that had no historical precedent In the thirty years following the Second World War Western democracies created welfare states that for the first time in history significantly reduced the gap between the wealthy and everyone else Many of the reforms of that postwar period have been since rolled back because of the belief that government should be more like a

business Jos C N Raadschelders provides the information that all citizens should have about their connections to government why there is a government what it does how it does it and why we can no longer do without it *The Three Ages of Government* rises above stereotypical thinking to show the centrality of government in human life **A Day in a Working Life** Gary Westfahl, 2015-04-21 Ideal for high school and college students studying history through the everyday lives of men and women this book offers intriguing information about the jobs that people have held from ancient times to the 21st century This unique book provides detailed studies of more than 300 occupations as they were practiced in 21 historical time periods ranging from prehistory to the present day Each profession is examined in a compelling essay that is specifically written to inform readers about career choices in different times and cultures and is accompanied by a bibliography of additional sources of information sidebars that relate historical issues to present day concerns as well as related historical documents Readers of this work will learn what each profession entailed or entails on a daily basis how one gained entry to the vocation training methods and typical compensation levels for the job The book provides sufficient specific detail to convey a comprehensive understanding of the experiences benefits and downsides of a given profession Selected accompanying documents further bring history to life by offering honest testimonies from people who actually worked in these occupations or interacted with those in that field *The Hammam through Time and Space* Julie Peteet, 2024-05-15 Julie Peteet offers a fascinating tour through the rich cultural history of hammams or baths in the Mediterranean and Middle East These sacred structures date back to the Bronze and Iron Ages and have evolved through the Hellenistic Roman Byzantine and Islamic periods In this original work Peteet provides the first comprehensive examination of hammams through their architecture labor pool clientele meanings notions of the body and hygiene and economy Exploring the hammam as both a tangible architectural structure and an intangible social practice Peteet sheds light on how the bath has functioned as a central hub of religious ceremonies and a space that transcends any specific religious affiliation Although hammams have experienced a decline due to modernization new domestic technologies and rejection of the Ottoman Islamic past their current reinvigorated form illuminates neoliberal conceptions of heritage and leisure industries Hammams have become spaces for cleansing and fashioning a gendered and aesthetically appropriate body as defined by a global wellness syndrome Peteet's captivating narrative traces the hammam's historical significance and contemporary role as both a sacred and profane cultural phenomenon **Handbook on the Politics of Public Administration** Ladner, Andreas, Sager, Fritz, 2022-10-13 This innovative Handbook puts the politics of public administration at the forefront providing comprehensive insights and comparative perspectives of the different aspects of the field *Slavery, Agriculture, and Malaria in the Arabian Peninsula* Benjamin Reilly, 2015-10-29 In *Slavery Agriculture and Malaria in the Arabian Peninsula* Benjamin Reilly illuminates a previously unstudied phenomenon the large scale employment of people of African ancestry as slaves in agricultural oases within the Arabian Peninsula The key to understanding this unusual system Reilly argues is the prevalence of malaria within

Arabian Peninsula oases and drainage basins which rendered agricultural lands in Arabia extremely unhealthy for people without genetic or acquired resistance to malarial fevers In this way Arabian slave agriculture had unexpected similarities to slavery as practiced in the Caribbean and Brazil This book synthesizes for the first time a body of historical and ethnographic data about slave based agriculture in the Arabian Peninsula Reilly uses an innovative methodology to analyze the limited historical record and a multidisciplinary approach to complicate our understandings of the nature of work in an area that is popularly thought of solely as desert This work makes significant contributions both to the global literature on slavery and to the environmental history of the Middle East an area that has thus far received little attention from scholars **The King**

and the Making of Modern Thailand Antonio Rappa, 2017-04-21 The making of modern Thailand is grounded in specific political institutions Brahmanical tropes and sacred Buddhist traditions stylized with Hindu rituals Over and above these mysterious practices and ancient customs modern Thailand is a product of the late Great Rama IX Bhumibol Adulyadej Most Thai people have only known one King Born in Europe and educated during World War II Bhumibol was the son of a Harvard medical doctor who had a penchant for jazz music and fast cars When he returned to Thailand in 1951 to assume his royal duties he could hardly speak Thai but his French and German were remarkable Bhumibol had inherited an impoverished country with nothing but a symbolic role as a figurehead monarch He was surrounded by envious courtiers and royals from other families now sidelined by the rise of the Chakri Scheming generals and authoritarian field marshals were emptying the Kingdom's coffers Using guile and wit Bhumibol had turned the tide by 1973 He became the most powerful modern warlord in the history of the Kingdom He survived attempted murder crafty politicians corrupt generals sycophantic courtiers and impoverished masses When he died on October 13 2016 Bhumibol was already the longest standing monarch in the world King Bhumibol was deeply respected and well liked by farang and locals alike Despite his massive social and economic achievements many problems continue to plague the Kingdom These are prostitution human rights issues pollution corruption cronyism in Chinese businesses border conflicts with Cambodia and the refugee problem This book examines the role of Rama IX and the variegated set of problems that persist in life under the great white elephant and mango trees Rappa draws from his primary research that includes interviews surveys and first hand observations of a remarkable kingdom and a uniquely remarkable king to reveal the internal security threats to democracy and civil society in the oldest Southeast Asian kingdom in late modernity **The Paradox of Water** Bhawani Venkataraman, 2023-01-17 Water is a molecular marvel Its

seemingly simple formula H_2O dictates the properties that make water essential for life and easily contaminated Herein lies the paradox of water we cannot live without it but it is easily rendered unsafe The Paradox of Water explores the intersection of the scientific social and policy implications around access to safe drinking water Drinking water is the smallest fraction of water used by a nation yet access to safe drinking water supports educational opportunities helps overcome gender inequities lowers familial stress and enables more socially and economically productive uses of time **Asphalt** Kenneth

O'Reilly, 2021-07 Asphalt A History provides a narrative history of asphalt and its effects from ancient times to the modern day Although asphalt creates our environment it also threatens it
