Designed for the high-end contribution and distribution market, Thomson RD5000 receivers offer professional-quality MPEG-2/4 4:2:0 SD and HD decoding.

Designed for the high-end contribution and distribution market where quality and performance are paramount, Thomson RD5000 receivers offer professional quality standard-definition (SD) and high-definition (HD) decoding.

With digital video going deeper into today's systems, and interface technologies rapidly changing, these truly flexible receivers easily adapt to your specific configuration and application.

By offering both MPEG-2 and MPEG-4 encoders and decoders such as the RD5000, Thomson products let you benefit from the latest advances in compression technology to achieve significant bandwidth saving over your contribution links.

The RD5000 is the combination of the previous RD2000 & RD3000 units.

One Product, Many Applications

The RD5000 is scalable to address multiple applications at the optimal cost.

Typical uses are:

- RD5000 analog, which decodes MPEG-2/4 SD & HD and outputs analog audio/video
- RD5000 SD & HD, which decodes MPEG-2/4 SD & HD and outputs the signal over a configurable SD/HD SDI output
- The RD5000 receiver unscrambles some services, outputting the transport stream over ASI or IP while at the same time decoding MPEG-2/4 SD/HD and outputting that signal over a configurable SD/HD SDI output

The RD5000 offers exceptional flexibility and can be fitted with several optional interfaces to meet your exact needs.

Flexibility and Density

Built on a highly flexible and scalable architecture, the RD5000 can support a number of system applications.

Its chassis features a plug-and-play structure that lets you add interface boards depending upon your needs.

With an industry-leading interface range covering satellite, telco, and terrestrial networks, you have the freedom to select the board you need to create a truly flexible solution.
