Studies in the Historical Jesus Justin J. Meggitt, 2023-08-29 *Studies in the Historical Jesus* Anarchy Miracles and Madness is a selection of key essays on the historical figure of Jesus published over the last fifteen years by Justin J Meggitt Each addresses a central question in the study of Jesus and his context from the role of myth in the creation of traditions about him and the historicity of his miracles to the problem of his politics and the reasons for his execution The collection brings fresh perspectives and new data to bear on enduring debates and demonstrates the value of history from below in making sense of the historical Jesus and the world that made him

Snake Oil Science R. Barker Bausell PhD, 2009-07-31 Every year millions of people flock to complementary and alternative therapists offering a vast array of treatments ranging from acupuncture to biofeedback to urine injections Millions more purchase over the counter alternative medications such as glucosamine herbs and homeopathic remedies While consumer motivations for turning to complementary and alternative medicine CAM vary there is one common element among them all a belief in their effectiveness This belief appears to be prevalent among all elements of society from scientists and physicians to celebrities such as Prince Charles and Oprah Winfrey to clerical workers and senior citizens Do these therapies actually work And if they work how do they work This book is about the science of complementary and alternative medicine about how that science is conducted how it is evaluated and how it is synthesized to arrive at a bottom line conclusion about whether CAM therapies work It is also about the phenomenon of the placebo effect and the extent to which it is at play in a given CAM therapy s efficacy Are CAM therapies in fact nothing more than creatively packaged placebos In exploring this question

Barker Bausell provides an authoritative and engaging look at the nature of scientific evidence and at the logical psychological and physiological impediments that can confound such evidence in the world of CAM research. Ultimately the book is not so much opposed to CAM as to the shoddy science upon which CAM claims are based and in fact it closes with a chapter about how one might maximize the placebo effect that Bausell asserts is the main ingredient of most CAM therapies. For general readers, students and professionals e.g. clinicians who are routinely asked by their patients for CAM recommendations, the book is a learned witty examination not just of the scientific process as it is applied to CAM but also of the wonders of the human mind/body system.

Perspectives on Complementary and Alternative Medicine: A Reader
Geraldine Lee Treweek, Tom Heller, Julie Stone, Hilary MacQueen, Jeanne Katz, 2019-07-23

Complementary and alternative medicine (CAM) is an emerging and increasingly popular group of treatments, therapies and philosophies of health and wellbeing. It is a fascinating and fast-changing area of social life which also poses an interesting challenge to current healthcare delivery and policy making. This reader presents a lively and engaging collection of classic, controversial and new readings on CAM and covers issues including changes in the way CAM is developing and being delivered, holism and what this concept means to CAM practice, changes in consumption and the health consumer that have led to increased interest in CAM, the safety and effectiveness of CAM treatments, how integration is being achieved in contemporary society. The text provides insight into many of the current and complex issues surrounding CAM and will appeal to everyone who is concerned with or who has an interest in complementary and alternative healthcare. The book will be essential reading for students of CAM, health studies, nursing, medicine and allied health subjects as well as medical sociology and modern health policy.

Pain E-Book Hubert van Griensven, Jenny Strong, Anita M. Unruh, 2013-12-06

The highly anticipated new edition of *Pain*, a textbook for health professionals, previous subtitle *a textbook for therapists* has undergone a major rewrite in order to reflect the rapid developments in the field of pain management. It highlights an effective and evidence-based method providing the theoretical basis to help with the assessment and management of persistent pain while also discussing in depth a range of specific approaches. *Pain*, a textbook for health professionals, is written emphatically from a biopsychosocial perspective. In order to set the scene, the introductory section includes chapters on the patient's voice and social determinants of pain. This ensures that the deeply personal and social aspects of pain are not lost among the more technical and biological commentary. These aspects provide an overall context and are revisited in chapters on participation of life roles, work, rehabilitation and psychology. The basic science section includes key chapters on the psychology, neuroanatomy and neurophysiology of pain. This provides a basis for subsequent chapters on specific approaches such as pharmacology, physical therapy and complementary medicine. *Pain* in specific patient groups including children, the elderly and those with cancer are dealt with in separate chapters as are pain problems such as complex regional pain syndrome and chronic spinal pain. Although the emphasis of the book is on long-term pain, acute pain is discussed as a possible precursor and determinant.

of chronicity Patient centred approach to care advocates listening to the patient s voice Covers social determinants of pain Guides the reader from pain psychology to the practical application of psychological interventions Learning aids chapter objectives reflective exercises case examples and revision questions Emphasizes an evidence based perspective Written by an international team of experts topics such as pain in children and the elderly pain education for professionals disability and medico legal aspects expanded focus on complex regional pain syndrome acupuncture and psychology improved layout for a better learning and studying experience The Life of a Galilean Shaman Pieter F Craffert,2010-02-25 The aim of historical Jesus research is to identify the authentic material from which the historical figure as a social type underneath the overlay is constructed Pieter Craffert s anthropological historiography offers an alternative framework for dealing with Jesus of Nazareth as a social personage fully embedded in a first century Mediterranean worldview and the Gospels as cultural artefacts related to this figure This cross cultural model represents a religious pattern that refers to a family of features for describing those religious entrepreneurs who based on regular Altered State of Consciousness experiences perform a specific set of social functions in their communities *HIV & AIDS, 5Ed* Robert J. Pratt, CBE FRCN,2003-09-26 HIV AIDS A Foundation for Nursing and Health Care Practice is based on an enhanced needs based model of nursing providing a comprehensive reference to the entire spectrum of HIV disease for nurses midwives and other healthcare professionals Now completely re written and updated the 5th edition of this highly successful text provides a new understanding of the issues behind the epidemic The dynamics of science driving patient outcomes including epidemiology retrovirology immunology and pathogenesis are clearly described and made accessible to provide a sound evidence base for making effective clinical practice decisions Major new chapters explore how to help patients adhere to treatment how to advise patients on complementary and alternative medicine CAM approaches to therapy and importantly the issues confronting nurses midwives and other health care professionals in the developing world Diagnosis Pat Croskerry,Karen Cosby,Mark L. Graber,Hardeep Singh,2017-09-19 Despite diagnosis being the key feature of a physician s clinical performance this is the first book that deals specifically with the topic In recent years however considerable interest has been shown in this area and significant developments have occurred in two main areas a an awareness and increasing understanding of the critical role of clinical decision making in the process of diagnosis and of the multiple factors that impact it and b a similar appreciation of the role of the healthcare system in supporting clinicians in their efforts to make accurate diagnoses Although medicine has seen major gains in knowledge and technology over the last few decades there is a consensus that the diagnostic failure rate remains in the order of 10 15% This book provides an overview of the major issues in this area in particular focusing on where the diagnostic process fails and where improvements might be made
